Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

- (1) Date of priority: (When was the water first applied to a beneficial use) first documented use - 1934

A claim is not acceptable on a ground water source with a priority later than March 25, 1963 or on a surface water source with a priority later than May 20, 1971. An exception is that a claim may be filed on single family domestic use from a ground water source.

- (2) Describe the source of water: (Name of stream, lake, spring, etc., or ground water)

Horrace Creek tributary to Boise River

- (3) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

I, Fern Corning, do attest that during the years ~~1930~~^{1934 F.C.} to 1936 my father, Frank Hunt, did divert surface water from the SW 1/4 of the NE 1/4 of Sec. 30, T 4 N, Range 3 W of the Boise Meridian, Canyon County, Idaho, to irrigate approximately 23 acres of pasture in the same SW 1/4 of the NE 1/4 of Sec. 30, T 4 N, Range 3 W of the Boise Meridian, Canyon County, Idaho.

In 1951, I, Don Gussman, did purchase approximately 23 acres in the SW 1/4 of the NE 1/4 of Sec. 30, T 4 N, R 3 W of the Boise Meridian, Canyon County, Idaho.

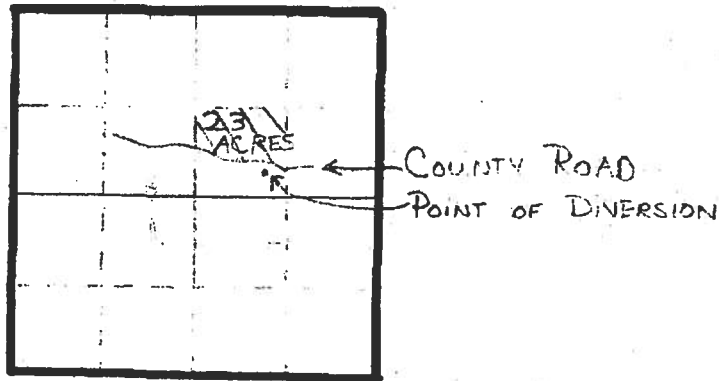

To the best of my knowledge, for many years before 1951 and continuously since 1951, surface water with a point of diversion in the same SW 1/4 of the NE 1/4 of Sec. 30, T 4 N, R 3 W, has been used to irrigate the above-named 23-acre parcel of land.

NARRATIVE/REMARKS/COMMENTS

Supplemental water is Pioneer Irrigation District (if drought conditions or excessive use up stream causing low or no flow during high temperature time periods). Pioneer Irrigation can be diverted from east to concrete ditch.

Stockwater: 7 horses currently; 20 horses in 1987, but reduced number due to Robert + his father getting older + it becoming harder to take care of so many (plus additional cost to maintain ie vet bills).

Newly excavated unnamed drain with "high sediment" + very soft floor not allowing physical measurement (I kept sinking). Average width 4', average depth 1'. Flow w/orange for a 10' section was 3 seconds. (Bucket measurement taken + Piff flow) * See attachments

Chart shows: 14" @ 5.34 cfs and 16" diameter pipe maximum capacity @ 6.98 cfs

***Pipe is usually full or overflowing in January or during high run-off (springs along ditch add to flow)

See attached Pipe Flow Computation Spreadsheet, calculated maximum flow at 6.155 = **6.16 cfs**

Bucket Measurement Pipe Inside Concrete Head Gate:

5 gallon x 60 seconds / 0.5 second = 600 gpm x 0.00223cfs = 1.338 = **1.34 cfs**

***This was the only available method of measurement at the present time, due to excessive sediment in the water, and not being able to stand in the ditch above the POD without sinking deep into the mud (the ditch had been excavated to clean out vegetation and floor was not firm)

Irrigation:

Stockwater:

Table 1 Recommended Diversion Rates for Stockwater 0 - 25 horses = 0.02 cfs

Stock: 7 horses now; 20 horses in 1987

Season: 1/1 - 12/31 = 365 days

Required V.i.r. = (#head x gallons/day/head x days of use per year) / 325,850 =

NOW: (7 x 12 x 365 / 325,850 = 30660/325,850 = 0.09 afa = **0.1afa**

CONVERSATION MEMORANDUM

**RE: Snake River Basin Adjudication Water Right Nos. A63-4689
Evidence of Priority for the additional 25 acres claimed in the SRBA**

April 4, 2006

Since the water right file contains two affidavits, one written by Fern Corning and the other by Donald Gussman, that substantiate the claimed 1934 priority date for the 23.0 acres of irrigation in the SWNE, S30 only; I requested additional evidence for the 20.0 acres in the NENW and the 5.0 acres in the SENW.

Rob Greenfield called in response to the evidence of priority letter. He will find someone, perhaps a neighbor, to fill-out an affidavit for the other 25.0 acres.

RE: EVIDENCE OF PRIORITY

Snake River Basin Claim No(s): A63-4689

Dear Claimants,

In the past, you submitted the above referenced claim(s) during the Snake River Basin Adjudication (SRBA) claims taking. Enclosed is a computer generated print-out of the claim(s) for your reference only, it is not necessary to return this print-out. You indicated, when this claim was filed, that the water right(s) was based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by historical use of the water for a beneficial use purpose, dating back to the time the water was first used; this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is required to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary, along with examples of types of evidence that can be submitted to fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled. **"What Kind of Evidence is Required"** and **"Some Examples of Documents Which May Be Evidence of the Priority Date."**

It is important that each element of the Notice of Claim be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the SRBA court for decree. This could jeopardize your water use under this right(s) if water availability problems arise in the future.

The required evidence supporting the priority date(s) requested needs to be submitted by April 18, 2006^{**}. Please let me know if you may not be able to submit proof of priority or have any questions not covered by this letter and the enclosed pamphlet, by the date indicated above.

In addition, since it is our goal to decree the historical water right within the Snake River Basin as accurately as possible, field exams are now being conducted by Department water resource agents to verify claims in this area. In the near future, you will be receiving a call from us in order to set-up an appointment for a field exam.

****** Your water right file contains two affidavits, one written by Fern Corning and the other by Donald Gussman, that substantiate the 1934 priority date for the 23.0 acres of irrigation in the SWNE, Sec. 30. However, this claim is for 48.0 acres. The 20.0 acres in the NENW and the 5.0 acres in the SENW require evidence of priority.

Respectfully Submitted,
