E. NARRATIVE/REMARKS/COMMENTS

OVERLAPS: P/D Same RR, same source, different
Points of diversion

P/U Same RR, different places of use.

Approximately 96 acres of pasture is gravity irrigated with waste water. There exists two points of diversion.

A northeast corner of property, a dam collects a portion of wastewater. The water is diverted from pond by 18" stand pipe, and discharges into concrete irrigation box. Flow is controlled from irrigation box to ditch. Due to slope of ditch, only corner of pasture is irrigated by pond. Flow measurement by Cipolletti weir - 0.35 cfs.

The second point of diversion is a 4' diameter sump, located at southern point of property. Waste water is diverted from channel to sump, and then pumped to irrigation ditch. Another Cipolletti weir measurement was taken just downstream of discharge point measuring 0.56 cfs.

Since the average weir flow of 0.45 cfs is nearly the allocation requested, 0.47 cfs, and the pump capacity of 0.60 cfs being greater than the requested allocation, recommend Licensing for 0.47 cfs for irrigation of approximately 96 acres of pasture.

$$\text{Theoretical: } Q = \frac{(8.8)(0.7)(7.5)}{9 + (2.31 \times 30)} = \frac{46.2}{78.3} \approx 0.60 \text{ cfs}$$

NOLA Yeakel being first duly sworn,
deposes and says: The drain water listed on claim
63-4573 & the ground water listed on claim 63-4574
have been used for irrigation of the acres claimed
since 1941. I have knowledge of this because
my late husband & I lived in the Parma
area since the late 1920's. I have knowledge
that these properties were irrigated during
those times. We owned said properties

MEMORANDUM

TO: ADJUDICATION FILES 63-4573

FROM: DANIEL A. NELSON

DATE: 11/10/06

SUBJECT: CLAIM FIELD EXAM NARRATIVE

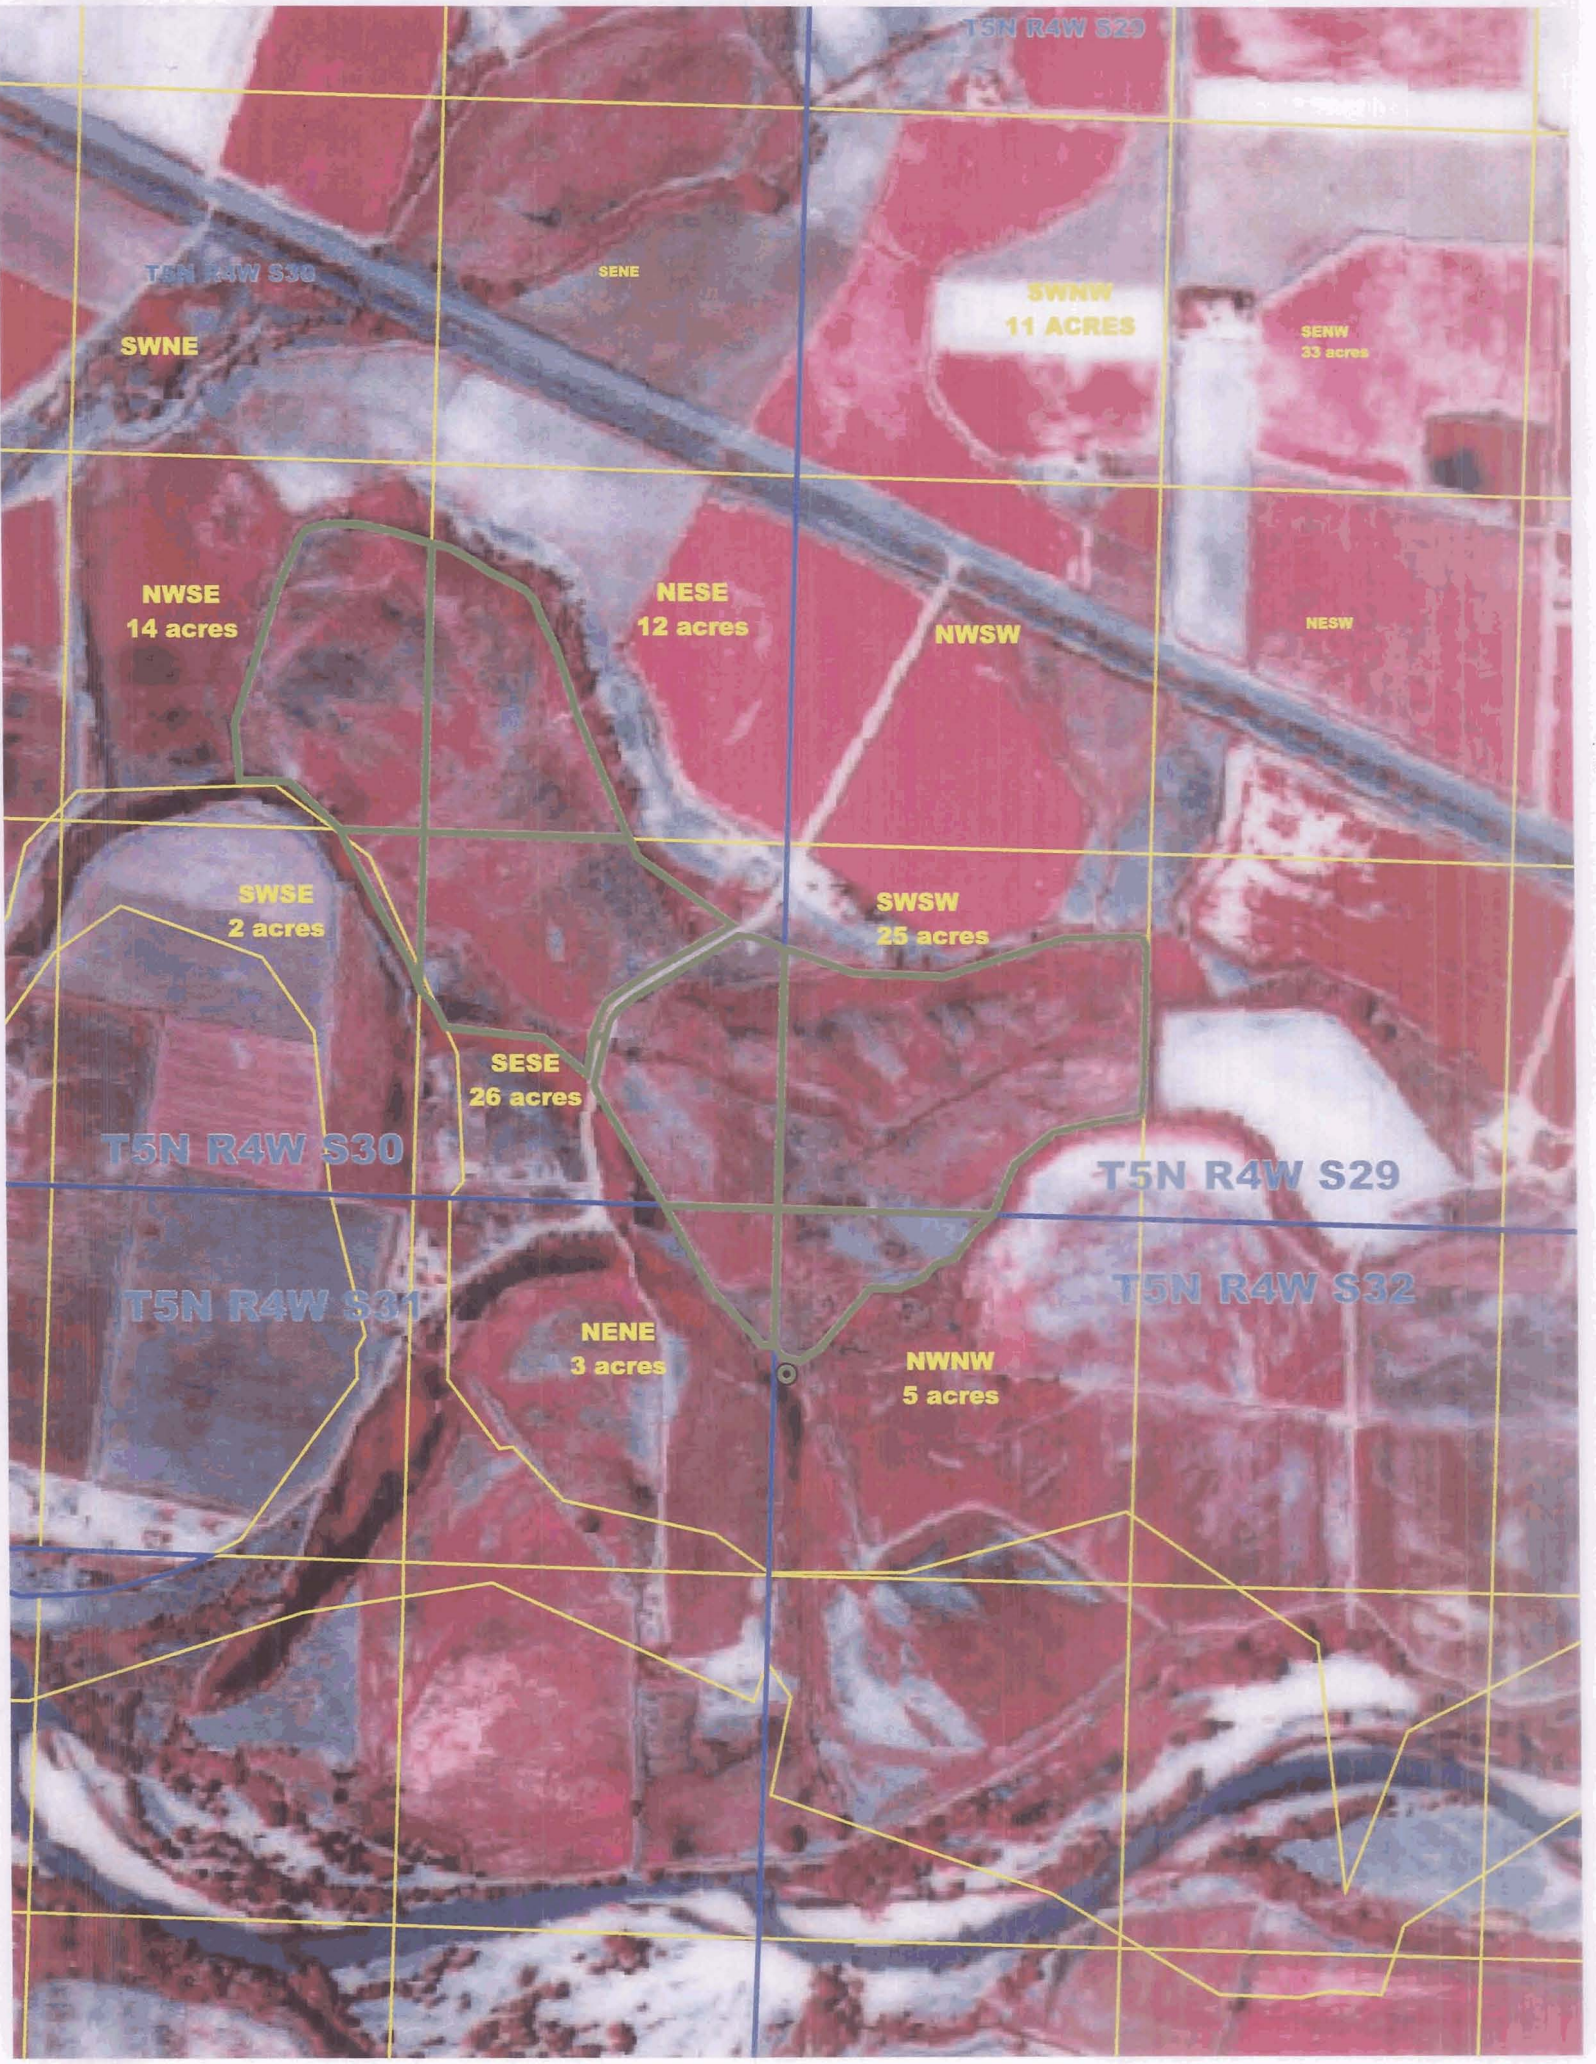

On 11/7/2006 I performed a field exam on this claim. The water is diverted from an unnamed drain into a ditch system that irrigates 87 acres. No water from this drain is diverted to the northern fields running along the railroad tracks. Water from the well under right 63-4574 and Boise Coop water can be diverted through the ditch system to irrigate these fields.

I performed a theoretical calculation on the pump and found that it has the capacity to divert 2.49 cfs. However, the diversion rate should be limited to the standard inch or 0.02 cfs per acre for a total of 1.74 cfs. I suggest that this claim be recommended as follows:

1.74 cfs for irrigation of 87 acres from 3/1 to 11/15

25 acres in the SWSW S29	12 acres in the NESE S30	14 acres in the NWSE S30
2 acres in the SWSE S30	26 acres in the SESE S30	3 acres in the NENE S31
5 acres in the NWNW S32	<i>Not claimed</i>	

With the condition that Boise Coop water is also used on this ground.
