1001 - up (3)				

11
12,000 gpd

12,000 gpd

(1) The amounts shown are based on 12 gpd/head with a 12 month period of use. (i.e. for range cattle, horses and mules). The amount does not include a loss (i.e. thru conveyance, etc.)

2. The amounts shown are based on 35 gpd/head with a 12 month period of use. (i.e. for dairy cattle). The amount does not include a loss. (i.e. thru conveyance, etc.).

3. For annual use calculations which involve more than 1000 head, round the number of head up to the next even one hundred, and

Volume

a) for livestock use @ 12 gpd/hd, N (0.0134).

b) for dairy use @ 35 gpd/hd, N (0.0391).

12 gal/day/head animal

Rate

a) for livestock use @ 12 gpd/hd, N (0.00022).

b) for dairy use @ 35 gpd/hd, N (0.00065).

The answer should be rounded up to the nearest whole acre-foot.

*The rate is based upon approx. 2 hr/day diversion to obtain daily requirement.

A. Kenneth Dunn

Dan Nelson's field examiner's notes:

11/13/06

We could allow 108 gfa.

3.50 consumptive. Estimate.

4.5 / acft
2.5 - 3.0

24 acres $\times$ 3.0 consumpt. = 72 gfa

max

VOLUME CALCULATION =

3,000 ca $\times$ 1/2 $\times$ 365 days =

32585

40.3 gfa.

we
could
allow
for
stock
under
accomplished
x-fer.

24 $\times$? = 40.3.

at 40.3 gfa consumptive use would be

1.7 gfa

2.5 - 3.0 is generally = acceptable.

* Richardson

couldn't have irrigated more than 24 acres

CONVERSATION MEMORANDUM

RE: Snake River Basin Adjudication Water Right Nos. A63-29051

November 8, 2006

I called Dorothy Bicandi, daughter of William L. Richardson, at #459-0428 (home) and #941-4399 (cell) and left a message on both answering machines to return my call as soon as possible, regarding an amended claim for stockwater purposes (based on the findings of the field investigation).

November 9, 2006

Dorothy Bicandi returned my call and will come in to the office on Monday, November 13th, 2006 in order to sign an amended claim and change the use from irrigation to stockwater.

November 13, 2006

Dorothy Bicandi, the daughter of the William L. Richardson, came in to the office to sign the Amended Claim for her father, who is unable to comprehend these matters due to his old age and medical/physical complications.

After changing the disallowed recommendation to the amended stockwater use, I sent a copy of the Preliminary Recommendation to: (as was requested by Mrs. Bicandi)

DATE: 11/8/06

SUBJECT: CLAIM FIELD EXAM NARRATIVE

I was asked to perform a field exam on the above claim. In reviewing the file, and speaking with the owners during the preliminary report meeting for part 2 of Basin 63, I have found several discrepancies that make me unsure about this claim. The owner's of this right have bounced back and forth between an irrigation right and a stockwater right for this well throughout the process. Currently the well is being used to supply a feedlot, and is not tied into the irrigation system in any way. I could find no evidence during my examination that would suggest that this well had ever been used for irrigation purposes, other than the casing size, which was large enough to accommodate a turbine type pump. The owner told me that when they changed the well over to a stockwater well shortly after they purchased the property in the 1970's, and they had not used the well for anything else except stockwater ever since. The ground is currently irrigated using Mason Creek Irrigation District water.

Currently, there is a 5 Hp pump in the well, but the owner stated that there was a 7.5 Hp pump. The owner also stated that he ran 2 wheel lines with large heads on this field. In performing the theoretical calculation on this system, I discovered that the 5 Hp pump can supply 0.21 cfs of water. It requires approximately 0.73 cfs of water to run two full wheel lines ($5.15 \text{ gpm/sprinkler} \times 32 \text{ sprinklers/line} \times 2 \text{ lines} / 448.8 = 0.73 \text{ cfs}$). Even if they did have a 7.5 Hp pump in this well it would still only supply 0.32 cfs or less than half of what they would need to irrigate this property.

The owner claimed 40 acres of irrigation, but there are only 24 acres in the field they claim to have been irrigated from this well. This well would only supply $\frac{1}{2}$ inch per acre for irrigation of this field, which is barely enough water to irrigate with. The volume for this claim would be limited by diversion rate to 108 afa ($0.21 \text{ cfs} \times 260 \text{ days} \times 1.9835 = 108 \text{ afa}$).

Page 2

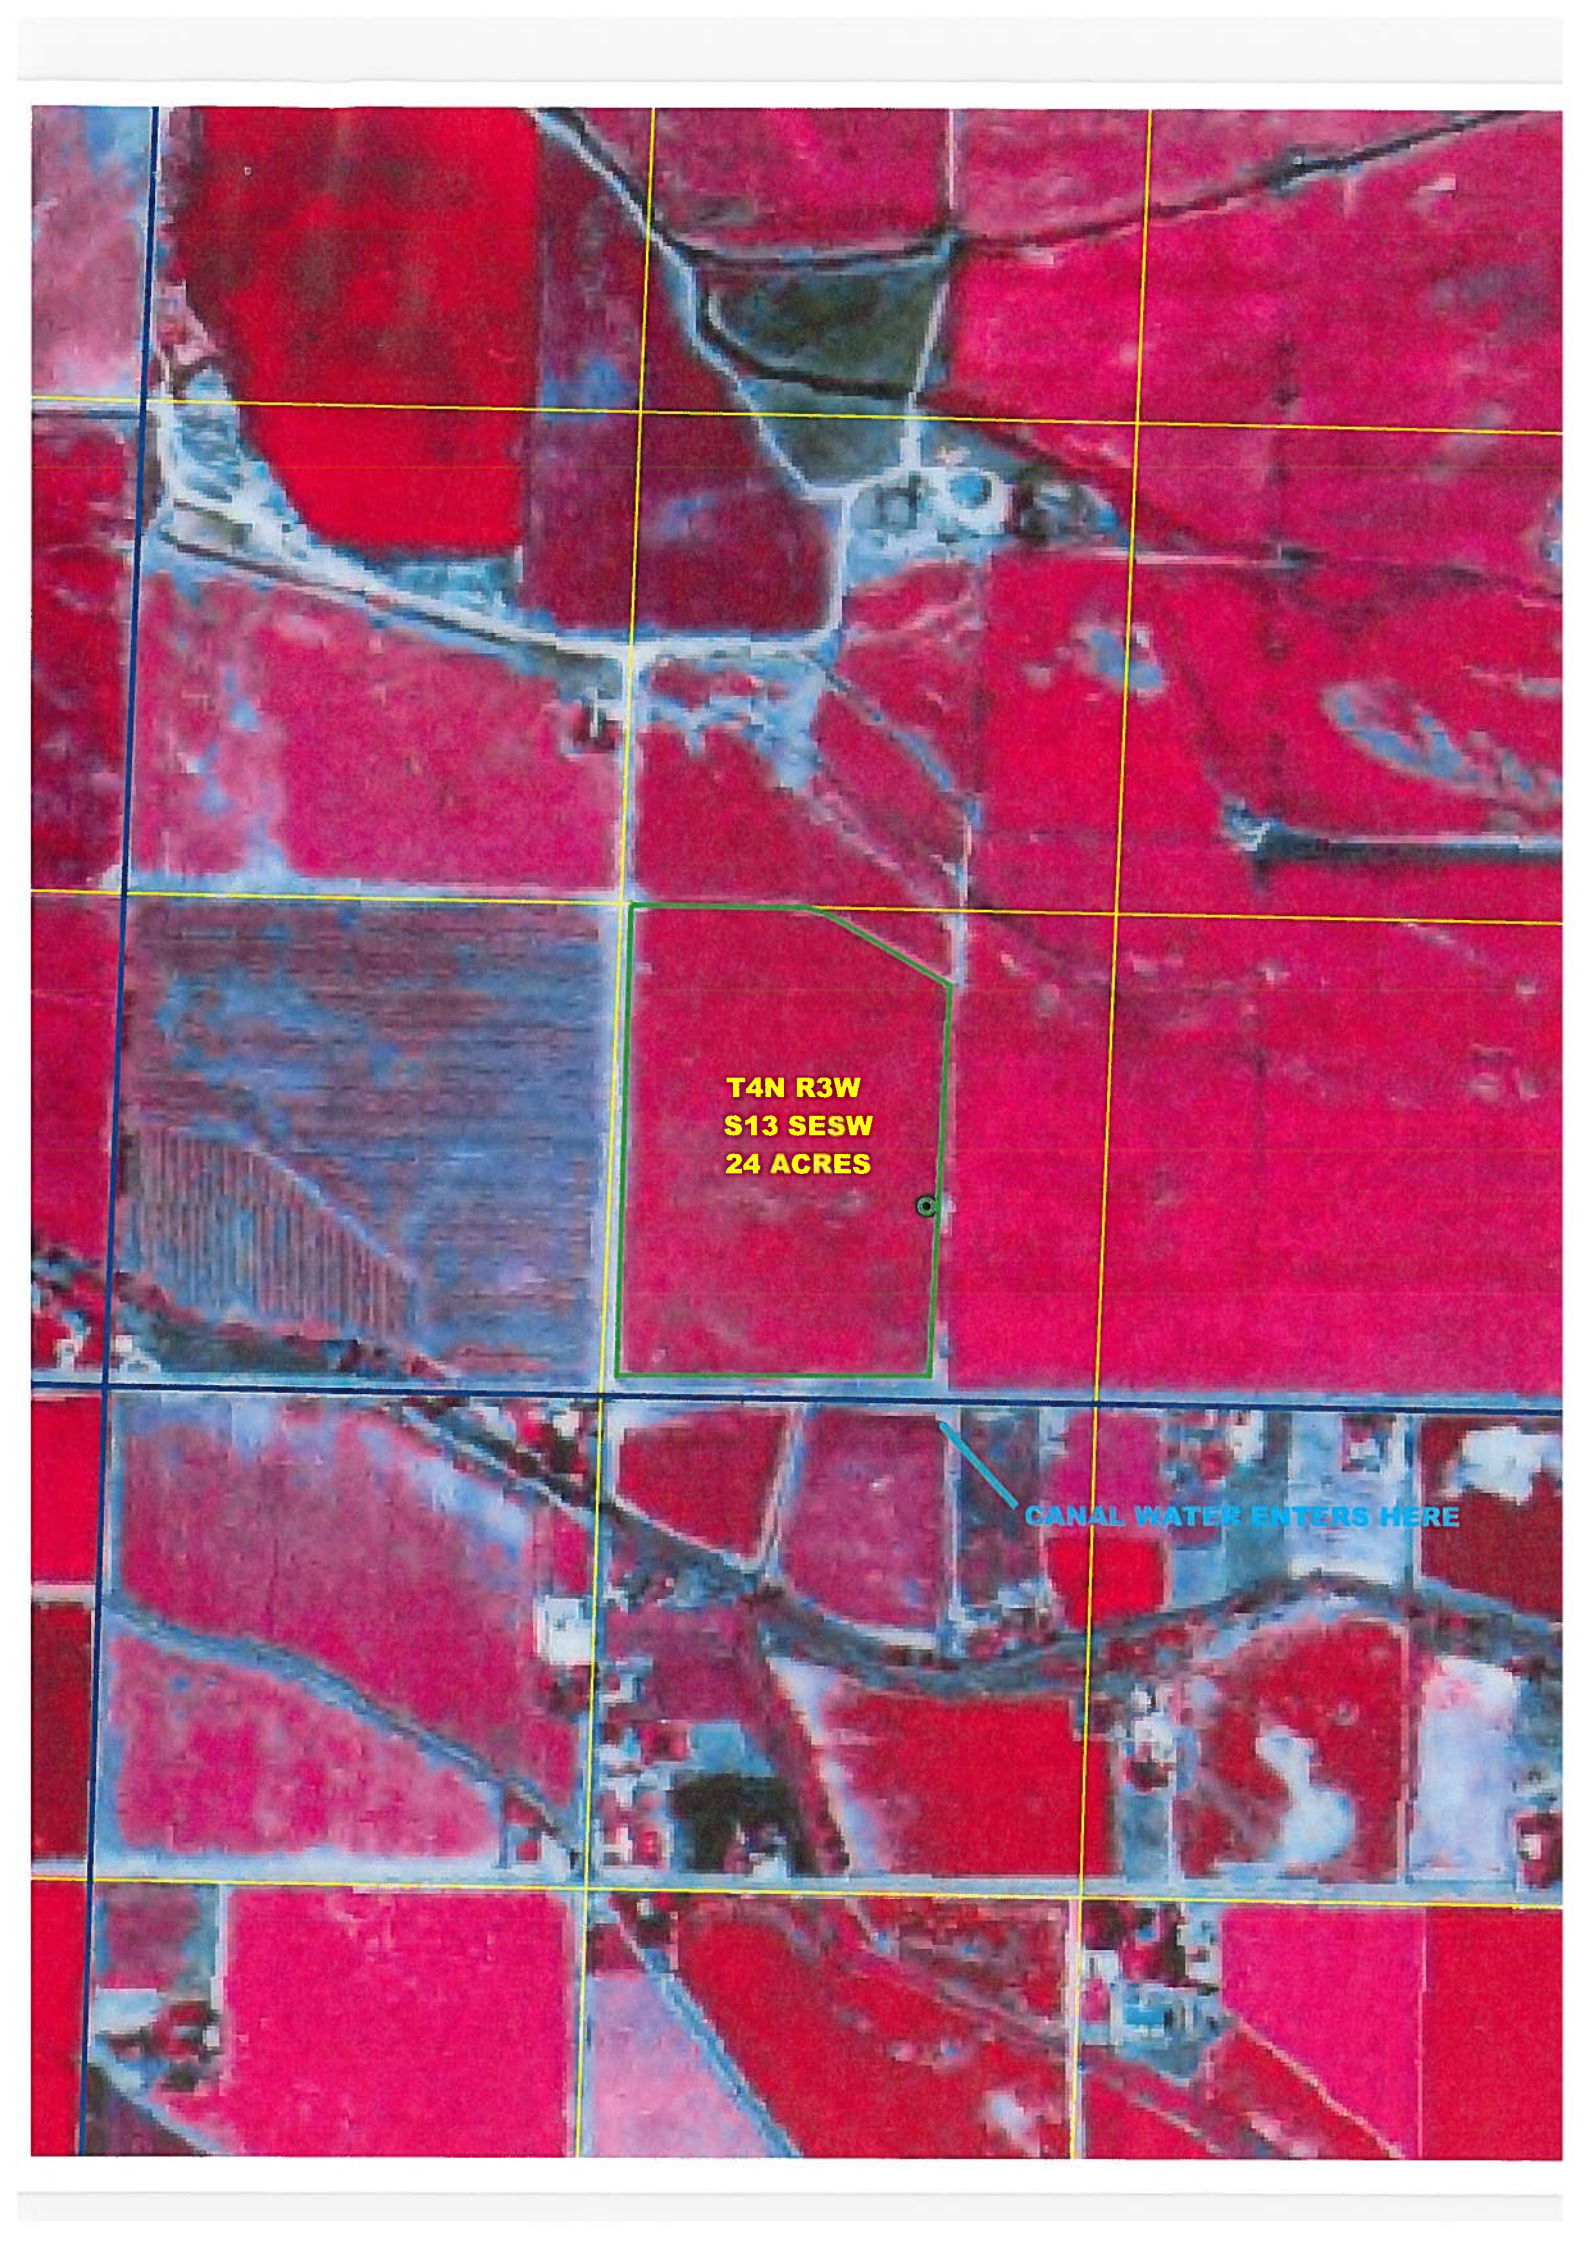

63- 29051 field review

CONCLUSION:

I would be hard pressed to recommend this right for irrigation purposes. I have no significant proof that this well has ever irrigated this ground, and the capacity of the well is not sufficient to do any more than supply minimal supplemental water. The owner also informed me that this well has been used for stockwater purposes only, since the 1970's. However, if this claim is recommended, I would suggest it be recommended as follows:

0.21 cfs and 108 afa for 24 acres in the SESW S13 T4N R3W

The only other possibility for this use of this well would be an accomplished transfer for the stockwater use it is currently being used for. It might be best to have the owner's amend the claim to a stockwater use for 0.21 cfs.

GROUNDWATER THEORETICAL ANALYSIS

FILE: 62-29051

DATE: 11-8-06

BY: Daniel A. Nelson

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8 \times (HP) \times (EFF.))}{TDH}$

Q = CFS

HP = Total Brake Horsepower of pumping plant (including booster)

Eff. = Pumping plant efficiency (assume 70% or 0.70)

TDH = Total dynamic head = [(LIFT) + (PSI X 2.31)]

LIFT = Depth to water in FEET from land surface to pumping water level

PSI = Pumping pressure measured in PSI near pump (if open discharge assume [0])

$$Q = \frac{(8.8) \times (5 \text{ Hp.}) \times (0.70)}{[(30) + (50 \times 2.31)]} = \frac{30.8}{145.5} = 0.21 \text{ CFS.}$$

94 gpm

Booster (Y) (N)

NOTES ON PUMP:

Motor Make, Serial or ID

Pump Make, Serial or ID, rating

REMARKS: I Found 2 well logs in this same area. They both showed a pumping water level of 25-30 FT. Therefore I used the 30 FEET.

The owner stated that well used to have a 7.5 Hp pump. This would increase the rate of diversion to 0.32 CFS $(8.8) \times (7.5 \text{ Hp}) \times (0.70) / 145.5 = 0.32 \text{ CFS. (144 gpm)}$

The owner stated they ran 2-lines (wheelies) with large nozzles.

at 50 psi 5/32 nozzles he could run 18 to 28 sprinklers. There are 32 sprinklers in a line. Something isn't making sense. It would take 329.6 gpm to run this many sprinklers. Or approx 17 input Hp to operate 2-lines from this well.

PHOTOGRAPHER AND DATE OF PHOTOS DANIEL A NELSON 11/8/2006

FILE NUMBER 63-29051

The photo to the left shows the wellhead. Please note that there is no piping or other evidence that this well has been used for any other purpose other than a stockwater well.

The photo below shows the place of use. All of this ground is currently irrigated using Mason Creek Irrigation District water through the ditches on either side of the photo.

ADDITIONAL INFORMATION NEEDED FOR IRRIGATION FIELD EXAMS

Field Examiners, please complete the following checklist. Mark "unknown" or N/A if information doesn't apply or information is unavailable.

IF CURRENT OWNER DOES NOT MATCH PROOF REPORT PLEASE GIVE NEW OWNER CHANGE OF OWNERSHIP FORM TO COMPLETE.

1.) Pump information:

Well or Diversion Identification No.*	Motor Make	Hp	Motor Serial No.	Pump Make	Pump Serial No. or Discharge Size
	FRANKLIN	5HP	23471500	General	
old motor	→	7.5			

3.26
KW

2.) Lift (distance from pump to water) 8 - static.

3.) How was lift determined (well log, measurement, owner)? _____

4.) Pressure against pump (this is checked using the owner's psi gauge, your gauge, or an estimate by owner) ~~40 psi~~ 50 psi / owner

5.) Was a measurement made? _____ If no can a measurement be made at a latter time? _____

6.) What type of measurement device was used? _____

7.) Is there a pump curve available for pump? _____

8.) Please fill out the following:

Number of sprinklers _____

Sprinkler nozzle size 32 / LINE

Number of Pivots (include gpm rating for each pivot) _____

submersible

5
 64
 5.5

 320

9.) Please outline all acres irrigated on attached aerial photo. _____ DONE

10.) Please clearly mark all points of diversion on map and GPS. _____ DONE

11.) Please clearly mark all mainlines, ditches, and other conveyances.

_____ DONE

12.) Pictures taken of place of use and point of diversion. _____ DONE

13.) Please show where and how water from other sources are diverted into the irrigation system.

FIELD EXAMINERS NOTES (descriptions, other uses, questions, ect.)

Owner stated they
changed irrigation use
over to stockwater use
~~to~~ shortly after they purchased
the property in the 1970's.

Mason Creek water is
now used to irrigate
this ground.

To Whom It May Concern:

The principal owners of this well are all deceased. The information I have has been my own observation.

I have lived on the family farm on Marble Front Road, Caldwell, Idaho, all of my 86 years.

In 1958 Golden Gate Farms purchased property, North of Lincoln Road and South of the Boise River, from Octavia Walker. They put in a mint still and planted the fields to mint. They had problems with the surface irrigation and drilled a well in the S.W. 40 acres bordering Lincoln Road to bring down the water table. This was in the fall of 1962.

I affirm that these statements are true to the best of my memory.

Signature of Claimant Edwin June Vassar Date Nov. 1-06

DATE: 10/19/06

SUBJECT: MEETING NOTES

During the Basin 63 part 3 meeting at the Elks Lodge in Caldwell on 11/18/2006, I spoke with the claimants of the above claims for Kimberly Brown. During this meeting, we discussed several issues on three water rights, so I wanted to compose this memo to ensure all of the information was properly relayed to Ms. Brown.

Adjudication Recommendation 63-29051:

This claim was originally filed for irrigation use from ground water with a 1960 priority date. The claim was recommended as disallowed due to lack of proof of priority. The claimant's daughter, Dorothy Bicandy, handed me an affidavit for this claim that stated that the well was in use in 1965. This affidavit put the first irrigation use from this well beyond the 1963 date requiring that an application for a water right be filed. I informed them that we still couldn't recommend this right with this statement, since the affidavit showed a date beyond the mandatory permit requirement.

They then stated that they wanted to amend the adjudication claim to stockwater for 2,400 head of cattle. I told them that this number of cattle would consume more than the standard 13,000 gallons per day we could allow under an adjudication claim after the 1963 date, and that they would need to file an application for permit or transfer for this use. Ms. Bicandy handed me a new adjudication claim form for a stockwater use that upon a quick initial review appeared to need some corrections prior to being submitted. I told them at this time it would be best if they kept the affidavit and claim and made an appointment with Ms. Brown to ensure that everything was properly filed.

Adjudication Recommendation 63-29055:

Ms. Bicandy reviewed this recommendation, and stated that she felt it was properly completed.

Page 2
Meeting notes

Adjudication Recommendation 63-30157:

The claim for the above recommendation was filed for stockwater and fish propagation with a 1963 priority date. Evidence of Priority was requested on this right, and once again it was not received, so the fish propagation portion of this claim was removed and the right was recommended with a 1963 priority date for stockwater limited to 13,000 gallons per day. Ms. Bicandy stated that the fish propagation is in place and that over 200 fish are in these ponds. I informed her that we could recommend the fish propagation if she could supply evidence of priority.

Ms. Bicandy then handed me a copy of the well log that shows the well was constructed in 1965 after the mandatory application requirement of 1963. I told her at this point that even with this evidence, we could not give her the fish propagation, because it was after the required application date, and that she would need to apply for a water right for the fish propagation portion of this claim.

I also told them that with the evidence of the well log submitted the stockwater portion of this claim would probably be advanced to the 1965 date on the well log.

CONCLUSION:

Basically, these folks are going to need to come in and make an appoint to straighten out these water rights and file the amendments needed. I told Ms. Bicandy, that she needed to call Ms. Brown and make an appointment with her. I gave Ms. Bicandy one of my cards, and put Ms. Brown's name on it to ensure she had the correct number to call and make an appointment. If they don't make the appointment, I assume the files should remain as recommended except for 63-30157, which should have the priority date advanced to 1965.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

* The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Notice is hereby given that W. L. &/or Louise Richardson

(Name of Claimant)

1802 Fillmore St. Caldwell, Idaho 83605

Telephone No. 459-3486

(Mailing Address)

(Zip Code)

claims a right to the diversion and beneficial use of the surface or ground water. The extent and nature of said claim is as follows:

- (1) Date of priority: (When was the water first applied to a beneficial use) May 1, 1966

A claim is not acceptable on a ground water source with a priority later than March 25, 1963 or on a surface water source with a priority later than May 20, 1971. An exception is that a claim may be filed on single family domestic use from a ground water source.

- (2) Describe the source of water: (Name of stream, lake, spring, etc., or ground water)
Mason Slough and unnamed drains tributary to Boise River

- (3) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

(cfs, af)		(Domestic, Irrigation, Stock, Etc.)		(Both dates inclusive) (Mo., Day)	
Quantity	14.16 cfs	Use	Irrigation	Period of Use From	3/15 To 11/15
Quantity		Use		Period of Use From	To
Quantity		Use		Period of Use From	To
Quantity		Use		Period of Use From	To
Quantity		Use		Period of Use From	To

- (4) 14.16 TOTAL QUANTITY USED.
(cfs. af)

- (5) A) Point of diversion: (Location of point where water is diverted from its source)
SE ¼ SW ¼, Sec. 13 Twp. 4N Rge. 3W B.M., County of Canyon
 Additional points of diversion: NWSE, SWNE, SWNW Sec. 13; SWSE Sec. 11; SENE, NESE Sec. 14
All in T4N R3W

B) Describe means of diversion of water: (Pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.). Give sizes and capacities: be as specific as possible. Describe any changes in the system and give the date of the change. 7 pumping stations with a total of 430hp, buried main line, open ditches and sprinkler system.

- (6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

[illegible]

No. of acres 708

B) (f water is used for other than irrigation, fully describe that use, being as specific as possible:

NOTE: Include here the type and number of stock watered:

- (7) If you are claiming water as a member of an organization, list name of organization:

CONVERSATION MEMORANDUM

**RE: Snake River Basin Adjudication Water Right Nos. A63-29051, -29055, & -30157
Evidence of Priority**

May 3, 2006

Dorothy Bicandy, William L. Richardson's daughter, called in response to the evidence of priority letters she just found at her father's home. She said that her father is 94 years old and that she doesn't even know where these wells are! When I asked if she was aware why 1960 was chosen as the priority date, Mrs. Bicandy stated that her father has owned this property since 1971, that he bought it from a company that is no longer in business, and that those business owners "are all dead." I told Mrs. Bicandy that I would give her an additional two weeks to submit evidence of priority (May 17th, 2006). She replied that she would talk to her husband, since they may have some deeds or a copy of the Well Driller's Report in their files.

June 5, 2006

Dorothy Bicandy called (#459-0428). She said that they can only find two of the wells, but not one of them. Regarding Claim No. 63-29051, she stated that "it hasn't been used for over 6 to 7, maybe 10 years" and that it is currently being used to water 3,000 range cattle. When I asked her when this change from irrigation use took place, she replied that it happened approximately 2 years ago. Mrs. Bicandy stated that when her father bought the property, they took the well-lines out, so that it was easier to use the surface water. When I asked her about this surface water use, she believes that there is also a surface water right, but wasn't sure if it was from Mason Creek or Pioneer Irrigation District. Mrs. Bicandy also informed me that she found a Well Driller's Report for Albertson's Turkey Farm, but couldn't tell if the date on it was 1963 or 1965. I found a copy of it in our database and informed her that it was not applicable because it was a new well drilled in 1965.

RE: EVIDENCE OF PRIORITY

Snake River Basin Claim No(s): A63-29051, A63-29055, A63-30157

Dear Claimants,

In the past, you submitted the above referenced claim(s) during the Snake River Basin Adjudication (SRBA) claims taking. Enclosed is a computer generated print-out of the claim(s) for your reference only, it is not necessary to return this print-out. You indicated, when this claim was filed, that the water right(s) was based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by historical use of the water for a beneficial use purpose, dating back to the time the water was first used; this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is required to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary, along with examples of types of evidence that can be submitted to fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled. **"What Kind of Evidence is Required"** and **"Some Examples of Documents Which May Be Evidence of the Priority Date."**

It is important that each element of the Notice of Claim be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the SRBA court for decree. This could jeopardize your water use under this right(s) if water availability problems arise in the future.

The required evidence supporting the priority date(s) requested needs to be submitted by **April 19, 2006**. Please let me know if you may not be able to submit proof of priority or have any questions not covered by this letter and the enclosed pamphlet, by the date indicated above.

In addition, since it is our goal to decree the historical water right within the Snake River Basin as accurately as possible, field exams are now being conducted by Department water resource agents to verify claims in this area. In the near future, you will be receiving a call from us in order to set-up an appointment for a field exam.
