Attached is a proposed settlement including a layout visually showing the change in Place of Use. Please let me know if this is acceptable. I attempted to generate a POU for the additional 13.9 acres as close as possible based upon the terrain and my recollection of the property. It may not be exact however it does recognize the maximum number of acres as discussed.

PROPOSED SETTLEMENT RECOMMENDATION ANALYSIS RIGHT 43-192

The following shape is generated in an attempt to resolve the POU discrepancy for 43-192. The shape utilized the original recommended shape and added 13.9 acres in Sec 12 SWSE (the additional shape in that QQ). The ultimate result is that the proposed recommendation now would match the approved transfer acreage. I could not identify any physical features to establish an exact boundary therefore I generated a field boundary in the same basic shape as identified on Transfer 3580 but focused on creating a shape that matched the acreage established through that transfer.

Along with the addition of the 13.9 acres the proposed recommendation the diversion rate is changed to recognize the 0.80 cfs.

The remark regarding forfeiture will be deleted. The changes are shown on the proposed recommendation in cross out underline format and further highlighted in yellow.

As Stan Lloyd agreed that the two rights when combined would still be limited to the irrigation of 49.9 acres during the Motion to Set-a-side Decree hearing held on May 6, 2010 the combined POU remark is not being modified. Also as the combined POU is not being changed the combined diversion rate is not being changed. It still reflects one inch per acre based upon the 49.9 acres.
