

RE: Domestic well and pump

I am personally familiar with the installation of the well and pump on the property I now own.

The well was installed by my brother-in-law, Steven Best in 1982. The well supplied a mobile home which became occupied in December of 1982.

My wife and I purchased the property from my mother-in-law, Lucie Best. We since moved the trailers out and the water now supplies a shop and apartment within the shop.
