Water Right, Notice of Location and Appropriation

Notice is hereby given; That I, A. M. Strode, a Citizen of the United States do hereby locate and appropriate Two (2) cubic feet per second of the water running in this creek, to be diverted from this creek at the point at which this notice is posted which is about one half a mile up this creek from its mouth.

This notice is posted upon, and the water hereby appropriated and located is running in Boulder Creek, which empties into the South Fork of the Camas & Alene River, near the Town of Mullan, in Hunter Mining District, Shoshone County Idaho, and the place of this appropriation, diversion and notice is upon said Boulder Creek just below the mouth of Silver Creek, a tributary of said Boulder Creek. The water hereby located and appropriated is intended for irrigation, power and all other domestic purposes in and about the Town of Mullan, in Shoshone County Idaho.

The general course of the ditch, flume and other conduit by which the said water is intended to be diverted will be about four thousand feet in a generally northerly direction from the point of diversion. This water is principally to be used in the Mullan Water Works and in furnishing power domestic water and general family irrigation of yards and gardens in and about said town of Mullan. It will require about two years to complete the works necessary to fully divert and convey such water to its destination.

Witness my hand this 23rd day of October 1897
