Comments:

1. kwalker 9/28/2006 Recommendation

Comment: Exam conducted 5/30/06. Examiner found only 2 domestic uses currently under this right. She recommends splitting right but I am going to recommend under 1 number until a change in ownership is received from owner in Section 5. No stockwater or commercial uses under this right anymore per field exam. Can allow change in use to 2 domestic uses since they are less consumptive than the stockwater and commercial uses that were licensed.

2. kwalker 9/28/2006 POD Locations

Comment: The GPS information for the wells under this right does not locate the wells where shown on maps attached to field exam. Have digitized the wells to location shown on maps attached to exam.

3. kwalker 9/28/2006 Use of water

Comment: Upon further review of the field examination and in creating GIS shapes I found that the domestic use in Sec. 6 had been covered under a beneficial use rt. 63-20562. Since that claim had been recommended with an earlier priority date I have not recommended the same use under this right.

RE: Use of water

Date: September 28, 2006

.....

While reviewing Rt. 63-9132 for recommendation, based upon exam conducted 5/30/06, it was determined that the uses under the license had changed to domestic use for 2 homes. In preparing the recommendation I found that one of the domestic uses had been covered under a beneficial use claim that allowed an earlier priority date. Since beneficial use claim 63-20562 covers the domestic use located in NESE, Sec. 6, T3N, R4W, I recommend that we only allow 1 domestic use under Rt. 63-9132.

No longer have any livestock, and requested that “stockwater” be removed from this WR.

63-02857: 8” discharge to buried 8” PVC running directly west to east to the top of the hill where the tower is, then 3” aluminum hand line, 1/8” nozzles. Or the well open

discharges directly south then turns east to a pond where it co-mingles with Wilder Irrigation, is piped to a holding tank to the south through 8" PVC buried (directly in northwest of 17491 Van Slyke Rd (Howard's mom's house) where it is pumped via (2)-50 Hp Berkeley booster pumps, each with 4" discharge, 2' lift, 40 psi, pumped to the field located south of the house (17491 Van Slyke Rd) through buried 6" PVC that reduces down to 4" PVC. 3" aluminum hand line runs east and west, (200) 1/8" nozzles run at one time.

Along the north boarder, there are both aluminum pipe to transport water, and concrete ditches (which can be used to gravity flow north to south with 1" siphon tubes, or hook up 3" hand line on the aluminum pipe, with (200) 1/8" nozzles that run at one time).

NOTE: Wilder Irrigation is the main source with a head gate to the south of the POD. POD for 63-02857 is only a supplemental source that is co-mingles with Wilder Irrigation, except for the field north of 17553 Van Slyke (by the tower in the picture) where for this field it is the sole source. These fields are sprayed with the spray rigs mentioned in WR# 63-04761. Mr. Slyke stated that these have always been the acres they have irrigated with this system.

63-3390: well (secondary source) open discharges into a holding pond. Wilder Irrigation (main source) also open discharges water into the same holding pond (pipe located on south end of pond). There is an overflow in the holding pond that routes water back to Wilder Irrigation. There are 2 Berkley booster pumps, both with 4" discharge, #1 Booster Pump (30 Hp) pumps water to the north where there is a control valve, then buried 4" PVC with risers run west to east along the north property line to attach 3" aluminum hand line (running north to south) with 1/8" nozzles (110 nozzles run at one time). This mainline was installed over 15 years ago with hand line and wheel line being the sole sources prior to the pivot being installed. #2 Booster Pump (40 Hp) pumps through 6" buried PVC to the Pivot, average 80psi, with regulator on the pivot to control the pressure over the hill. 6 towers, with a big gun on the end.

NOTE: Mr. Van Slyke stated that the acres indicated on the map have always been the acres they have irrigated. The Pivot was installed in the Fall of 1993, and prior to that they irrigated the system with the same mainline they have running across the north boarder (runs west to east) with some branching off to wheel line and hand line. The sprayer rig in the photograph was spraying at this POU. Mr. Van Slyke stated that they rotate around the field (this commercial use originated from WR# 63-04761). Wilder Irrigation is the primary source for this system, with groundwater being supplemental.

63-20568:

Recommend disallowing this WR due to the system not being used for the past 10 years, and Wilder Irrigation having been the sole source.

GROUNDWATER THEORETICAL ANALYSIS Analysis

FILE: 63-9132 (Glen Mossels well)

Wilder

DATE: 9-20-2006

BY: Sandy Hemmaway

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8 \times (HP) \times (EFF.))}{TDH}$

Q = CFS

HP = Total Brake Horsepower of pumping plant (including booster) 3HP

Eff. = Pumping plant efficiency (assume 70% or 0.70) 0.70

TDH = Total dynamic head = [(LIFT) + (PSI X 2.31)]

LIFT = Depth to water in FEET from land surface to pumping water level 93's static + 10' = 103'

PSI = Pumping pressure measured in PSI near pump (if open discharge assume [0]) 30 psi

$$Q = \frac{(8.8) \times (\underline{3}) \times (0.70)}{[(\underline{103}) + (\underline{30} \times 2.31)]} = \frac{18.48}{172.3} = 0.107 = \boxed{0.11 \text{ cfs}}$$

Property Address:

Get directions from Mr. Van Slyke when you call to set up an appointment.

Requests:

*Please verify **all the elements** of these rights along with finding out about some issues on licenses 63-2857, 63-3390 and how 63-9132 relates to 63-4761.

In addition, please verify:

- GPS the location of the diversion points.
- For right 63-2857 a domestic use is claimed but I cannot find a house to attach it to. Please find out where the house under this right is located. I have attached a layout of the irrigation place of use and the point of diversion for you to draw the location of the house on. Also please ask if there is a lawn associated with the house that is irrigated from the well.
- For right 63-3390 we need the claimant to show us where the place of use is located. They were licensed for 78 acres of irrigation but the field is much larger. Please ask where they are using the water from this well. Layouts are attached for you to draw on.
- Right 63-4761 is for commercial use at an apple orchard, 3 homes and stockwater use. Need to know:
 - How many times per year do they spray the orchard?
 - What size tank does the sprayer have?
 - How many times does he fill the tank per spray?
 - Where are the 3 homes located?
- Right 63-9132 uses the same well, and one additional well, as 63-4761 for spraying, 1 home and stockwater.
 - Are these the same 500 head of cattle under both claims?
 - Where is the house located?
- Right 63-20568 is for use of water from a drain. Need to have the point of diversion GPS'd and the acres that can be irrigated from the drain plotted on the attached aerial photo. We also need to know how much water can be diverted from the drain.

- **1987 Aerial Photo:** Please draw the **acres** that have been irrigated under each source on the enclosed **1987 aerial photographs**. Draw the **diversion works** on the 1987 aerial photos, along with the **points of diversion**.
- **Capacity of System:** Please try to measure the point of diversion under 63-20568. Verify that the claimed **amount** is possible/applicable.
