NOTES:

The P/D's were amended to correct the legal descriptions of the Division Points.

The Property is irrigated from three different systems. The South portion of the Property is irrigated from the P/D in sec 12 delivering system known as the Barker Ditch. The div point for this claim from the Barker Ditch is in the SW 1/4 of Sec 6 14S, 25E.

The second P/D is also a multiple use ditch system known as the Rice-Jay ditch which is divided in 14S, 25E Sec 6 NW 1/4. Water is redivided from the Rice-Jay ditch at two points, the first being at the point where the R-L ditch enters the Prop. the ditch from that point runs North, the second is approx 400 ft east of the first rediversion and the supply ditch from this point parallels the R-L ditch going east for approx 200'

Cont on pg 5.

RECOMMENDED POINT(S) OF DIVERSION AND SOURCE:				LOT	COUNTY	DIVERSION NAME
TWP.	RGE.	SEC.	1/4			
14S	24E	12			Cassia	Barker Ditch
14S	25E	6		1	"	RICE-LESSY Ditch
SOURCE: CASSIA CREEK (Also cross CR (sec 12) into Cassia Co.)						
TRIB: RAFT RIVER						

REVIEWED BY: KKE DATE: 6-14-95

SYSTEM DESCRIPTION:

cont from Pg 4.

The third P/D is from Cassia Co at the point where Cassia Creek enters the property in the NE NE of Sec 6 14S, 25E the ditch goes north along the county road. this ditch is shared by Barker (multiple rights) on ground to the north of this property. Virtually all of the P/D ~~area~~ is irrigated, including the lawn area around the farmstead located in the NE corner of the P/D.

Nothing portions of this right are taken from all 3 P/Ds and therefore the three ditch systems are considered to be portions of one system only. I recommend adding Cross Creek as a second source Flag claim. As this is to just better identify the right. the decree called ^{most} all stream rights as Cassia Co. No physical change was identified.

on 124 - Tom Otley

North end of property seeps water during irrigation otherwise dry.

Pump on Beecher property with a booster by farm steel. Has tile line from pump to booster then another bur. line running N along Beecher West border. Hand lines run off the buried and/or portable mainline

3 hand lines (1/4 mi) 33 heads
uses flow control for 5/16"

Booster pump is used to pressure the buried system only. It does not assist in lifting water from the well. The tile line between the well & the booster pump cannot be pressurized.

CLAIM # A43-00124

DATE PHOTOS TAKEN; 06-20-95

PICTURE SET # 1

This photo set shows the shared P/D between Ottley and Barker. The ditch runs north through the Ottley property, along the fence line to the county road, and then under the road to the Barker P/U. I found 1.16 cfs being diverted through the parshall flume with a nine inch throat. The weir was slightly soddied in at the converging section. There was a good drop after the crest. Although Cassia Creek was above capacity, the ditch system was not.

CLAIM # A43-00124
DATE PHOTOS TAKEN; 06-20-95
PICTURE SET # 2

This photo set pans from looking north on the left to south on the right and shows the P/U on either side of the Rice-Lessy ditch. Ottley takes water out at this point and carries it north in a ditch that follows the fenceline. I found a cipolletti weir on the lateral ditch that was in fair to poor condition. It was constructed from 1/4 inch steel plate, torch cut without a beveled crest. There was good fall behind the weir although the weir was slightly tipped.

CLAIM # A43-00124
DATE PHOTOS TAKEN; 06-20-95
PICTURE SET # 3

This photo set shows the next diversion from the Rice-Lessy ditch. The lateral parallels the R-L ditch to a point directly south of the southwest corner of the farmstead. At this point it swings north to the southwest corner of the farmstead. This diversion irrigates the ground north of the Rice-Lessy ditch and south of Cassia Creek and/or the county road. There was an 18 inch cipolletti weir made out of 1/8 inch steel on this ditch but it is bent and water could go under the weir. No significant water was being diverted on this date. You are looking north on the left to northeast on the right.

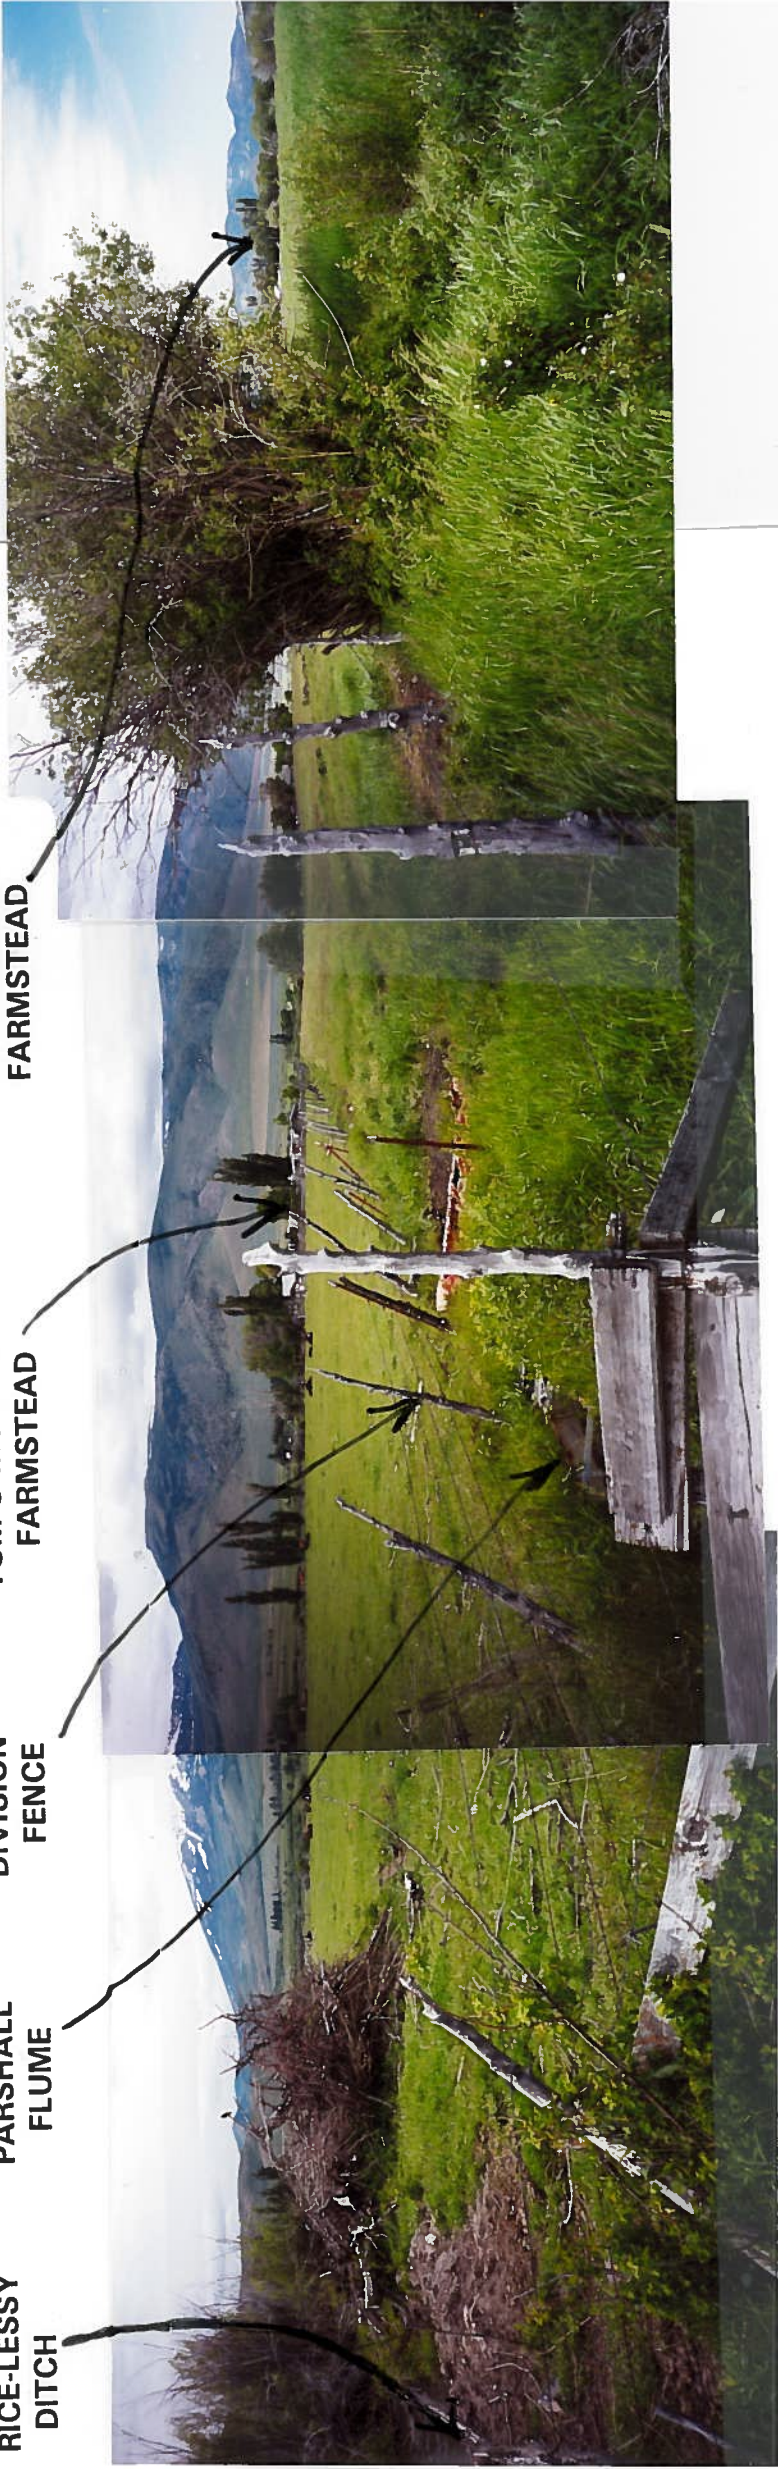

CIPOLLETTI WEIR

CLAIM # A43-00124
DATE PHOTOS TAKEN; 06-20-95
PICTURE SET # 4

This photo set was taken just east of the point where the Rice-Lessy ditch leaves the Tom Ottley P/U for A43-00124 on the east side of the P/U. The pasture on the left (west) side of the division fence is the P/U for A43-00124 and the pasture on the right (east) is the P/U claimed by Darrington under A43-00094, A43-00095, and A43-00441. The diversion structure and measurement device on the east side of the fence is for the shared delivery system for Darrington and Barker (base claim A43-00135). You are looking northwest on the left to northeast on the right. The Barker P/U lays north of the county road which is just north of Tom Ottley's mother's farmstead and north and west of Tom Ottley's farmstead. The measurement device was a parshall flume with a nine inch throat and appeared to be in fair to good shape. The ditch bank on the side of the flume only came up to approximately 1/2 of the top of the flume. Some minor gravel was observed in the bottom of the flume. Long-term water mark in the flume read 0.6 to 0.7 inches on the staff gauge which is 1.4 to 1.78 cfs. No water was being diverted on this date.
