Re: *Subcase Nos. 37-4185 and 37-882*

Dear Special Master Booth:

Attached please find the SF5s for water right numbers 37-4185 and 37-882. In reviewing the recommendation for 37-4185 after the parties' signatures had been acquired, I noticed two errors that should be corrected before Special Master's Report and Recommendation ("SMRR") is issued. I made the changes by hand on the SF5 and initialed them separately. I highlighted them via this letter for the Court's convenience and to ensure the parties have no objection.

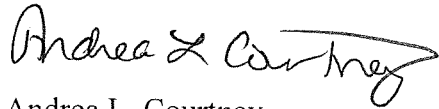

The corrections are as follows:

1. In Quantity, the underlined flow rate 0.270 cfs is correct. The flow rate .020 cfs should have been shown in the strike-through format.
2. In Other Provisions the first comment should read "The quantity of water decreed for this water right for stock water use is not a determination of historical beneficial use." The Department intends this remark to apply solely to stock water use and not to the irrigation purpose of use.

Both corrections better clarify the right and eliminate facial inconsistency. I apologize that I did not catch these errors sooner. The recommendation for 37-882 is correct as submitted and ready for the SMRR.

Should you have any questions please contact me at (208) 287-4810.

Sincerely,

A handwritten signature in black ink that reads "Andrea L. Courtney". The signature is fluid and cursive, with a long horizontal stroke extending from the end of the name.

Andrea L. Courtney
Deputy Attorney General
