System Description (continued)

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

A syking's seepage area forms a small pond (40'x15x1') from which water is routed by a buried 2" pipe to another small pond (40'x15'x2') approx. 300' South. From this second pond, which is on Walker's property, a small pump channels water through a buried 1 1/2" line to several 3/4" standpipes for garden hose/sprinkler use. Other "channels" from the pump include a valve with one 3/4" attachment (hose) and a small riser with two valves for 2 garden hoses. A small earth ditch leaves the pond to allow gravity irrigation on the property. Also, a 3" pipe leaves the pond and runs west to allow gravity irrigation on other parts of the land. Irrigated areas include lawn, pasture, garden, and misc. ornamental & fruit trees. ☐ See Remarks on page 4 for continuation

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Limit license to .02 cfs as permit shows. The storage components and diversion to ~~the~~ storage from 1 parcel to the other parcel are such minor components in terms of volume that right should continue to be described as irrigation. (Pond volume at spring is $(40' \times 15' \times 1') / 43,560 = .014 \text{ AF}$. Pond volume on Walker's property is $(40' \times 15' \times 2') / 43,560 = .028 \text{ AF}$).

Overlap: 1 P/D conflict:

P/D - 78-7103 is same spring but used for Becker's property ground spring.
78-7102 is well on Becker's property for off int. + extra use (info from field exam conducted by Rich. G. 7/87).

P/U - 78-7103 irrigation & stockwater of other land; 78-7102 see p/d overlap;

78-7077 Relinquished 10/7/87; 78-7263 is permit to increase storage at Brundage Reservoir. Proof due 11/1/90. Split into A (Brundage Waters Users) and B (USDA Forest Service). Does not provide water to Walker's property.

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

A spring and related seepage face fills a pond from which water is diverted from. A 1.5 HP centrifugal pump diverts water into a sprinkler system. The system has about 16 sprinklers. During visit 6 were running at 45 PSI. A separate gravity ditch system also supplies water to the place of use and stock water.

Change of Address

Dear Claimants:

IDWR has been notified the address presently in our records is incorrect. Although we have reached you at the address above, we need your written confirmation this is your correct mailing address before we can change our records. Future notices related to your water right(s) can be sent only to the address on your water right(s) or as otherwise changed by you.

Please sign your name at the bottom of this letter and return it to this office. Make corrections to your name and address if necessary **and list any other water rights you may have** before returning this letter by November 24, 1998. Thank you for your help.

If your mail delivery address changes in any form, please contact us in writing so we can update our records.

If there has been a change in ownership of the property connected with the water right(s) referenced above, please call this office toll-free at 1-800/451-4129 to obtain a form to make this required change to the water right record.

Sincerely,
