NOTE: Wilder Irrigation is the main source with a head gate to the south of the POD. POD for 63-02857 is only a supplemental source that is co-mingles with Wilder Irrigation, except for the field north of 17553 Van Slyke (by the tower in the picture) where for this field it is the sole source. **Main Source of Water Supply for irrigation is: Wilder Irrigation (ground water that is supplemental to surface water "implied permitted volume"**

63-3390: 325' deep well, 12" casing, 60 Hp GE turbine pump, model #5k6266xc641, 8" discharge

NOTE: Wilder Irrigation is the main source, with 63-3390 POD being only a supplemental source that is co-mingled. **Main Source of Water Supply for irrigation**

is: Wilder Irrigation (ground water that is supplemental to surface water “implied permitted volume”

63-20568: 25 Hp pump, 20' lift, 4 “ discharge, co-mingles with Wilder Irrigation, and has never run by itself since there has never been enough water. *******Pump has not been used for 10 years, since it has been covered with mud. The only source used has been Wilder Irrigation.**

Delivery System Narrative:

63-04761: 1 ¼” discharge to 1 ¼” buried PVC south to domestic home at 17553 Van Slyke Rd. (internal/external use), 1 ¼” buried PVC east to shop (1 restroom), and nozzle outside shop for commercial use (filling tanks for spraying rigs).

NOTE: Howard Van Slyke indicated on 9/22/06 that they spray **all** of their root crop fields with this system on a rotating basis (picture of spray rig was taken at POU WR# 63-3390, which is located southeast of this WR on Homedale Rd). They no longer have any livestock (previously 500 head), and requested that item be removed.

(b) Glen Mossel’s 2295 A.P. Rd. Wilder house: 1 ½” discharge to buried 1 ½” PVC to house (internal/external use for immediate yard and garden area only). NOTE: Not used for any irrigation purposes or as supplemental water to irrigation system.

NOTE:(2-POUs with 2 different owners and locations) (a) 17491 Van Slyke Rd, Wilder, Idaho 83676 (need to verify location), and (b) Glen Mossel 2295 A.P. Rd., Wilder, Idaho 83676 (T3N, R4W, Sec 5, SWNW). Recommend a split. Property south of Mossel’s house is still owned by Van Slykes. No longer have any livestock, and requested that “stockwater” be removed from this WR.

63-02857: 8” discharge to buried 8” PVC running directly west to east to the top of the hill where the tower is, then 3” aluminum hand line, 1/8” nozzles. Or the well open

discharges directly south then turns east to a pond where it co-mingles with Wilder Irrigation, is piped to a holding tank to the south through 8" PVC buried (directly in northwest of 17491 Van Slyke Rd (Howard's mom's house) where it is pumped via (2)-50 Hp Berkeley booster pumps, each with 4" discharge, 2' lift, 40 psi, pumped to the field located south of the house (17491 Van Slyke Rd) through buried 6" PVC that reduces down to 4" PVC. 3" aluminum hand line runs east and west, (200) 1/8" nozzles run at one time.

Along the north boarder, there are both aluminum pipe to transport water, and concrete ditches (which can be used to gravity flow north to south with 1" siphon tubes, or hook up 3" hand line on the aluminum pipe, with (200) 1/8" nozzles that run at one time).

NOTE: Wilder Irrigation is the main source with a head gate to the south of the POD. POD for 63-02857 is only a supplemental source that is co-mingles with Wilder Irrigation, except for the field north of 17553 Van Slyke (by the tower in the picture) where for this field it is the sole source. These fields are sprayed with the spray rigs mentioned in WR# 63-04761. Mr. Slyke stated that these have always been the acres they have irrigated with this system.

63-3390: well (secondary source) open discharges into a holding pond. Wilder Irrigation (main source) also open discharges water into the same holding pond (pipe located on south end of pond). There is an overflow in the holding pond that routes water back to Wilder Irrigation. There are 2 Berkley booster pumps, both with 4" discharge, #1 Booster Pump (30 Hp) pumps water to the north where there is a control valve, then buried 4" PVC with risers run west to east along the north property line to attach 3" aluminum hand line (running north to south) with 1/8" nozzles (110 nozzles run at one time). This mainline was installed over 15 years ago with hand line and wheel line being the sole sources prior to the pivot being installed. #2 Booster Pump (40 Hp) pumps through 6" buried PVC to the Pivot, average 80psi, with regulator on the pivot to control the pressure over the hill. 6 towers, with a big gun on the end.

NOTE: Mr. Van Slyke stated that the acres indicated on the map have always been the acres they have irrigated. The Pivot was installed in the Fall of 1993, and prior to that they irrigated the system with the same mainline they have running across the north boarder (runs west to east) with some branching off to wheel line and hand line. The sprayer rig in the photograph was spraying at this POU. Mr. Van Slyke stated that they rotate around the field (this commercial use originated from WR# 63-04761). Wilder Irrigation is the primary source for this system, with groundwater being supplemental.

63-20568:

Recommend disallowing this WR due to the system not being used for the past 10 years, and Wilder Irrigation having been the sole source.

Requests:

*Please verify **all the elements** of these rights along with finding out about some issues on licenses **63-2857**, **63-3390** and how **63-9132** relates to **63-4761**.

In addition, please verify:

- GPS the location of the diversion points.
- For right 63-2857 a domestic use is claimed but I cannot find a house to attach it to. Please find out where the house under this right is located. I have attached a layout of the irrigation place of use and the point of diversion for you to draw the location of the house on. Also please ask if there is a lawn associated with the house that is irrigated from the well. *torn down*
- For right 63-3390 we need the claimant to show us where the place of use is located. They were licensed for 78 acres of irrigation but the field is much larger. Please ask where they are using the water from this well. Layouts are attached for you to draw on. *house torn down*
- ✓ **GPS* • Right 63-4761 is for commercial use at an apple orchard, 3 homes and stockwater use. Need to know: *no orchards any longer only crops*
 - How many times per year do they spray the orchard? *spray row crops only to*
 - What size tank does the sprayer have? *150 gallon*
 - How many times does he fill the tank per spray? *10*
 - Where are the 3 homes located? *only 1 house + 1 shop (the other house was torn down) see hand drawn map**across street*
- Right 63-9132 uses the same well, and one additional well, as 63-4761 for spraying, 1 home and stockwater. *for location*
 - ~~Are these the same 500 head of cattle under both claims?~~ *No cattle*
 - Where is the house located? *see maps*
- Right 63-20568 is for use of water from a drain. Need to have the point of diversion GPS'd and the acres that can be irrigated from the drain plotted on the attached aerial photo. We also need to know how much water can be diverted from the drain. *Unable to obtain physical measurement due to vegetation + because pump is currently buried under mud. Re: Claim No(s). A63-04761

A63-20562 & A63-20568

Dear Claimant(s):

In the past, you submitted the above referenced claim(s) in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim(s) for your reference only; this print-out is **NOT** to be returned or re-filed. You have indicated when this claim was filed that the water right(s) was based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water. Any other claims you may have filed, that are not listed above, do not require evidence of priority be submitted at this time.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary along with examples of types of evidence that can be submitted to fulfill this requirement. If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the Court for decree. This could jeopardize your water use under this right(s), if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify claims in this area are now being conducted by Department personnel. Please contact this office as soon as possible to schedule a field exam appointment convenient for you.

The required evidence supporting the priority date(s) must be submitted by September 1 1995, referencing all documents with the corresponding claim number(s). If you have any questions not covered by this letter, or the enclosed pamphlet, please call the Western Region office shown above.
