AFFIDAVIT

State of Idaho)
County of Canyon)

deposes and says: We, Robert K. Stephens and Linda J. Stephens, would like to amend the date previously filed through Idaho Department of Water Resources. Since our prior filing in 1990, we have found a county document that verifies the original homestead date of our property. The attached document states 1865 as this date. Therefore, we feel that 1875 would be a legitimate priority date, supported by historical records.

Robert K. Stephens Linda J. Stephens

(dam)

J. B. McLaughlin,
locator

To the Public,

Know all men by these presents: that I, J. B. McLaughlin, do hereby give notice, that on the first day of July 1863, I located & settled upon & claimed One Hundred & sixty acres of land for agricultural & grazing purposes, being a part of the unreserved Public Lands of the United States in the County of Ada, & Territory of Idaho, the same being located near alt Fort Boise at the ferry in Ada Co. I. T. & bounded & described as follows, to-wit:

Commencing at a certain stake on the bank of Snake river, run thence East one half mile, thence South one half mile, thence West one half mile, thence North meandering Snake river one half mile, to place of beginning containing One hundred & sixty acres of land. And further, that I claim the foregoing described One Hundred & sixty acres of land as a Homestead under the laws of the United States & of the Territory of Idaho, & further that I do hereby claim said land under an act of the Legislature of Idaho Territory entitled "An act prescribing the mode of maintaining & defending possessory actions on the public lands in the Territory of Idaho."

J. B. McLaughlin.

Territory of Idaho }
County of Ada }

I, the said J. B. McLaughlin, being first duly sworn say that I am a citizen of the United States & that the above described claim does not comprise more than One Hundred & sixty acres of land, & that I hold no other claim under the provisions of the said Act prescribing the mode of maintaining & defending possessory actions on the Public Lands in the Territory of Idaho & that to the best of my information & belief no part of said land is claimed under any existing adverse title.

In witness whereof, I have hereunto set my hand this 14th day of November 1865.

J. B. McLaughlin

Subscribed & sworn to before me this 14th day of November 1865.

Wm. H. Yates

Recorder

FIELD EXAM MEMO

DATE: 6/9/2006

TO: Dan Nelson

FR: Lori Graves

RE: A63-4833

Dan, the original statutory claim and SRBA claim indicate two p/ds in the NESE S20, however their maps only show one. The map returned by the claimant with his proof of priority only indicates one p/d used.

Items needed for the above claim include:

1. P/d verification
2. System capacity
3. System diagram
4. Acres irrigated in 1987
5. Stock number in 1987

Thanks Dan.

ADDITIONAL INFORMATION NEEDED FOR IRRIGATION FIELD EXAMS

Field Examiners, please complete the following checklist. Mark "unknown" or N/A if information doesn't apply or information is unavailable.

IF CURRENT OWNER DOES NOT MATCH PROOF REPORT PLEASE GIVE NEW OWNER CHANGE OF OWNERSHIP FORM TO COMPLETE.

Shades Files are in Awoo common -

1.) Pump information:

DAN FX - STEPHENS 4833

Well or Diversion Identification No.*	Motor Make	Hp	Motor Serial No.	Pump Make	Pump Serial No. or Discharge Size
<i>GRAVITY SYSTEM</i>	<i>NONE</i>	<i>N/A</i>	<i>N/A</i>	<i>N/A</i>	<i>N/A</i>
<i>DITCH PUMP</i>	<i>TRACTOR</i>	<i>55</i>	<i>VARIES UNKNOWN</i>	<i>BERKELEY</i>	<i>4 inch</i>

2.) Lift (distance from pump to water) *3 FT*

3.) How was lift determined (well log, measurement, owner)? *MEASUREMENT*

4.) Pressure against pump (this is checked using the owner's psi gauge, your gauge, or an estimate by owner) *ESTIMATE*

YES

5.) Was a measurement made? *NO* If no can a measurement be made at a latter time? *NO YES FOR GRAVITY, NO FOR PUMP.*

Pygmy meter - Gravity

6.) What type of measurement device was used? *THEORETICAL PUMP*

7.) Is there a pump curve available for pump? *NO*

8.) Please fill out the following:

Number of sprinklers *N/A*

Sprinkler nozzle size *N/A*

Number of Pivots (include gpm rating for each pivot) *N/A*

ALL DITCHES and gated pipe

9.) Please outline all acres irrigated on attached aerial photo. ✓ DONE

10.) Please clearly mark all points of diversion on map and GPS. ✓ DONE

11.) Please clearly mark all mainlines, ditches, and other conveyances.

✓ DONE

12.) Pictures taken of place of use and point of diversion. ✓ DONE

13.) Please show where and how water from other sources are diverted into the irrigation system.

FIELD EXAMINERS NOTES (descriptions, other uses, questions, ect.)

This system diverts water from sand
Hollow Creek to a small sediment pond
From the pond, the water can go in
two directions. The main direction is
through a head gate on the west end of the
pond that feeds a mainline that open discharges
into a cement ditch. This system was in
use and was measured with a pygmy meter
at 2.04 cfs. The second less used direction
is through a pump in the pond. The pump
diverts the water up to a gated pipe that irrigates
the south field in the nose, or to the top of property
where it can irrigate everything. The pump
wasn't operational, but the theoretical calculation
shows a rate of 0.90 cfs. There is a possibility
that the owner could use both systems for a maximum
capacity of 2.94 cfs. However, only 69.9 acres
are irrigated, so this system should be limited to
0.02 cfs/acre or 1.40 cfs and 4.5 gfa per acre or 314.6 gfa.

The water from this claim is diverted from Sand Hollow Creek in the NESE into a small pond. In the pond the water can be pumped to the fields in the NESE and NWSE through a series of mainlines, gated pipe, and cement ditches. The water can also be gravity fed through another mainline that supplies a cement ditch that irrigates the field in the NESW and SESW. Farmers Coop water enters the property in the NESE and can be used on the entire property. The mainlines and gated pipe are designated in blue and black, and the cement ditches are designated in solid blue.

GROUNDWATER THEORETICAL ANNALYSIS

FILE: 63-4833

DATE: 6-19-06

BY: DAN Nelson

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8 \times (HP) \times (EFF.))}{TDH}$

Q = CFS

HP = Total Brake Horsepower of pumping plant (including booster)

Eff. = Pumping plant efficiency (assume 70% or 0.70)

TDH = Total dynamic head = [(LIFT) + (PSI X 2.31)]

LIFT = Depth to water in FEET from land surface to pumping water level

PSI = Pumping pressure measured in PSI near pump (if open discharge assume [0])

$(8.8) \times (55HP) \times (0.70) = 33.88$
 Q = _____ = 0.90 cfs

$[(3FT) + (15 \times 2.31)] = 37.65$

BERKLEY PUMP

REMARKS: This pump is used to deliver water to upper end of this system. The lift was measured, and the owner uses a 55 HP TRACTOR to operate the pump. The pump lifts the water approximately 10-20 feet in elevation and open discharges it into a cement ditch on gated pipe. With the discharge pressure and head loss an estimate of 15 psi seems reasonable.

DAM

CULVERT

The first picture shows the diversion of Sand Hollow Creek. There is a dam in the creek and an open culvert. There is no headgate on this culvert. This culvert sends the water to a small sediment pond.

PUMP

OVERFLOW
CULVERT

The second picture shows the small sediment pond. The water comes into the pond by at one end and is diverted through the gravity system at the other. There is an overflow culvert to send the water back into the creek if it isn't being used.

HEADGATE
TO DITCH

The bottom picture is of the pump used in this pond. The pump is located approximately in the middle of the pond. It feeds a main line and gated pipe in the upper fields.

RE: EVIDENCE OF PRIORITY
Snake River Basin Claim No: A63-4833

Dear Claimants,

In the past, you submitted the above referenced claim during the Snake River Basin Adjudication (SRBA) claims taking. Enclosed is a computer generated print-out of the claim for your reference only, it is not necessary to return this print-out. You indicated, when this claim was filed, that the water right was based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by historical use of the water for a beneficial use purpose, dating back to the time the water was first used; this date being the "Priority Date" as shown on the enclosed print-out. Your claim has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is required to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary, along with examples of types of evidence that can be submitted to fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled **"What Kind of Evidence is Required"** and **"Some Examples of Documents Which May Be Evidence of the Priority Date."**

It is important that each element of the Notice of Claim be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the SRBA court for decree. This could jeopardize your water use under this right if water availability problems arise in the future.

In addition, since it is our goal to decree the historical water right within the Snake River Basin as accurately as possible, an accurate location of your diversion(s) and acres irrigated needs to be identified on the attached aerial photo. Please note that the original claim indicates there are two points of diversion from the Sand Hollow Creek. Please also provide as much detail about your diversion works as possible such as pump(s) make and serial number, horsepower, operating pressure, lift to acres (in feet), etc.

Page 2

If additional information is needed, we may be contacting you in the near future to schedule a field exam.

The above requested information needs to be submitted by May 1, 2006. Please let me know if you may not be able to submit the information or have any questions not covered by this letter and the enclosed pamphlet, by the date indicated above.

Respectfully,

A handwritten signature in black ink, appearing to read "Lori Graves". The signature is fluid and cursive, with the first name "Lori" and last name "Graves" clearly distinguishable.

Lori Graves
Sr. Water Resource Agent
