

On May 20, 1971, a water right permit was required to start using surface water.

On March 25, 1963, a water right permit was required to start using groundwater, except for domestic use.

Domestic use is:

1. The use of water for homes, organization camps, public campgrounds, livestock and irrigation up to $\frac{1}{2}$ acre of land, not to exceed 13,000 gallons per day. This does not include water for multiple ownership subdivisions, mobile home parks, commercial or business establishments.
2. Any use of water that does not exceed a diversion rate of 0.04 cubic feet per second and a volume of 2,500 gallons per day.

DATE WATER WAS FIRST USED

To the best of my knowledge & records, this property was purchased in 1955 by my grandfather Edward Phelps. The current trust was established by him & maintained to protect his interests.

This property was serviced by spring water from above the property adjoining the north side road. Diamond International disturbed this spring in the mid 70's (probably 1975) when the new bridge crossing to the north side road was established. Diamond was responsible for drilling and acquiring H₂O for this parcel. It has been maintained since for domestic use only.
