SYSTEM DESCRIPTION: DESCRIBED BELOW (X), SEE LICENSE FILE (), OR SEE ATTACHMENT ()

Well, 15 HP ~~amp~~ pump (assumed), 15 HP Holloshoft motor, serial no. 3292054, 3 phase 60 cycle. Power meter no. 650. Well is of unknown depth, located at the base of a lava bench. 8" pipe goes underground to the north approx. 500', ~~and~~ empties into an open ditch. The ditch runs north along the north edge of the field in S.14, NESW. The main ditch turns southward along the east edge of the same field, then turns west along the line between NESW & SESW, then turns south west along the north west edge of the field in S.14, SESW. The ditch ends in a swampy area which evolves into a pond to the west. Flood

NOTES: 10/20/1995: Tap attached to claim shows one field to the south which is not irrigated with well water. The fields in the E 1/2 SW 1/4 are irrigated with well water & supplemented w/ dead water on occasion. ~~Kansas~~ Lands to the west of the first pond (w line g SE SW) are irrigated primarily w/ IRB District H₂O, but well water can be ditched directly to this pond & ~~left~~ relifted to fields to west & north. Claimant contact req'd to determine when these ponds (2nd one to west) + pumps were installed. ~~IRB~~ Pond also catches wastewater to be pumped onto fields to west & northy as a supplemental source.

01/03/1996: As per tel. conversation on 11/06/1995 w/ claimant, well water is used on E 1/2 g SW 1/4 only. Not enough water to reach any further. Ponds fill w/ wastewater from claimed fields & above, and that wastewater is what is lifted to other fields. This wastewater is carried in a separate ditch than the irrigation district water. Only well water is used on the claimed acres. 777

MANNING EQUATION CHANNEL CAPACITY RESULTS

10-20-1995

File Number: A63-21297

Claimant: M. James

Channel measured: Main ditch

Date of measurement: 09/29/1995

Measurement location:

T01S, R02W S.14 NE5W

Calculation prepared by: M. Minicucci

Comments about the measurement:

Measurements on main ditch after one small lateral has branched off.

The results of the calculation are:

The length of the channel measured is 478 feet.

The upstream and downstream rod readings are 5.50 and 6.36 feet.

The channel cross section is 3.30 ft-sq.

The wetted perimeter is 5.12 feet.

The hydraulic radius is 0.64 feet.

The slope is 0.0018

The roughness coefficient is 0.0900

The flow velocity is 0.524 ft/sec.

The rate of flow is 1.73 cfs.

RE: Notice of Claim to a Water Right No. A63-21297

Dear Ms. James:

This letter is a request for information about the delivery system for the water from the well described in the above-referenced claim. Based on a field exam conducted September 29, 1995, the water from the well is used to irrigate more acres than were claimed in the Snake River Basin Adjudication.

At this time IDWR requests that you provide the date the relift ponds and pumps were installed, and some evidence to support that date. The evidence may be receipts for the pumps or an affidavit from a person with personal knowledge of when the relift ponds were first used with well water.

Once this date is established, the next appropriate step can be taken. Possible avenues are to add the acres to the existing claim, file another claim that reflects a different priority date, or file an application for permit. Which avenue is appropriate will depend on when the ponds and pumps were installed.

Please submit the requested information by November 24, 1995. If no response from this letter is received, the water right for well water on the fields beyond the first relift pond will not be covered by any filing with IDWR, and will not be recommended to the court for decree.

If you have any questions about this letter please do not hesitate to contact me at the address and/or telephone number at the top of this letter.

Sincerely,

Maria Minicucci
Sr. Water Agent, Adjudication Bureau

11/06/1995: Mrs. James called to tell me that the only water lifted out of ponds is wastewater. No well water is used beyond the first fields east of the first pond. I told Mrs. James to disregard this letter. TM

agriculture with the first use for such purposes being made in March, 1950.
Irrigation of the land as described under SRBA adjudication claim A63-21297
in the amount of 30 acres was initiated on that date and the land has been
irrigated more or less constantly to the present. There has not been any
significant period of non-use of this water for irrigation since 1950.

deposes and says: That I have personal knowledge that a well was drilled in
the NW/4 SE/4, Sec. 14, T1S, R2W, and that the surrounding property was
irrigated from the well on or about 1950. I have been a frequent visitor to
the property and have personally witnessed the irrigation of this land since
the early 1950's. Based on my frequent visits to the area, it is my opinion
that the well has been in more or less constant use since that period.

Re: Claim No(s). A63-21297

Dear Claimant(s):

In the past, you submitted the above referenced claim(s) in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim(s) for your reference only; this print-out is **NOT** to be returned or re-filed. You have indicated when this claim was filed that the water right(s) was based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water. Any other claims you may have filed, that are not listed above, do not require evidence of priority be submitted at this time.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary along with examples of types of evidence that can be submitted to fulfill this requirement. If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the Court for decree. This could jeopardize your water use under this right(s), if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify claims in this area are now being conducted by Department personnel. Please contact this office as soon as possible to schedule a field exam appointment convenient for you.

The required evidence supporting the priority date(s) must be submitted by September 1 1995, referencing all documents with the corresponding claim number(s). If you have any questions not covered by this letter, or the enclosed pamphlet, please call the Western Region office shown above.
