CLAIM # A43-00146A & 00147A
DATE PHOTOS TAKEN; 7-1-94
PICTURE SET # 7

This photo set was taken just south of the southeast corner of the P/U and is looking north on the right to northwest on the right. There is a natural swale that carries water across the corner but irrigation water cannot be diverted from the swale to the surrounding ground. This corner is not recommended as a portion of the irrigated P/U.

CLAIM # A43-00146A, 00147A
DATE PHOTOS TAKEN; 6-22-94
PICTURE SET # 6

This picture set was taken from a point just north of the Barker ditch and east of the western boundary of the P/U by approximately 150 ft. You are looking north on the left to east northeast on the right. Irrigation occurs throughout the pictured area from here to the northern boundary of the P/U. I found ridge ditches carrying water north. Some patches are missed by the irrigation but in general I am recognizing this ground as irrigated.

BARKER DITCH

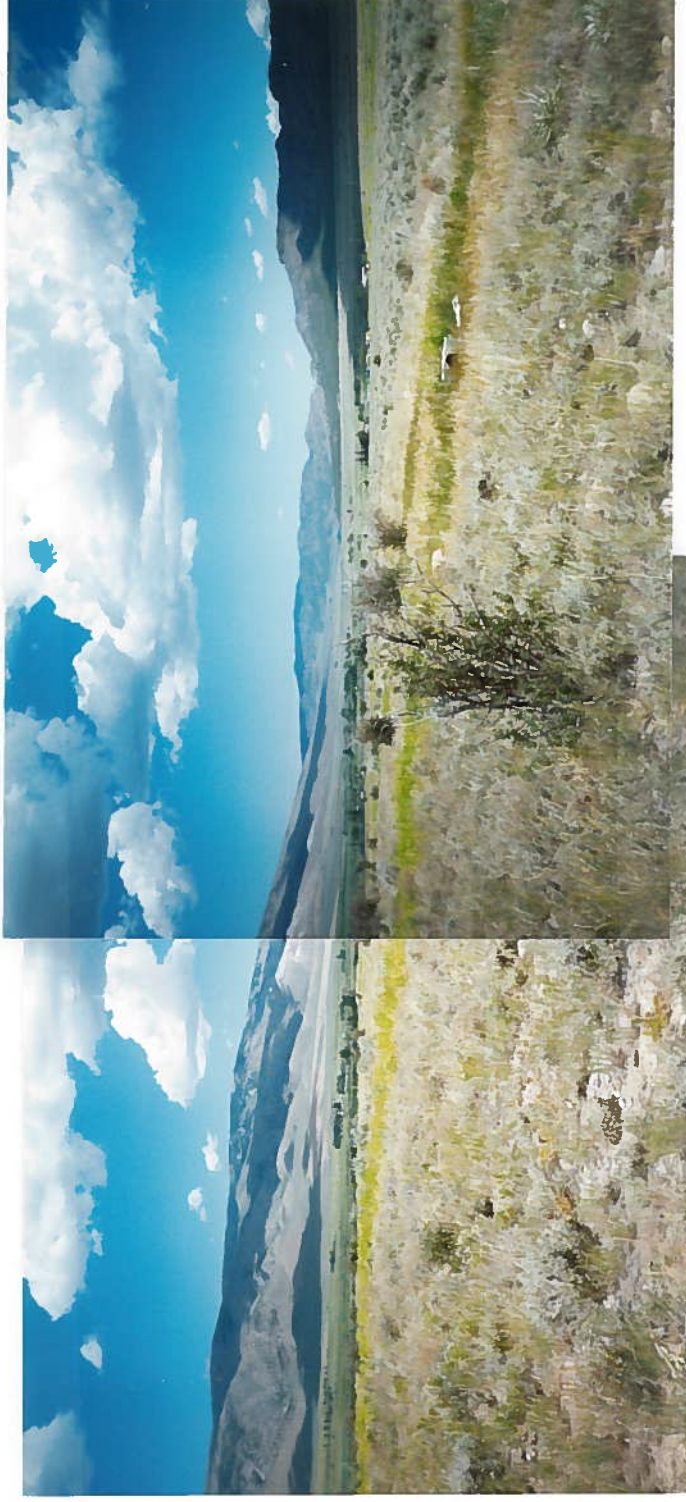

CLAIM # A43-00146A, 00147A
DATE PHOTOS TAKEN; 6-22-94
PICTURE SET # 5

This picture set was taken approximately 1/3 from the Ottley ditch toward the Barker ditch along the same ditch diversion shown in picture set 4. Note irrigation to the right of the ditch and dry sagebrush to the left.

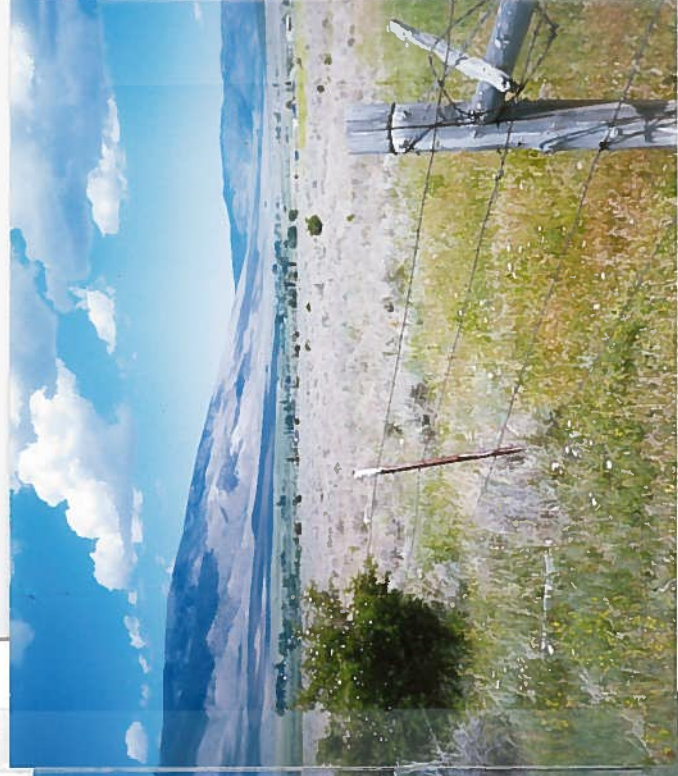

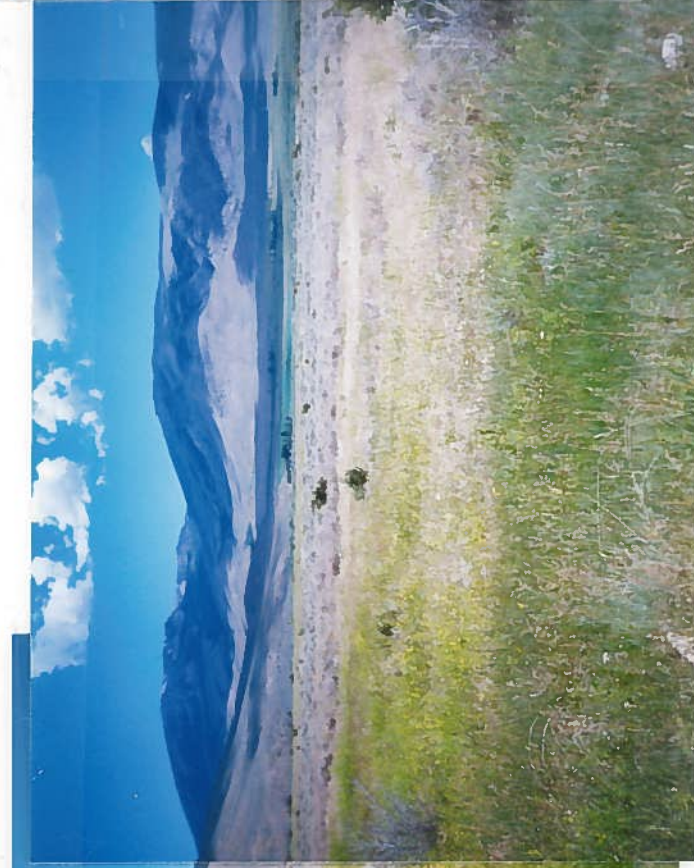

CLAIM # A43-00146A, 00147A
DATE PHOTOS TAKEN; 6-22-94
PICTURE SET # 3

This photo set shows the first diversion found after the Ottley ditch enters the property. You are looking northeast. The diversion ditch runs generally north from this point and irrigation from this ditch runs east to northeast until the water reaches a natural drain running northeast across the southeast corner of the P/U. The diversion ditch ends just north of the point where Hawker takes his water out of the Barker ditch to irrigate ground in the S1/2 of the NE1/4 (claim A43-00232A).

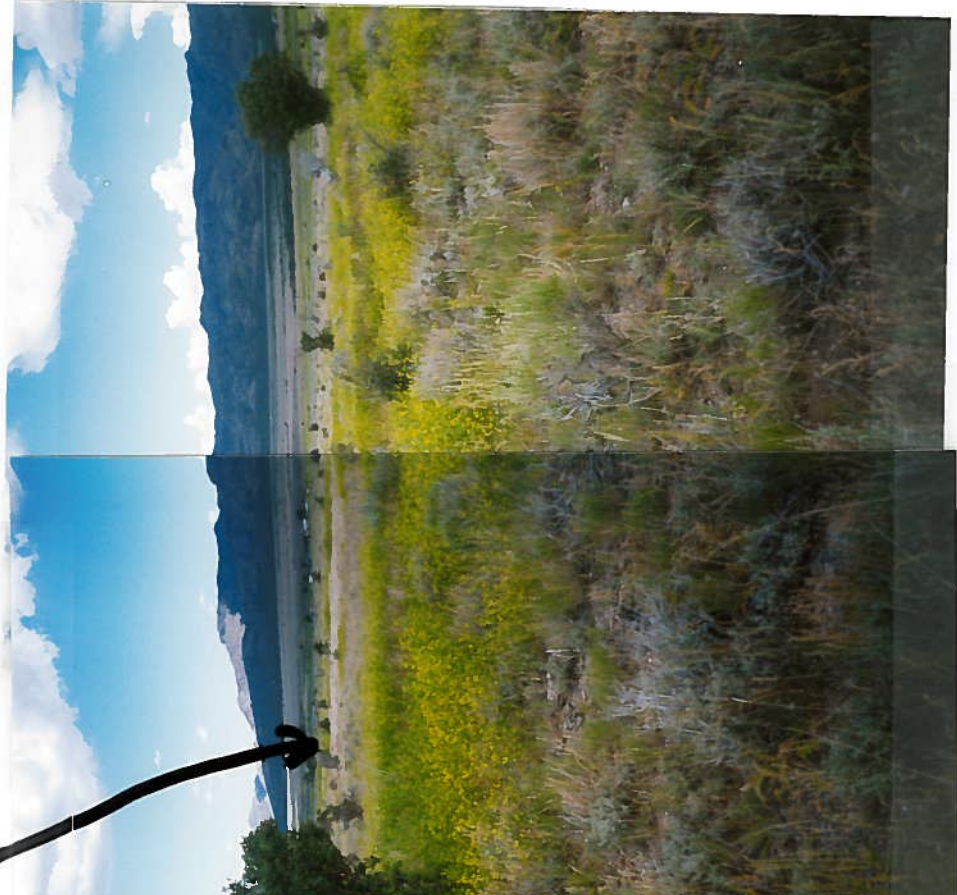

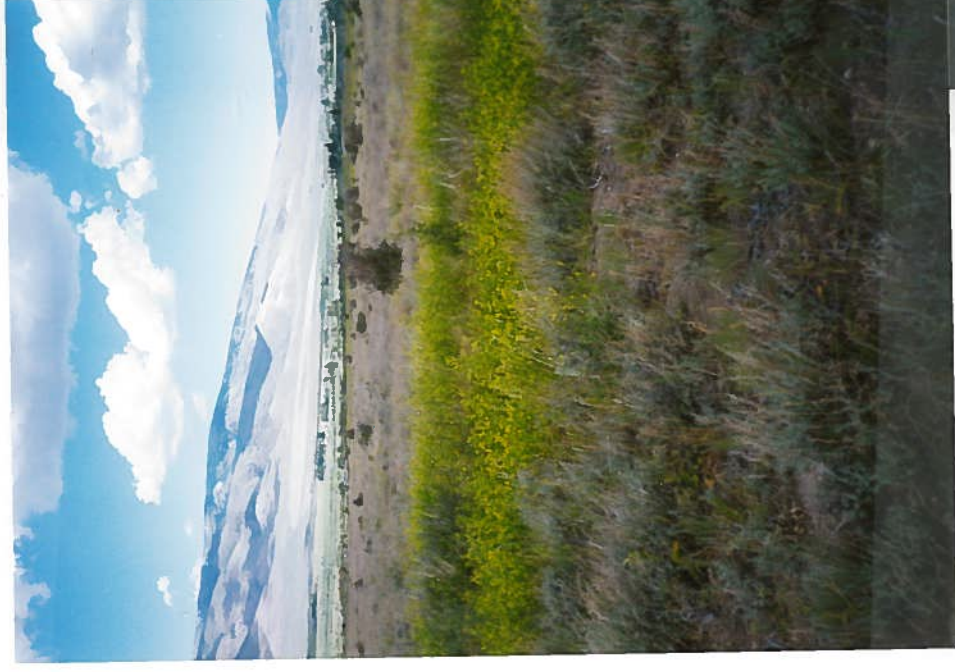

e southeast corner of the P/U at the poihere the Ottley ditch
re looking west on the left to east on the right. The
set 3 is along the ditch on the right. The sage brush shown
fence is the unirrigated triangle that is bounded by the
ss this portion of the P/U.

CLAIM # A43-00146A, 00147A
DATE PHOTOS TAKEN; 6-22-94
PICTURE SET # 2

This photo set was taken approximately 700 ft east of picture set # 1 and still along the Ottley ditch. I was standing south of the ditch and was looking northeast on the left to east on the right. There was some evidence of ditch water flowing north onto the claimed P/U but only from overflowing the bank of the ditch. No diversion works from the main ditch was observed. The first diversion from this ditch for the irrigation of acres under these claims is just visible in the distance.

DIVERSION DITCH

CLAIM # A43-00146A, 00147A
DATE PHOTOS TAKEN; 6-22-94
PICTURE SET # 1

This photo set was taken along the western boundary of the P/U and just south of the Ottley ditch (aka Highline ditch). You are looking south on the left to east on the right. No way of diverting from the main ditch was observed from this location and no evidence of irrigation in the pasture grass density was observed.

43-146B AND 43-147B SYSTEM ANALYSIS

These claims were originally decreed from Green Canyon Creek but are currently being irrigated from a system diverting from Cross Creek via the Barker and Otley ditches. I am recognizing the change in source as an accomplished change.

I found approximately 30 irrigated acres in the claimed place of use. The claimed place of use is within the decreed place of use.

The combined and claimed diversion rate for these rights is 0.40 cfs. This is less than 1" per acre for the found place of use.

these 2 might be a better description rather than a change in
Source for the Cassia Q source. There is some evidence of a diversion
from Green Valley that could have supplied water to the Decreed P/L.
One system is a ditch remnant that is on the hillside in sec 12.
That ditch has completely disappeared in some sections and is
not being recognized under any rights. The second system would
be possibly be related to Stan Lloyd's diversion system; P/L in

NOTES: There is only 1 P/D from Green Creek (ASGS name) and that is a shared system. ~~The~~ Green Creek is tributary to Cross Creek and the Barker ditch is the first diversion from Cross Creek. The change in source ~~has~~ was accomplished a long time previous (I can't recall when) & accept the change as valid.
