RE: Snake River Basin Adjudication (SRBA)
Cassia County - #A43-00151
Identification Number Change

Dear Mr. and Mrs. Nye:

The Identification Number of your Notice of Claim to a Water Right has been changed from A43-00151 to A43-00151A. The suffix "A" has been added to the number in order to distinguish your claim from other claims that may claim a portion of the same original water right. This change does not affect your claim in any other way.

Enclosed is a computer-generated copy of your claim with the new Identification Number. Refer to this record number in any future inquiries or correspondence.

Sincerely,

Jeanie Robertson
Records Clerk

Water Resources

Dear Cindy Bird:

I am writing because of a concern on a water right on 43C Cassia Creek. When I became water master in 1991 Eugene Ward train me and the papers I received had a discrepancy on Kenny Hutchison and Afton Nye's water right. I talk with Eugene at that time, and he assured me his records were right. He gave me a copy filed with the county recorder April 22nd 1912. I also received a copy that Eugene Ward had sent in 1970. So we have always delivered the water according to these documents. Kenny has always received 1/2 of the water right 151. Which is 40 in. of 1894 not water right 152. We have enclosed the copies that we received.

If you have any other questions or I can do any thing to help clear this up please call me 638-5524 or 6705-5224.

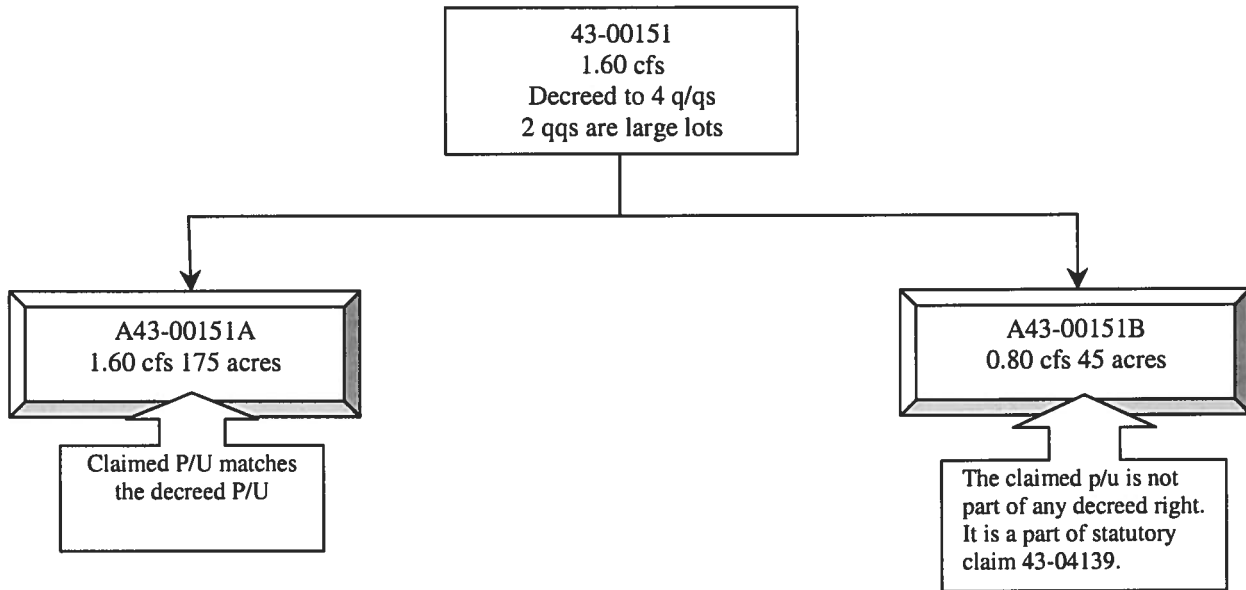

Tommy Hutchison Water Master

43-144A, 43-221, 43-251A & 43-10064

SYSTEM ANALYSIS

Water rights 43-144, 43-221 & 43-251 are included in the Jobe Adams decree, providing Cassia Creek water for irrigation. 43-10064 is a combination of statutory claims 43-4048 and 43-4049 for ground water for irrigation.

Nye claimed half of 43-144 as 43-144A, 0.9 cfs and 80 acres, 3/31/1886 priority. Allowances for Cassia Creek and a road remove 1 acre from this POU, for a recommended 79 acres total. The POD is identifiable in the imagery. 43-144B is claimed by Hall.

43-221 was claimed in full, 3.2 cfs for 154 acres in 4 quarter-quarter tracts, 10/1/1905 priority. The Jobe Adams decree provided 3.2 cfs for 4 quarter-quarter tracts (160 acres max). Five acres are out and claimed in 43-10064; allowances for Cassia Creek and roads reduce the recommended acres to 153. Flow is recommended at 3.06 cfs (0.02 cfs per acre). The late priority indicates high water that is regulated early. The decreed POU overlaps in one quarter-quarter with 43-251, but Nye's claim for 43-251 does not overlap. Two PODs are recommended as claimed; one coincident with 43-144A, the other coincident with 43-251A.

43-251 is only partially claimed by Nye as part A. The Jobe Adams decree provided 0.8 cfs for irrigation of 3 quarter-quarter tracts, April 1, 1894 priority. Nye claimed irrigation of 77 acres in 2 quarter-quarter tracts, and 0.533 cfs (two-thirds of the flow). Allowances for roads reduced the recommendation to 76 acres. Diversion rate is recommended at 0.53 cfs. The point of diversion is also used by 43-221. The remaining portion of 43-251 is unclaimed.

None of the above recommended places of use overlap with each other.

43-10064 claims 5.7 cfs for irrigation of 311 acres, ground water with a priority of March 15, 1939. Two points of diversion are claimed. The place of use completely overlaps all of the above recommended rights for Cassia Creek water. 43-10064 is a combination of statutory claims 43-4048 and 43-4049, originally filed with the department in August 1972. No other ground water rights were found to be appurtenant to this property. Evidence of priority is an agreement to purchase power dated 5/25/1955. Although this agreement only appears to list one of the two wells, the recommended priority date is advanced to 5/25/1955 based on the agreement. Imagery from 1962 supports irrigation of this tract. Allowances for roads, Cassia Creek, etc., reduced the recommended acres to 308. Theoretical calculations of historic diversion rates exceed the claimed diversion rate so that the claimed flow of 5.7 cfs is recommended.

All of the above rights are conditions so that when combined shall provide no more than 0.02 cfs per acre.

RECOMMENDATION SUMMARY

43-144A	79 acres at	0.90 cfs, Cassia Creek, priority 3/31/1886
43-221	153 acres at	3.06 cfs, Cassia Creek, priority 10/1/1905
43-251A	76 acres at	0.53 cfs, Cassia Creek, priority 4/01/1894
43-10064	308 acres at	5.70 cfs, Ground water, priority 5/25/1955
Total		10.19 cfs

ONE INCH PER ACRE LIMITATION

Prepared by Scott King

Claims review notes and narrative

Claimants: A. D. Nye, Ann Nye

43-149, 43-150, 43-151A, 43-152, 43-2535

SYSTEM ANALYSIS

Water rights 43-149, 43-150, 43-151 & 43-152 for Cassia Creek water are included in the Jobe Adams decree. Right 43-2535 is a license for ground water. The four decreed Cassia Creek rights all claim irrigation of the same acres in four quarter-quarter sections (175 acres total). The decree lists the same quarter-quarters but did not list a specific number of acres (typical for this decree). The ground water license (43-2535) provides 130 acres within the same quarter-quarters.

GIS analysis indicates a total of 172 irrigable acres in this tract with subtractions for roads, a ranch, and for Raft River.

The claimed point of diversion for surface water is identifiable on the imagery and appears to match the identified point in the file map. The ground water well is located near the surface water diversion and matches the licensed point.

All of the above rights, except for 43-151, were claimed only by Nye. 43-151B is claimed by Hutchison as 0.8 cfs for 45 acres. Part A is claimed by Nye at 1.6 cfs for 175 acres. As decreed, 43-151 provides 1.6 cfs for irrigation of four quarter-quarters (maximum possible of 177 acres in this tract, 172 irrigable). Although we were unable to find department records of this split, a statement by the watermaster indicates a long history of delivering this right with a 50/50 split (0.8 cfs delivered to each party). Therefore, 43-151B is recommended for 0.8 cfs, 44 acres. 43-151A is recommended for 0.8 cfs and 128 acres (172 irrigable less 44 for part B).

Three rights are recommended at a total 172 acres (43-149, 43-150 & 43-152); the remaining rights provide a specified number of acres within the 172-acre permissible place of use.

RECOMMENDATION SUMMARY

43-149	172 acres at	1.20 cfs, Cassia Creek, priority 4/30/1880
43-150	172 acres at	0.40 cfs, Cassia Creek, priority 4/30/1881
43-151A	128 acres within a 172 acre PPU at	0.80 cfs, Cassia Creek, priority 4/01/1894
43-152	172 acres at	0.80 cfs, Cassia Creek, priority 4/01/1905
43-2535	130 acres within a 172 acre PPU at	2.04 cfs, Ground water, priority 8/31/1961
	Total	5.24 cfs

ONE INCH PER ACRE LIMITATION
