Andy,

What a surprise to hear from you. Congradulations on your retirement and your strength to return to St. Maries. You must really enjoy hunting and fishing. I can think of no other reason to move back to that area.

I learned from you that the area where my parents built their home is known as Meadowhurst. I assume this is the same house on the hill just past the airport. They referred to that area as Bulter Bay. I believed they sold all of their 10 or 11 acres to a man by the name of Schlappe, so I am a little confused about just what ground you did purchase.

I believe they started excavating late in 1963, then started pounding nails in 1964. They built as they could afford it, and I know they didn't get it finished that year. They lived in the unfinished basement in 1965, so probably finished it in 1966. I do not know when they applied for water rights, so I can be of no help there.

I have kept up with no one from St. Maries, so I can tell you nothing about what has happened there in the last 45 + years. If you know anything of interest I would be happy to hear.

If I can be of any further help send another message. I don't access email daily but will reply when I read my messages.

When you talk to Daryl tell her thanks for giving you my email address.

Linda: Several years ago we purchased some land from your parents next to their house in Meadowhurst.

We are filing for the water rights for the spring. Do you know the year your parents built the house on the hill at Meadowhurst?

I got your email address from Daryl Hartnett.

Thanks for your help.

Andy Resor

I retired from Boeing and Lezle and I divide our time between Renton, Wa. and St. Maries..
