

Item 13 Additional Remarks: Taylor Claim

- Based on what I have been able to learn from neighbors and meager records. A homestead patent on this parcel (Currently identified as 47N03W28-8600) was issued on January 14, 1913 to Meade Sharp. We understand that the water needs for the property was served by a hand dug well, establishing a prescient of beneficial water use on the property at that time.
- A new house was constructed, a 40ft well developed, a windmill installed and 600 cubic foot concrete cistern was constructed some time in the early 1920s.
- Around October/November 1957, Ivan Sorenson had a new well drilled and pump installed to supplement / replace the old well. This new well remains in current use.

Taylor

A handwritten signature in cursive script, appearing to read 'Taylor', written over the printed name.
