From: Craig L. Saxton ↙↘↗

I just spoke with Becky Brotnov and she attests that ponds 1 and 4 were built and in place prior to 1987 because the person who bought the property before her, purchased it in 1986 and both ponds were there at that time. In addition, the sawmill had a pond at the time that was running so that has been storage under this right for some time.

She does not irrigate at all with little smith creek water nor is it used for domestic use.
