Lands irrigated are mostly narrow, irregularly shaped tracts along north and
south sides of Squaw Creek. All tracts slope sharply towards creek and soil
is shallow, all underlain with gravel and sand. Land does not sub-irrigate
like lower country, heavy soil lands, but water sinks quickly and goes back
to stream. For this reason, not less than 4 miners inches of water per acre
is required to effectively irrigate land.

NOTE: This claim is supported by the attached affidavits of Eunice Parkinson,
Albert W. Campbell, Loy Hollenbeak and Rollie L. Campbell, as to
priorities and use of water upon the lands of the claimant.
