decreed and be done with them! Clerk

Deputy Clerk

Yes please. That would be great then we can issue a notice of intent for partial

Diana,

It looks like 3-2051 should have the condition that limits the stockwater use to 13,000 gpd, but the diversion volume takes care of the historical beneficial use.

3-7027 was originally an irrigation right, but in order to save \$26.00, they filed the claim for domestic use. Again, the daily use should be limited to 13,000 gallons, but the diversion volume is the determination of historical beneficial use.

Would you like me to send you "corrected" Director's Reports with the appropriate conditions?

Carter

There are 2 uncontested partials hanging out there for Basin 03:

03-2051 and 03-7027 – Both of these are uncontested rights, but I have a note on them that they may/may not need a de minimis cap remark? Can you check them out and let me know as soon as possible.

Then we truly will be DONE with Basin 03!!
