Case No. 39576	)
	) SPECIAL MASTER REPORT
_____	)

Findings of Fact

The Director of the Idaho Department of Water Resources filed his *Part I Director's Report, Reporting Area 23, IDWR Basin 74* on January 23, 2006. The Director recommended the above claims for between .02 cfs and 8.32 cfs from various creeks, springs, streams, the Lemhi River, wastewater and groundwater – some for year-'round stockwater use (or from March 15 to November 15) – and to irrigate between 1 acre and 908 acres in Lemhi County from March 15 to November 15 (or April 1 to November 1) with priority dates between May 1, 1868, and June 19, 1982, based on a decree, license or beneficial use.

SRBA Court records indicate none of the Director's recommendations of the above 102 claims were objected to, but the claims were held because they were identified as related to "high flow" claims.

On January 14, 2011, the Special Master entered a *Report and Recommendation* in the 294 "high flow" claims concluding those claims have no legal basis and should be denied. Instead, the Special Master recommended that a general provision govern all valid rights to divert surface water for irrigation use within the Lemhi Basin allowing the continued diversion of high flows during the pre-irrigation and post-irrigation seasons. Hence, there is no reason why the above 102 claims should not be decreed now.

Conclusions of Law

Claimants of the above 102 claims are entitled to partial decrees adjudicating water rights as recommended by IDWR and as described in the attached *Special Master Recommendations for Partial Decrees for Water Rights*.

DATED March 4, 2011.

TERRENCE A. DOLAN
Special Master
