12. Do you own the property listed above as place of use? No

13. Other Water Rights Used:

14. Remarks:

The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Approval of this transfer does not preclude the opportunity for review of the validity of this water right in the ongoing Snake River Basin Adjudication.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

The total instantaneous diversion of water from all points of diversion under Rights 63-2839, 63-3329, 63-3366, 63-3396, 63-8232, 63-8253, 63-10268 and 63-29025 shall not exceed 8.98 cfs, nor a total combined annual volume of 3622.7 af for the irrigation of 780 acres in a single irrigation season.

After specific notification by the Department, the right holder shall record the quantity of water diverted or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

The water right holder shall read the measuring devices at least monthly and record the volume readings from the meter on forms provided by the Department. The recorded diversions and year end totals shall be reported annually to the Department on forms provided by the Department prior to January 31 of the following year.

The measuring devices must accumulate volume diverted, and must be constructed to prevent change of the meter reading. The meters shall also read instantaneous flow. The meters shall be calibrated when they are installed with an independent measuring device. The measuring devices must be calibrated in-line once every three years following the year of installation.

Rights 63-3366 and 63-3396 when combined shall not exceed a total diversion rate of 2.09 cfs.

Irrigation use under Rights 63-3366, 63-3396 and 63-8232 when combined shall not exceed a total diversion rate of 4.41 cfs, a total annual maximum diversion volume of 1838.2 af and the irrigation of 428 acres.

Rights 63-3366, 63-3396 and 63-8232 when combined shall not exceed a total diversion rate of 4.41 cfs and a total annual maximum diversion volume of 2038.2 af.

Prior to the diversion and use of water under this approval, the right holder shall comply with applicable county zoning and use ordinances.

Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality standards of the Department of Environmental Quality.

Water diverted and used for the dairy operation, including land application of waste water, shall satisfy federal and Idaho state laws, regulations, and standards related to water quality.

This right is limited to the irrigation of 54.1 acres within the place of use described above in a single irrigation season.

The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

Commercial use is for a dairy barn.

Rights 63-2839, 63-3329, 63-3366, 63-8232, 63-8253, 63-10268 and 63-29025 are also diverted through the points of diversion described above.

PART 1

6. General Information:

- a. Description of diversion system: No changes or additions to the diversion system.
- b.
- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? X Yes ___ No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.
- c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:
No changes in the total number of acres irrigated.
- d. Remarks: The dairy consists of 3 farms joined under common ownership. Liquid waste is diluted with irrigation water and land applled through the irrigation system, and this has required the connection of all three irrigation systems into a common system. By placing all points of diversion and all places of use on each water right, while respecting the permissible flows and volumes from each point of diversion, the applicant will be better able to comply with the conditions of each license, while operating the farm efficiently.

See attachments:A. Proof of ownership and lienholder permission.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

Conditions of Approval:

1. The measuring devices must accumulate volume diverted, and must be constructed to prevent change of the meter reading. The meters shall also read instantaneous flow. The meters shall be calibrated when they are installed with an independent measuring device. The measuring devices must be calibrated in-line once every three years following the year of installation.
2. The water right holder shall read the measuring devices at least monthly and record the volume readings from the meter on forms provided by the Department. The recorded diversions and year end totals shall be reported annually to the Department on forms provided by the Department prior to January 31 of the following year.
3. Water diverted and used for the dairy operation authorized under approved Transfer 4961, including land application of waste water, shall satisfy federal and Idaho state laws, regulations, and standards related to water quality.
4. The proposed well shall be drilled in the NENE S17 T2N R3W hydrologically upgradient from the milking facility and any associated structure, lagoon, waste storage area, holding pens or any other waste producing or holding facility related to the dairy as approved by the Department of Water Resources.
5. Commercial use is for a dairy barn located in the NE S17 T2N R3W.
6. Rights 63-3366 and 63-3396 when combined shall not exceed a total diversion rate of 2.09 cfs.

IDAHO DEPARTMENT OF WATER RESOURCES

Adjudication Claim Report 63-3366

7. Irrigation use under Rights 63-3366 and 63-8232 when combined shall not exceed a total annual maximum diversion volume of 1594.8 af at the field headgate and the irrigation of 354.4 acres.
8. Prior to diversion of water for stockwater and commercial uses under this approval, the right holder shall provide a means of measurement and lockable controlling works acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion for these uses.
9. 020 Use of water under this right may be affected by an agreement between the protestant and the right holder.
10. 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
11. 082 Prior to the diversion and use of water under this approval, the right holder shall comply with applicable county zoning and use ordinances.
12. 106 Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality standards of the Department of Environmental Quality.
13. R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
14. T07 The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
15. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
16. T17 Prior to diversion of water for irrigation use under this approval, the right holder shall provide a means of measurement and lockable controlling works acceptable to the Department from all authorized points of diversion or enter into an agreement with the Department to determine the amount of water diverted from power records which will allow determination of the total rate of diversion for irrigation use.
17. WB4 The total instantaneous diversion of water from all points of diversion under Rights 63-3366, 63-3396 and 63-8232 shall not exceed 4.41 cfs, nor total combined annual volume of 2038.2 af for all authorized uses.
18. WD8 The place of commercial use authorized by this approval includes land upon which wastewater may be applied for irrigation purposes to satisfy water quality requirements. Water diverted under this approval shall not be used for irrigation unless the water is first used in the dairy as authorized by these water rights.
19. X27 This right is limited to the irrigation of 144.3 acres within the place of use described above in a single irrigation season.
20. X35 Irrigation use under Rights 63-3366, 63-3396 and 63-8232 when combined shall not exceed a total diversion rate of 4.41 cfs, a total annual maximum diversion volume of 1838.2 af.

1. The water right holder shall read the measuring devices at least monthly and record the volume readings from the meter on forms provided by the Department. The recorded diversions and year end totals shall be reported annually to the Department on forms provided by the Department prior to January 31 of the following year.
2. Water diverted and used for the dairy operation authorized under approved Transfer 4961, including land application of waste water, shall satisfy federal and Idaho state laws, regulations, and standards related to water quality.
3. The proposed well shall be drilled in the NENE S17 T2N R3W hydrologically upgradient from the milking facility and any associated structure, lagoon, waste storage area, holding pens or any other waste producing or holding facility related to the dairy as approved by the Department of Water Resources.
4. Commercial use is for a dairy barn located in the NE S17 T2N R3W.
5. Irrigation use under Rights 63-3366 and 63-8232 when combined shall not exceed a total annual maximum diversion volume of 1594.8 af at the field headgate and the irrigation of 354.4 acres.
6. Prior to diversion of water for stockwater and commercial uses under this approval, the right holder shall provide a means of measurement and lockable controlling works acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion for these uses.

IDAHO DEPARTMENT OF WATER RESOURCES

Adjudication Claim Report 63-8232

7. The measuring devices must accumulate volume diverted, and must be constructed to prevent change of the meter reading. The meters shall also read instantaneous flow. The meters shall be calibrated when they are installed with an independent measuring device. The measuring devices must be calibrated in-line once every three years following the year of installation.
8. 020 Use of water under this right may be affected by an agreement between the protestant and the right holder.
9. 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
10. 082 Prior to the diversion and use of water under this approval, the right holder shall comply with applicable county zoning and use ordinances.
11. 106 Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality standards of the Department of Environmental Quality.
12. R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 af per acre at the field headgate for irrigation of the lands above.
13. T07 The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
14. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
15. T17 Prior to diversion of water for irrigation use under this approval, the right holder shall provide a means of measurement and lockable controlling works acceptable to the Department from all authorized points of diversion or enter into an agreement with the Department to determine the amount of water diverted from power records which will allow determination of the total rate of diversion for irrigation use.
16. WB4 The total instantaneous diversion of water from all points of diversion under Rights 63-3366, 63-3396 and 63-8232 shall not exceed 4.41 cfs, nor total combined annual volume of 2038.2 af for all authorized uses.
17. WD8 The place of commercial use authorized by this approval includes land upon which wastewater may be applied for irrigation purposes to satisfy water quality requirements. Water diverted under this approval shall not be used for irrigation unless the water is first used in the dairy as authorized by these water rights.
18. X27 This right is limited to the irrigation of 250.1 acres within the place of use described above in a single irrigation season.
19. X35 Irrigation use under Rights 63-3366, 63-3396 and 63-8232 when combined shall not exceed a total diversion rate of 4.41 cfs, a total annual maximum diversion volume of 1838.2 af.

Comment: Western Region has received an application for transfer which includes this permit. They have requested an expedited license for this reason.

2. kwalker 1/26/2004 Capacity of Wells

Comment: Rt. 63-3329 was licensed from well in NWNENW with a capacity of 2.06 cfs. Rt. 63-8253 was licensed from well in SENENW with a capacity of 1.16 cfs. Examiner recommended only 1.0 cfs for well in SENENW but I am recommending we use capacity as licensed under 63-8253. System capacity from both wells will be shown as 3.22 cfs on this license.

11. Place of use in counties: CANYON

12. Do you own the property listed above as place of use? No

13. Other Water Rights Used:

14. Remarks:

Claim amended per Transfer 68964 approved 5/28/03.

Use of water under this right may be affected by an agreement between the protestant and the right holder.

This right is limited to the irrigation of 54.1 acres within the place of use described above in a single irrigation season.

Rights 63-3366 and 63-3396 when combined shall not exceed a total diversion rate of 2.09 cfs.

Irrigation use under Rights 63-3366, 63-3396 and 63-8232 when combined shall not exceed a total diversion rate of 4.41 cfs, a total annual maximum diversion volume of 1838.2 af.

The total instantaneous diversion of water from all points of diversion under Rights 63-3366, 63-3396 and 63-8232 shall not exceed 4.41 cfs, nor total combined annual volume of 2038.2 af for all authorized uses.

Prior to diversion of water for irrigation use under this approval, the right holder shall provide a means of measurement and lockable controlling works acceptable to the Department from all authorized points of diversion or enter into an agreement with the Department to determine the amount of water diverted from power records which will allow determination of the total rate of diversion for irrigation use.

Prior to diversion of water for stockwater and commercial uses under this approval, the right holder shall provide a means of measurement and lockable controlling works acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion for these uses.

The measuring devices must accumulate volume diverted, and must be constructed to prevent change of the meter reading. The meters shall also read instantaneous flow. The meters shall be calibrated when they are installed with an independent measuring device. The measuring devices must be calibrated in-line once every three years following the year of installation.

The water right holder shall read the measuring devices at least monthly and record the volume readings from the meter on forms provided by the Department. The recorded diversions and year end totals shall be reported annually to the Department on forms provided by the Department prior to January 31 of the following year.

Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality standards of the Department of Environmental Quality.

Water diverted and used for the dairy operation authorized under approved Transfer 4961, including land application of waste water, shall satisfy federal and Idaho state laws, regulations, and standards related to water quality.

The place of commercial use authorized by this approval includes land upon which wastewater may be applied for irrigation purposes to satisfy water quality requirements. Water diverted under this approval shall not be used for irrigation unless the water is first used in the dairy as authorized by these water rights.

Prior to the diversion and use of water under this approval, the right holder shall comply with applicable county zoning and use ordinances.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

The proposed well shall be drilled in the NENE S17 T2N R3W hydrologically upgradient from the milking facility and any associated structure, lagoon, waste storage area, holding pens or any other waste producing or holding facility related to the dairy as approved by the Department of Water Resources.

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

Commercial use is for a dairy barn located in the NE S17 T2N R3W.

The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

CONDITIONS/REMARKS:

- Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

Water Right No. 63-03366

CONDITIONS/REMARKS:

2. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
3. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
4. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
5. Prior to diversion of water under this approval, the right holder shall provide a permanent measuring device and lockable controlling works of a type acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion and annual volume. The total instantaneous diversion of water from all points of diversion under Transfer No. 4961 shall not exceed 4.41 cfs, nor total combined annual volume of 2038.2 af.
6. The proposed well shall be drilled in the NENE, S17, T02N, R03W, hydrologically upgradient from the milking facility and any associated structure, lagoon, waste storage area, holding pens or any other waste producing or holding facility related to the dairy as approved by the Department of Water Resources.
7. The water right holder shall annually report diversion of water to the Department of Water Resources as required by the Director. Water diverted and used for the dairy operation, including land application of waste water, shall satisfy federal and Idaho state laws, regulations, and standards related to water quality.
8. Wells which are no longer intended for use must be abandoned pursuant to rules and regulations of the Department of Water Resources.
9. Right 63-03366 is limited to the irrigation of 144.3 acres in the place of use described above in a single irrigation season.
10. Rights 63-03366 and 63-03396 when combined shall not exceed the total combined diversion rate of 2.09 cfs.
11. Rights 63-03366 and 63-08232 when combined shall not exceed the total combined annual diversion volume of 1594.8 af for the irrigation of 354.4 total acres.
12. Irrigation use under Rights 63-03366, 63-03396 and 63-08232 when combined shall not exceed the total combined diversion rate of 4.41 cfs, a total combined annual diversion volume of 1838.2 af, for the irrigation of 408.5 total acres.
13. Commercial use is for a dairy.
14. Three (3) points of diversion are located within NWSW, S16, T02N, R03W.
15. The right holder of Transfer 4961 is granted an extension to December 16, 1999 to accomplish the transfer.

CONDITIONS/REMARKS:

1. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

Water Right No. 63-03396

CONDITIONS/REMARKS:

2. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
3. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
4. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
5. Prior to diversion of water under this approval, the right holder shall provide a permanent measuring device and lockable controlling works of a type acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion and annual volume. The total instantaneous diversion of water from all points of diversion under Transfer No. 4961 shall not exceed 4.41 cfs, nor total combined annual volume of 2038.2 af.
6. The proposed well shall be drilled in the NENE, S17, T02N, R03W, hydrologically upgradient from the milking facility and any associated structure, lagoon, waste storage area, holding pens or any other waste producing or holding facility related to the dairy as approved by the Department of Water Resources.
7. The water right holder shall annually report diversion of water to the Department of Water Resources as required by the Director. Water diverted and used for the dairy operation, including land application of waste water, shall satisfy federal and Idaho state laws, regulations, and standards related to water quality.
8. Wells which are no longer intended for use must be abandoned pursuant to rules and regulations of the Department of Water Resources.
9. Right 63-03396 is limited to the irrigation of 54.1 acres in the place of use described above in a single irrigation season.
10. Rights 63-03366 and 63-03396 when combined shall not exceed the total combined diversion rate of 2.09 cfs.
11. Irrigation use under Rights 63-03366, 63-03396 and 63-08232 when combined shall not exceed the total combined diversion rate of 4.41 cfs, a total combined annual diversion volume of 1838.2 af, for the irrigation of 408.5 total acres.
12. Commercial use is for a dairy.
13. Three (3) points of diversion are located within NWSW, S16, T02N, R03W.
14. The right holder of Transfer 4961 is granted an extension to December 16, 1999 in which to accomplish the transfer.

Dear Water users,

Our office received your Notice of Change of Water Right Ownership for the above Water Rights. Because of the following reasons we are delaying changing the ownership. We also cannot process your new application for transfer to add a point of diversion. You may be able to modify this new transfer application if necessary to include items 3 and 6.

The legal documentation you supplied does not show your ownership of the 40 acres in T02N, R03W, S17, NESE tract.

1. If you own this property, please supply us with documentation of this ownership.
2. If you do not own this property, please supply documentation of any agreements made by you and the owner allowing you to irrigate this property.
3. If the 408.5 acres is being irrigated outside the place of use you will need to file an application for transfer to correct the place of use.
4. If you are not irrigating this property please show where the 408.5 acres of irrigation associated with this water right transfer is being used. (See enclosed photo of approved tracts and irrigated acres).
5. If this tract isn't a part of the system and no acres developed by groundwater in his tract, you may request the current owner to sign a letter of release. Stating that the system recorded in transfer 4961 doesn't irrigate his property and has no claim to irrigation developed from this transfer.
6. A transfer would then need to be filed to correct the legal description to the actual place of use. It is my understanding that you recently filed a transfer to add

a domestic well to your dairy operation. This transfer is on hold until the ownership discrepancy is corrected.

7. Lori Graves, the reviewing agent, stated that you could modify the transfer with any changes that may be necessary with no additional fees.

CHANGE OF OWNERSHIP:

If the transfer is approved, as mentioned in the cases listed in items 3 & 6, then the approved transfer will change the ownership for these rights.

If no transfer is filed, then we are required to split these rights based upon evidence of ownership as shown on your Warranty deed and prorate accordingly.

Please respond to this letter and let me know what your intentions are by February 14, 2000. If we do not hear from you we may split and prorate these rights as mentioned above.

Sincerely,

Ron Howerton

Re: Transfer 4961 - Johnson Land Company for irrigation and dairy usage

To whom it may concern:

We understand that the John Johnson/Johnson Land Company Transfer 4961, Dated December 22, 1997, by the Idaho Dept of Water Resources issued a right to transfer and use water from the Johnson well in Section 16 for irrigation and dairy usage on 40 acres located in the NE 1/4 of the SE 1/4, Section 17, T.2N., R.3W., B.M., Canyon County, Idaho.

We own said 40 acres now, at, and prior to the time of said transfer. Said Johnson's well system and transfer do not supply water to our land; we have no rights to use the Johnson well system, which is now owned by the Teunissen Dairy, and we should not have been included in said transfer.

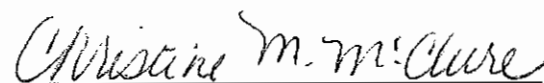

Thank you,

Richard W. Smith

Conditions of Approval:

- 046 - Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
- R65 - This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
- T08 - Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
- T09 - Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

Remarks: GEN Prior to diversion of water under this approval, the right holder shall provide a permanent measuring device and lockable controlling works of a type acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion and annual volume.

Remarks: The total instantaneous diversion of water from all points of diversion under Transfer No. 4961 shall not exceed 4.41 cfs, nor total combined annual volume of 2038.2 af. The proposed well shall be drilled in the NENE, S17, T02N, R03W, hydrologically upgradient from the milking facility and any associated structure, lagoon, waste storage area, holding pens or any other waste producing or holding facility related to the dairy as approved by the Department of Water Resources. The water right holder shall annually report diversion of water to the Department of Water Resources as required by the Director. Water diverted and used for the dairy operation, including land application of waste water, shall satisfy federal and Idaho state laws, regulations, and standards related to water quality. Wells which are no longer intended for use must be abandoned pursuant to rules and regulations of the Department of Water Resources. Right 63-03396 is limited to the irrigation of 54.1 acres in the place of use described above in a single irrigation season. Rights 63-03366 and 63-03396 when combined shall not exceed the total combined diversion rate of 2.09 cfs. Irrigation use under Rights 63-03366, 63-03396 and 63-08232 when combined shall not exceed the total combined diversion rate of 4.41 cfs, a total combined annual diversion volume of 1838.2 af, for the irrigation of 408.5 total acres. Commercial use is for a dairy. Three (3) points of diversion are located within NWSW, S16, T02N, R03W. The right holder of Transfer 4961 is granted an extension to December 16, 1999 in which to accomplish the transfer.

MEMORANDUM

TO: FILES 63-03366, 63-03396 & 63-08232

FROM: PAM SKAGGS/^{DS}STATE OFFICE

SUBJECT: TRANSFER NO. 4961

DATE: November 17, 1997

=====

Transfer 4961 adds points of diversion and changes the season and nature of use under Rights 63-03366, 63-03396 and 63-08232. The transfer reflects a total combined irrigated system with a portion of acres removed to provide sufficient water for a dairy.

Review of the information in the water right files and provided by region staff review describes the development of these three rights to irrigate 493 licensed acres. 40 acres located in the NWSE, S17 were licensed under the original right, 63-03366. These acres were included on the application because of possible lease/purchase that didn't occur according to subsequent field exams. These acres were either never developed as described or moved to a different location as claimed in the SRBA. Under A63-03366 the 40 acres appear to be moved to NWNE, S17 and are overlapped by junior Right 63-08232.

Although only 438.0 acres were verified per recent CFSA photography by region staff, the transfer is based on the reduced acres as claimed in the SRBA or 453.0 acres. Any further adjustment will be made through the adjudication investigation. The three rights prior to transfer provide 4.41 cfs, 2038.5 afa for the irrigation of 453.0 total acres. Adjustments to the final transfer recommendation have been made as reflected on the approval.

The extent of the dairy requirements were provided by the applicant and are within department standards. The total requirement identified will be 0.62 cfs, 160.0 afa for stockwater use and 40.0 af for commercial use. The number of acres required to be removed from irrigation to provide sufficient diversion volume was found to be 44.5 acres, leaving a maximum of 408.5 acres remaining irrigated acres. Each right provided a proportionate share of the dairy needs according to their associated acres in the system. (See Change in Nature of Use Evaluation.)

The applicant proposed that rate is not a limiting factor in the change and all available flow will continue to serve irrigation use and the new uses for the dairy; individual uses being non-additive. Since the licensed rate of diversion was relatively low, the concentration of flow on reduced acres will provide 0.01 cfs/acre. Evaluation of the change identifies reduction in all parameters with an equal rate of diversion; no expansion occurs.

Transfer 4961

Page 2 of 2

Season of use and diversion volume were adjusted to current standards. Recommended conditions include conditions of Stipulation for Withdrawal of Protests per region manager, irrigation overlap, multiple points of diversion, combined right and total limits, permissible place of use and standard transfer conditions.

A draft transfer approval was prepared and sent to the applicant for comment prior to forwarding for final approval.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality standards of the Department of Environmental Quality.

Water diverted and used for the dairy operation, including land application of waste water, shall satisfy federal and Idaho state laws, regulations, and standards related to water quality.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

The water right holder shall read the measuring devices at least monthly and record the volume readings from the meter on forms provided by the Department. The recorded diversions and year end totals shall be reported annually to the Department on forms provided by the Department prior to January 31 of the following year.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

The measuring devices must accumulate volume diverted, and must be constructed to prevent change of the meter reading. The meters shall also read instantaneous flow. The meters shall be calibrated when they are installed with an independent measuring device. The measuring devices must be calibrated in-line once every three years following the year of installation.

After specific notification by the Department, the right holder shall record the quantity of water diverted or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Prior to the diversion and use of water under this approval, the right holder shall comply with applicable county zoning and use ordinances.

IDAHO DEPARTMENT OF WATER RESOURCES

PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality standards of the Department of Environmental Quality.

Water diverted and used for the dairy operation, including land application of waste water, shall satisfy federal and Idaho state laws, regulations, and standards related to water quality.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

The water right holder shall read the measuring devices at least monthly and record the volume readings from the meter on forms provided by the Department. The recorded diversions and year end totals shall be reported annually to the Department on forms provided by the Department prior to January 31 of the following year.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

The measuring devices must accumulate volume diverted, and must be constructed to prevent change of the meter reading. The meters shall also read instantaneous flow. The meters shall be calibrated when they are installed with an independent measuring device. The measuring devices must be calibrated in-line once every three years following the year of installation.

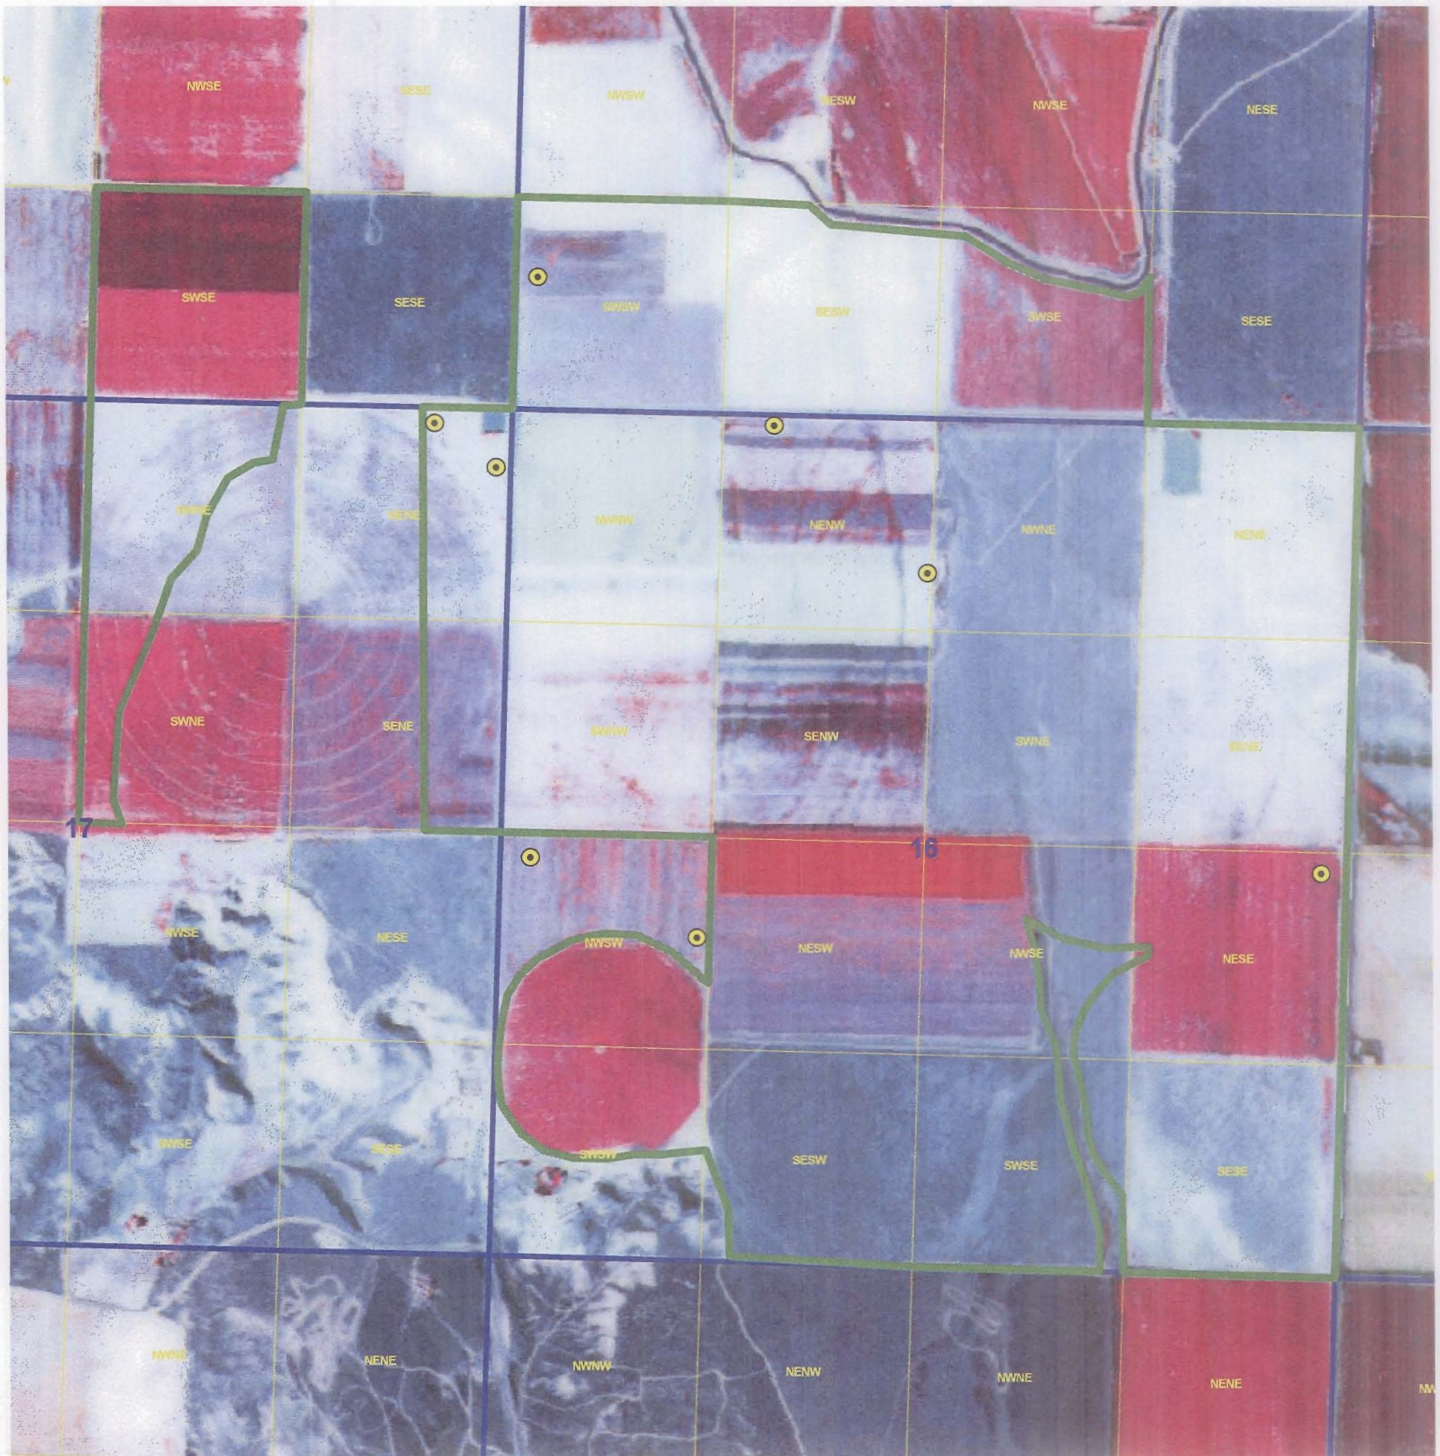

After specific notification by the Department, the right holder shall record the quantity of water diverted or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Prior to the diversion and use of water under this approval, the right holder shall comply with applicable county zoning and use ordinances.

This right is limited to the irrigation of 54.1 acres within the place of use described above in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: License

Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality standards of the Department of Environmental Quality.

Water diverted and used for the dairy operation, including land application of waste water, shall satisfy federal and Idaho state laws, regulations, and standards related to water quality.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

The water right holder shall read the measuring devices at least monthly and record the volume readings from the meter on forms provided by the Department. The recorded diversions and year end totals shall be reported annually to the Department on forms provided by the Department prior to January 31 of the following year.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

The measuring devices must accumulate volume diverted, and must be constructed to prevent change of the meter reading. The meters shall also read instantaneous flow. The meters shall be calibrated when they are installed with an independent measuring device. The measuring devices must be calibrated in-line once every three years following the year of installation.

After specific notification by the Department, the right holder shall record the quantity of water diverted or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

The right holder shall accomplish the change authorized by Transfer 71280 within one year of the date of the approval.

Prior to the diversion and use of water under this approval, the right holder shall comply with applicable county zoning and use ordinances.

Dear Water users,

Our office received your Notice of Change of Water Right Ownership for the above Water Rights. Because of the following reasons we are delaying changing the ownership. We also cannot process your new application for transfer to add a point of diversion. You may be able to modify this new transfer application if necessary to include items 3 and 6.

The legal documentation you supplied does not show your ownership of the 40 acres in T02N, R03W, S17, NESE tract.

1. If you own this property, please supply us with documentation of this ownership.
2. If you do not own this property, please supply documentation of any agreements made by you and the owner allowing you to irrigate this property.
3. If the 408.5 acres is being irrigated outside the place of use you will need to file an application for transfer to correct the place of use.
4. If you are not irrigating this property please show where the 408.5 acres of irrigation associated with this water right transfer is being used. (See enclosed photo of approved tracts and irrigated acres).
5. If this tract isn't a part of the system and no acres developed by groundwater in his tract, you may request the current owner to sign a letter of release. Stating that the system recorded in transfer 4961 doesn't irrigate his property and has no claim to irrigation developed from this transfer.
6. A transfer would then need to be filed to correct the legal description to the actual place of use. It is my understanding that you recently filed a transfer to add

a domestic well to your dairy operation. This transfer is on hold until the ownership discrepancy is corrected.

7. Lori Graves, the reviewing agent, stated that you could modify the transfer with any changes that may be necessary with no additional fees.

CHANGE OF OWNERSHIP:

If the transfer is approved, as mentioned in the cases listed in items 3 & 6, then the approved transfer will change the ownership for these rights.

If no transfer is filed, then we are required to split these rights based upon evidence of ownership as shown on your Warranty deed and prorate accordingly.

Please respond to this letter and let me know what your intentions are by February 14, 2000. If we do not hear from you we may split and prorate these rights as mentioned above.

Sincerely,

Ron Howerton
