Attachment to W.R. 43-00129

As is authorized under SB 1065, and after conversations with the Director of IDWR, this claim is filed to represent the current water usage authorized by this decreed water right wherein waters are diverted from both surface and groundwater at any or all of the points of diversion as described above. This claim does not change the irrigated acres as is outlined in the decree, but does include an additional point of diversion. This change to an additional point of diversion has been gradual, though sometimes erratic, over the years due to the increasing withdrawal of the supporting groundwaters to the Raft River in the area. This has led to the decline in the historic flow of the Raft River which has necessitated this change. The addition of a point of diversion does not expand or enlarge upon the irrigated acres which are authorized by the decree, nor does it relinquish the right to the historic diversion of waters from the Raft River, when they are available. This change merely adds to the decreed right an additional point of diversion.

This claim represents a portion of W.R. 43-00129. The lands for which it was first decreed have been divide amongst different owners, thus the claimed portion of this right should be segregated from the rest of the right.

Regarding:

Reid Stewart and Don Barnett

I met with the claimant and his water consultant, Mr. Barnett, today in the office. We reviewed all Mr. Stewart's claims. **Regarding the claims on Raft River we addressed the following:**

Acres in the W $\frac{1}{2}$ SW Section 24 need to be added to the place of use. These tracts were included in the decreed tracts identified in 43-046 for 2 cfs from Raft River priority date 1884. Mr. Stewart now irrigates this land by sprinkler from both Raft River and groundwater, and it appears that there was irrigation on those tracts and also cultivation beginning before 1962 and increasing in 1968 per aerial photos. It should be part of the permissible place of use at the large, or home ranch, portion of Mr. Stewart's property. ✓

Mr. Stewart currently uses two points of diversion from Raft River, both equipped with pumps. The downstream POD is at the bridge crossing the river at the SESESE Sec 23 T15S R26E where my preliminary recommendation identified it. There are currently two pumps attached to the bridge. The upper point of diversion is downstream of the point I identified in the NWNE Sec 26 and has been noted on the 1962 photo in file 43-046. Only 2 cfs under right 43-046 is valid for diversion at the bridge in the SESESE Sec 23. The balance of Stewart's rights, 8.19 cfs, should be diverted in the NWNE Sec 26. As this is not what is actually happening, Mr. Stewart needs to file a transfer so that he can divert his Raft River rights from either point of diversion. We will discuss the timing of filing this transfer during our next conversation.

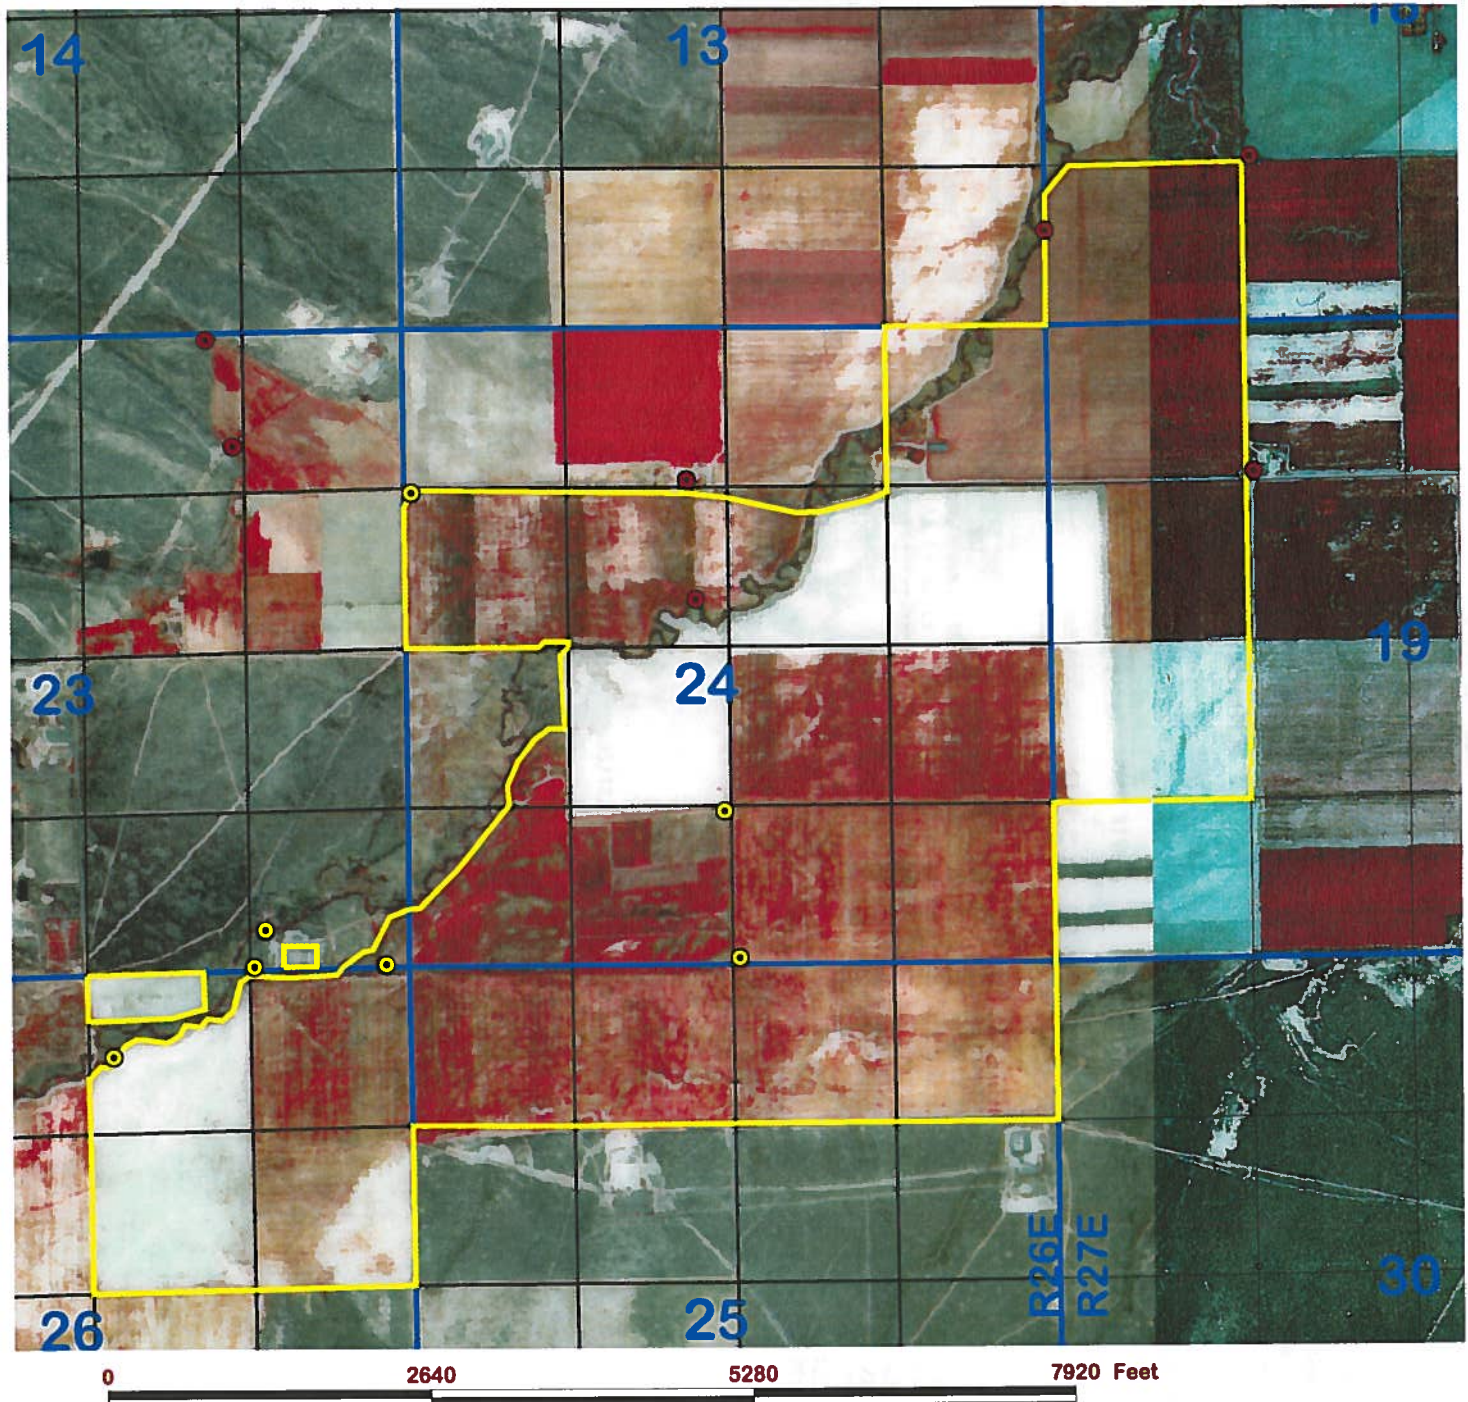

Stewart pumps the river water directly into pipelines that are integrated into his sprinkler system and co-mingled with ground water. He currently has 550 acres with surface water rights on approximately 1022 acres (this includes the added acres in Section 24 noted above). We discussed whether or not he wanted to file an enlargement claim based upon his decrees to enable him to use Raft River water on all his acres. Mr. Barnett asked if he ever used Raft River water exclusively to irrigate the whole acreage. Mr. Stewart said that he always had at least one well pumping. Based on this, Mr. Barnett questioned his need to file an enlargement claim on Raft River, and expressed concern that other users may find an enlargement claim objectionable. They will discuss it further and let me know.

Other than the possible enlargement and the need for a POD transfer they found the Raft River claims correct as filed provided acreage was added to the PPU in the SW of Section 24.
