

Exhibit #1

5. Description of diverting works (Wells, Pump, Spring boxes, Pipelines, Etc.) including the dates of any changes or enlargements in use, the dimensions of the diversion works as constructed and as enlarged and the depth of each well.

A 2" poly- pipe lies on the base of Canyon Creek, which then runs underground to property where it is connected to a 3 HP electric pump. In 1995 the original 1" iron pipe was changed and enlarged to the current 2" poly-pipe, the original ¾ HP pump was replaced with the a 3 HP electric pump, and a foot valve was added.
