RE: 78-12217

We have received your Notice of Error Reply. Our recommendation for the acreage was based on a split that was made at our Western Regional Office. Enclosed in a copy of their worksheet used to determine the acreage. If you disagree with that computation then you can file an objection to our recommendation. Instructions on how to do that will be sent in the near future.

Sincerely,

A handwritten signature in black ink, appearing to read 'Knoblock', written over a horizontal line.

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source): *also 4 c water rights would include stock water*
- I think the priority date, period of use, and source are correct, but I think it is more like to ~~acres~~ to irrigate not 3.5 acres, which would*
2. Describe the changes you wish to make in the proposed recommendation: *change the CFS*
- The change would be the number of gallons ~~acres~~ that would be irrigated, and the quantity of CFS. ~~also stock water~~*
3. Give a brief explanation as to why you disagree with these portions:
- I haven't traversed the area, but based on common knowledge, I'm making an assumption that there are double the acres*
- ☐ I AGREE with this proposed recommendation: no changes need to be made.

Re: Original Notice of Claim to a Water Right No. 78-4021E

Renumbered Notice of Claim to a Water Right No. 78-12217

Dear Claimant(s):

We have received and processed a Change of Ownership for a portion of the original Claim to a Water Right Number as referenced above. This Change of Ownership required a split of the original claim resulting in renumbering this claim, using a new water right number to represent each split. The new Notice of Claim to a Water Right number for your portion is referenced above and a copy is enclosed.

Your portion of this claim has a specified point of diversion, nature of use and place of use. If you plan on changing the nature of use, place of use, or point of diversion under this right, including adding a new point of diversion, then an Application for Transfer on your portion of this right is required. Please contact this office for further information on the Application for Transfer form. If you do not plan on changing any items on your claim, then no further action is required at this time.

Please note that the enclosed Notice of Claim to a Water Right is not a determination of your water right. This claim represents a split of the claim filed by a previous owner during claims taking in the Snake River Basin Adjudication (SRBA) and has not yet been verified by this Department. Water rights are established and maintained by beneficial use of water for the uses designated on this claim form dating back to the priority date listed. This claim will be investigated, verified and recommended to the SRBA Court for court decree sometime in the near future. You will be notified prior to the beginning of any verification of this water right.

Thank you for your patience, as we have had several water right changes to process. Please feel free to contact this office if you have any questions concerning your claim or this letter.

Sincerely,

Adjudication Section

SUBJECT: Split Water Rights, A78-04021A and A78-04021B

Dear Mr. Aitken:

In order to split the water right with Mr. Schlomer, it must be determined exactly which acreages from this right are the property of the new owner. I will then subtract these acreages from your portion of the right and add them to the new portion. The right will then read A78-04021A and A78-04021B with Mr. Schlomer's acreages on the B portion. This is necessitated by the fact that the water right is appurtenant to the property.

I have enclosed a copy of this water right for your convenience. Please contact me as soon as possible so I may complete the processing of these claims. Thank you for your assistance in this matter.

Sincerely,
