RE: Letter of 5/9/2008

Date: May 21, 2008

*see in T. 13755
file*

.....

Norm Batt contacted me and we discussed the letter I sent on May 9, 2008. He stated that he was not aware that the water right from a well on property owned by him was not his property to "move" around where ever he wanted to use it. He also stated that the well and water right under 63-11700 had been sold with the property. We discussed the expansion issue and he is going to look into this further.

He requested a copy of Claim 63-4428 filed in the SRBA and a listing of consultants that he could discuss this matter with. I have mailed the requested information to Mr. Batt this day, along with the map I had prepared showing the overlap between 63-11700 and Recommendation of Rt. 63-4428.

- ~~4.~~ 4. X27 This right is limited to the irrigation of 188.5 acres within the place of use described above in a single irrigation season.
5. R27 This right when combined with all other rights shall provide no more than 4.5 afa per acre for irrigation of the lands above.
6. WB7 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor exceed a combined annual maximum diversion volume of 848 af at the field headgate for the 188.5 acres authorized to be irrigated under this right.

Comments:

1. skeen 11/15/2001 Licensing Review

Comment: Licensing review and data entry by S. Keen on 11/15/2001. No point of diversion overlaps. Besides Wilder Irrigation District, the only place of use overlap is statutory claim 63-4428, which is discussed in the beneficial use field report.

2. skeen 11/15/2001 Place of use description

Comment: I used Treasure Valley aerial photography from 2000 to heads up digitize the place of use. I came up with 261 acres, as did the field examiner, but they are distributed a bit differently than he recommended.

E. NARRATIVE/REMARKS/COMMENTS

The water for this permit is drawn from a well located in the SESE of S9. The water then travels west across a cement ditch in a mainline. After the mainline crosses the ditch it goes underground to a 4-ft culvert used to distribute the water. At the culvert the water can be turned into the culvert or continue on in the mainline to the Golden Gate canal. The water in the culvert can go in two directions.

The first direction the water travels from the culvert is south to another buried mainline that travels east and west. The water can then be sent west to the Golden Gate canal or east to the cement ditch that the mainline crosses over. The water in the ditch irrigates the fields north of the well in section 9 and one field northwest of the well. The mainline continues past the ditch to another ditch approximately ¼ mile east of the main ditch. This ditch irrigates a field east of the pump.

MICROFILMED

FEB 8 2002

63-11700

The second direction the water from the culvert travels is east to a re-lift pump. The re-lift pump sends the water south across the road to a cement ditch that irrigates the fields in NE ¼ of section 16.

OVERLAPPING WATER RIGHTS:

Statutory claim 63-04428 overlaps the place of use in the SE ¼ of Section 9. This is a statutory claim and has not been reviewed by departmental personnel. This statutory claim exchanges water from a well in the NWNW Section 23 with the Wilder Irrigation District in exchange for increased canal shares on this ground. This statutory claim should not interfere with this permit, since this permit lists the overlapping acres in a permissible place of use. When the statutory claim and this permit are combined there are fewer acres that can be irrigated from groundwater than the acres described in the permissible place of use. The statutory claim does not allow for a full inch per acre, so this permit could also be used on the lands described by the statutory claim as a supplemental source. Therefore, in water short years there still will not be enough water to irrigate the entire 260.9 acres in the permissible place of use. However, the applicants should not be allowed to divert 63-04428 from the well listed on this permit without a filing a transfer.

The applicant has also filed an application for permit that will cover the leftover acres. This application is currently on hold due to the Basin 63 processing delay. If the processing delay is lifted this permit will be able to cover the acres not covered under this permit or the statutory claim.

RECOMMENDATIONS:

I recommend that this permit be licensed as a supplemental right to Wilder Irrigation district water and statutory claim 63-04428. The diversion rate should be 3.77 cfs with an annual volume of 848 afa for 188.5 acres within the permissible place of use of 260.9 acres described above. When combined with canal shares and all other rights this permit should be limited to a diversion rate of .02 cfs per acre and an annual volume of 4.5 afa per acre. This is a supplemental right and all available surface water including the water associated with statutory claim 63-4428 should be used first before using the groundwater associated with this right.

Have conditions of permit approval been met? ☒ yes* ☐ no

* This is an open discharge well, so power records and a PCC could be used to measure and monitor the well.

F. FLOW CALCULATIONSYES Additional Computation Sheets Attached

Measured Method:

Theoretical calculations show 3.82 cfs being diverted. The permit limits the diversion rate to 3.77 cfs.

3.77 cfs will be used for the diversion rate**G. VOLUME CALCULATIONS**

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = (188.5) \times (4.5) = 848.25 \text{ afa}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = (3.77) \times (260) \times (1.9835) = 1944.23 \text{ afa}$$

Section 42-225a, Idaho Code

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

Notice is hereby given that Wendell Batt (name of claimant)
of Route 1 Wilder, ID 83676, claims a right to the diversion and beneficial use of
(mailing address)
the public water of the State of Idaho

The extent and nature of said claim is as follows:

- (1) Describe source of water: (name of stream, lake, spring, etc., or ground water) _____
groundwater, tributary to, _____
- (2) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed: _____
