1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

Point of Diversion

2. Describe the changes you wish to make in the proposed recommendation:

PD in NESW should be in NWSW. There are two wells in the NWSW. Condition #12 of transfer 5255 is correct. Explanation on recommendation should be removed.

3. Give a brief explanation as to why you disagree with these portions:

The well is actually on the west side of the quarter-quarter line and is in the NWSW

☐ I AGREE with this proposed recommendation: no changes need to be made.

CONDITIONS OF APPROVAL AND REMARKS

1. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
2. Use of water under this approval shall comply with applicable water quality standards of the Division of Environmental Quality of the Idaho Department of Health and Welfare.
3. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
4. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
5. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
6. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
7. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
8. The total instantaneous diversion of water from all points of diversion under Transfer 5255 shall not exceed 6.09 cfs, nor a total combined annual volume of 1723.9 af.
9. Rights 63-02824 and 63-03054 when combined shall not exceed a total annual maximum diversion volume of 1615.1 af at the field headgate for the irrigation of 358.9 acres.

MEMORANDUM

TO: Files 63-02824 & 63-03054
FROM: Pam Skaggs/State Office *CS*
SUBJECT: Transfer 5255
DATE: September 9, 1998

Transfer 5255 adds a point of diversion, and changes the nature and season of use under a portion of Rights 63-02824 and 63-03054. The applicant is adding a third well to the system and building a dairy on-site.

SRBA field investigation found a maximum of 390 irrigated acres under these rights instead of the licensed 400 acres. The dairy requires a reduction of 31.1 acres to provide water for commercial and stockwater uses, leaving 358.9 remaining irrigated acres. Commercial use includes the dairy barn site and all irrigated quarter-quarters for land application of wastewater from the dairy.

Season of use was adjusted to year round use at the dairy, and diversion volume was identified as current standards. Recommended conditions include drilling permit requirements, water quality, irrigation overlap, multiple points of diversion/measuring devices, combined right limits, land application limits and standard transfer conditions.

2. ☐ If present water use is other than irrigation, attach an estimate of the annual volume of water that has been consumptively used. Also, provide justification for the estimate.
3. ☒ Attach copy of design report or system design supporting required water flow rates and volumes for the new use. Describe attachment(s):

4. If water or waste will be discharged from project, describe quantity, quality and location of the discharge:

See Attachment B

5. Describe measures that will be taken to prevent impacts to other water uses and water users:

The annual consumptive use will not be changed. All waste water will be contained pursuant
to State regulations and the system design (Attachment D).

Reviewer's Memo**

Proposal

The applicants propose to change the nature and season of use for portions of two licensed rights from irrigation to year-round commercial and stockwater for a dairy. They also propose to add a well to both rights.

Volume requirements

The required volume for the proposed use was calculated based on information provided by the applicants which was in turn provided to them by the Idaho Department of Agriculture, and on IDWR standards for stock water for dairy and non-milking cows.

The proposed dairy use is assumed to be wholly consumptive. Irrigation reduction is based on the consumptive use of the original right. Consequently, the applicants must remove 34 acres from irrigation to meet the volume requirement of 117 AF/year for the new uses. This will require a reduction in flow of .32 cfs of right no. 63-02824 and .20 cfs of right no. 63-03054. Calculations are attached (M1).

Verification of use

The ASCS found irrigation of 377.8 acres based on a 1987 aerial photo. 1994 scanned airphoto (IDWR No. K-04) confirms irrigation of the place of use. An SRBA field exam was conducted on 8/31/1995. The resulting acreage calculation, based on the field exam and the ASCS photo, found 390 acres (POU review sheet attached). The acreage will be determined using GIS technology before the final SRBA recommendation is prepared.

The discrepancy between the license and the ASCS acres is 5.5%, and between the license and the SRBA exam is 2.5%. These percentages are within acceptable limits for the SRBA. However, it is clear that some QQs are not full 40 acre tracts because of roads, ponds, ditches, and buildings.

Additional well

An additional well is proposed to be utilized at the dairy. Specific well construction standards may be appropriate.

RECOMMENDATION

The acreage reduction should be based on the number of irrigated acres confirmed by the SRBA field exam (390).

**NOTICE OF PROPOSED CHANGE OF WATER RIGHT,
TRANSFER NO. 5255**

Notice is given that **BERT OR TRYNTJE DEWINKLE, DBA MOO-RIAH DAIRY**, of 3438 Lynwood, Melba, ID 83641 have applied to the Department of Water Resources to change the Nature of Use, Period of Use, and Point of Diversion pursuant to I.C. § 42-222 for the following ground water irrigation rights in T1N R2W S16, both diverted from two wells in SWNW and NWSW, Canyon County:

License 63-02924, priority 07/24/1950, 3.79 cfs.

License 63-03054, priority 06/24/1955, 2.30 cfs.

Total of 400 acres and 6.09 cfs. 63-03054 includes domestic use.

PROPOSED CHANGE

Add a well and change portion of rights to year round commercial and stock water use in NWSW. 29 acres of irrigation will be retired in NWSW. Commercial use is a dairy and land application of dairy waste water on remaining 371 acres. Stock water is for 2000 milking cows and 1820 dry cows.

Any protest against approval of the proposed change must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, ID 83705-5082, together with a protest fee of \$25 on or before May 26, 1998. The protestant must also send a copy of the protest to the applicant.

$.32 \text{ AF/day} \times 365 \text{ days} = 116.8 \text{ AF/year}$

$116.8 \text{ AF/year} \div 3.5 \text{ AF/year/acre} = 33.4 \text{ acres}$

Acreage reduction based on diversion rate:

The volume of the proposed use requires the greatest number of acres to be retired. 34 acres must be retired to offset the consumptive volume of the new use. However, land application of waste from the dairy can occur anywhere on the farm.

Reduction in cfs of existing rights

63-02824: $34 \text{ acres} \times .009475 \text{ cfs/acre} = .32 \text{ cfs}$

Re: A63-02824 & A63-03054

Dear Mr & Mrs DeWinkle:

We are currently conducting field exams in the area of Canyon County where your 400 acre farm is located. I need to complete an exam for the two water right claims referenced above that were filed by the previous owners, James & Shirley Marshall.

The purpose of my field exam is to verify the major components of the rights such as the source of water, type of usage, amount of water used and the legal description of the point of diversion and places of use. It is not mandatory that you accompany me during my field work but it would be helpful to have you or someone assist me that knows the property and water delivery system. Please call me at 208-334-2190 so that we can discuss an appointment date and who can assist me during my exam.

Sincerely,

A handwritten signature in cursive script that reads "Mel Schulte".

Dear Wateruser(s):

This office has reviewed the Notice of Change of Water Right Ownership form submitted to our office. However, due to the items checked below, we cannot continue to process this ownership change. We are returning the Notice of Change of Ownership to you to COMPLETE OR RESEARCH ONLY THE FOLLOWING ITEM(S) SHOWING A CHECKMARK IN THE BLANK FOR THAT ITEM(S).

_____ There is no existing water right in our records either under the former owner's name or for the legal description given. If, after contacting the former owner, you find more information concerning a water right, please contact us.

_____ Legal description of property. Please complete showing the legal description by 1/41/4 (40-acre tract), section, township and range for the property changing ownership. If you only have a subdivision lot & block legal description, please send us a copy of your subdivision plat map.

_____ It appears you receive your water from an irrigation district, ditch company, municipality or community water company. If this is the case, then the water right remains in the name of this entity and you should contact them concerning the ownership change.

_____ Name and address of former owner (seller). This will clarify the original owner of the water right.

_____ Name, address and phone number of new owner (purchaser).

_____ This change in ownership appears to result in a splitting of the water right. A split of the water right occurs when the ownership change affects only a portion of the original right. In order to accurately split this right we must know what portion of the right was sold. The amount of water in CFS, the place of use by 1/4 1/4 with the number of acres in each 1/41/4 (if applicable) and the point of diversion by 1/41/4, Section, Township and Range is needed. If this right is not being split, please submit proof of ownership for the remaining portion. Enclosed is a computer copy of this right for your review.

X _____ Proof of ownership is needed. This proof can be a copy of the warranty deed, sales contract or tax assessment in your name which includes a description of this property by 1/41/4, Section, Township and Range.

Signature of new owner (purchaser) is needed on this form.

X other: There was not a copy of the deed attached
as stated on the Ownership Change form.

Please complete the above item(s), if required, on the Notice of Change of Water Right Ownership form and return it with the requested information to the Department of Water Resources, Western Region Office, 2735 Airport Way, Boise, ID 83705. If we do not hear from you within 30 days, the claim upon which this form was filed(if one exists), will remain in the original owner's name.

Feel free to contact this office if you have any questions concerning this letter.

Sincerely,

Adjudication Staff
