Statement of George Miller

Subcase Nos. 73-217, 73-10065, 73-12166

In 1964, and each year until the present time (when adequate water has been available), I remember the ground indicated on the attached map (marked Exhibit A) being flood irrigated from Patterson Creek. Different sections of the property are irrigated using a series of small ditches (outside the pivot areas). The entire property has been irrigated in this fashion each year.
