E. REASONS SUPPORTING OBJECTIONS(S): Please see next page.

Dr. George Brown objects to Right 22-594. In 2010, IDWR recommended the right be approved pursuant to Idaho Code §42-1425. Two elements of water transfers under I.C. §42-1425 are that the transfers cannot damage existing rights or create an enlargement of the right. Further, I.C. §42-222 provides additional elements for water transfers: Transfers cannot cause harm to existing rights, cannot result in an enlargement, cannot result in a loss of public interest, and cannot violate conservation laws.

Dr. Brown requests that the SRBA hear evidence regarding the legal significance of facts that occurred after IDWR approval. Dr. Brown intends to present evidence that his water rights have been harmed. He will also show that the transferred rights have resulted in an unlawful enlargement of the original water right and damaged the environment. SRBA will also need to decide water right issues that were not addressed by the IDWR, such as violations of conservation laws and loss of public interest, that have resulted from use and misuse of these water rights.

In addition, the Water Master of District 1 has not allowed Right 22-594 to be delivered to the point of diversion of DKJ Farms. This right has not impacted diversion of water at the point of diversion of DKH Farms and has not been used for over five years.
