RE: Claim # 95-12831

LORI,

Here is a copy of the letter I
got from Mike Mooney concerning
the water rights issue for our
Lake Cabin on Coeur d'Alene Lake.

Thanks for your help.

E-mail address: gcsprint@yahoo.com

Note: When we bought the Cabin in Spring,
1988, there was a water pump & pipe in the
Cabin (not used - Due to being drained/winterized)
And when the Contractor hooked us up to the
Sewer System, the Septic tank was full of
water which was necessary to prevent its
collapse during the back filling process.

Good Day Gary!

Per our telephone discussion yesterday, here is what I remember about water usage at your cabin before you purchased it.

I purchased my land in the fall of 1974. It is four or five lots down the road from your cabin. Over the next few years, I met the other neighbors on the road primarily through visiting while they were outside working on their individual homes. I remember seeing a number of the neighbors helping the then owner to pour the cement step going up to the door of your cabin. We got into a discussion of the difficulty in dealing with the health district and getting septic permits. They were using water from a hose that the owner had run from a pump he used to draw water from the lake for construction needs. I know he started building in the 1960's and the group was bemoaning the fact that he had most of his plumbing in and because the owner delayed getting his septic system inspected in a timely manner that the law changed. We did not mention dates, but it really seemed to have been in for a long time.

Best Regards

Mike
