Re: Type of use, for water rights 78-4294, 78-4295, 78-4296, 78-4297, 78-4298A, 78-4299, 78-4301, 78-4302 and 78-4304.

To whom it concerns:

Water was used for commercial use, dust abatement, from the above water rights and streams in 1952 and probably earlier.

William Kerby, one of the former partners with J.I. Morgan Logging in New Meadows, Idaho, confirmed that one of the first jobs he had when he started work for Morgan in 1952, was watering roads for dust abatement. The truck used held 4000 gallons and would do up to 15 loads per day, or 60,000 gallons. Various operations would use between 3 and 15 loads per day, depending on location and distance to the main highway. Said water was removed from various points of diversion from one or more of the above streams on a daily basis for 1 to 4.5 months, from the middle of June through the end of October, depending on the weather.

Claus White Sr., another former J.I. Morgan partner, confirmed this.

Other operators were also working in this basin and doing dust abatement. There have been between 1 and 5 logging operations in this basin every year since 1952. Present operations average between 3 and 12 loads per day for duration of up to 4 months.
