Shaun –

Thank you for your assistance with my water right application. As we discussed, the priority date for my application should be changed to August 1, 1999. On that date we had the manufactured home on lot 1 (which my brother owned and lived in at the time), and my wife and I moved onto the property and lived in an RV while our home was being constructed. Both of us were using the well as of that date.

In addition, the parcel number for the location of the well should be changed. The correct parcel number is 0-8750-001-001-0. This is the parcel that the manufactured home sits on. I have attached the marked up map that you previously sent to demonstrate the location of the well and the 2 homes that are served by this well.

Please let me know if you need any additional information from me.
