RE: Potential Delivery Problems Between Waterusers in Utah and Idaho of the Waters of Clear Creek

Dear Bob:

As a result of this department's investigation of Snake River Basin Adjudication (SRBA) claims in the Clear Creek area we have been made aware of a potential delivery problem with regard to splitting of the water of Clear Creek between the waterusers of Utah and Idaho. As you may know, the methodology for splitting the water between Idaho and Utah was decreed by U.S. District Court, District of Utah, Northern Division in the case of Albion-Idaho Land Co. vs Naf Irrigation Co., et al. dated 1/13/1937. My purpose in writing you about this matter is to inform you of the situation and to seek your comment and support in rectifying the current situation.

On August 22, 1994, department staff from our Southern Regional Office conducted field reviews in the Clear Creek area and met with Vern Kempton, watermaster for Clear Creek, and members of the Naf Irrigation Company. They confirmed that the gauging site specified in the decree located near the center of the SW $\frac{1}{4}$ of Sec. 1, Twp. 14N, Rge. 13W, S.L.M. had been washed out by flood. Mr. Kempton explained that presently the methodology for determining flow measurement specified by the decree for turning water to Idaho is compiled from measurements taken thru the delivery weirs of the Utah users further down the creek and that the methodology for determining flow measurement for turning water out of Idaho back to Utah is determined by using the Idaho weir located in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ Sec. 27, Twp. 16S, Rge. 27E, B.M.

Since the current measurement scheme uses measurement points relatively far downstream from the specified gauge site and does not account for the large losses associated with Clear Creek, the potential is that water may not be turned to Idaho as early as possible and is turned away from Idaho sooner than necessary. These concerns were discussed with Mr. Kempton and other members of the Naf Irrigation Co. on August 22, 1994, who were open to rectifying this situation by moving the site for making the critical measurement to a site near the old gauge site specified by the decree.

SRBA Case No. 92-00014

ORDER FOR DIRECTOR'S REPORT

This case is a dispute between several water rights holders on Clear Creek in the state of Idaho. The SRBA court has jurisdiction because the case requires a determination of one or more elements of the disputed water rights. *Young Harvey Walker v. Big Lost River Irrigation District*, 856 P. 2d 868, 124 Idaho 78 (1993). During the course of litigation, it has become apparent that trial

of the several water rights at issue is likely to result in duplicative litigation when the Clear Creek Stream System is reported in a Director's Report as part of the SRBA.

To avoid a multiplicity of litigation between these and other parties on Clear Creek, this court enters the following order:

1. The Idaho Department of Water Resources shall prepare a preliminary Director's Report for all, approximately thirty, water rights claimed in the Snake River Basin Adjudication on Clear Creek. This report shall be prepared and submitted to the court on or before February 27, 1998.
2. The court will serve copies of the preliminary Director's Report on each claimant included in the report.
3. All claimants included in the Director's Report for Clear Creek shall file objections to the report on or before March 27, 1998.
4. Any party wishing to file a response to an objection to the preliminary Director's Report shall file the response with the court on or before April 10, 1998.
5. A scheduling conference on all objections and responses filed to the preliminary Director's Report for Clear Creek will be held on Monday, April 13, 1998 at 10 a.m. in the district courthouse for the Snake River Basin Adjudication located at 253 3rd Avenue North, Twin Falls, Idaho. All parties and counsel are required to be personally present at this scheduling conference.
6. Parties in the *Jones v. NAF Irrigation Company et al* case pending before the court shall be allowed to continue discovery on issues raised in the pleadings.
7. The prior scheduling order and trial setting in *Jones v. NAF Irrigation, et al* is hereby vacated in favor of the schedule set forth in this order.

IT IS SO ORDERED.

IDWR Employee/Agent Allen Merritt Date July 7, 1995

Contact person(s): Jeff Sessions, Mont Campbell, Blaine Campbell, Vern Kempton, Larry Kempton, Steve Holmgren

Nature of Contact: Meeting at IDWR Twin Falls office on 7/6/95. They came in to discuss the advertised transfer filed by Jeff Sessions. They brought Jeff so he could hear the discussion and understand their concerns. Of particular note or concern was two of the rights advertised in the transfer. The first was the portion of the decree 43-00286B. The original right was decreed to Settlers land for 60 cfs. Since this group was from Utah and Vern Kempton was the watermaster which delivers water in Utah and turns water to Idaho they did not have a record the "Idaho decree" (Jobe Adams) and only showed that they delivered water with this priority to Clear Creek Ranch (160 inches) and the Naf Store (160 inches). (Clear Creek Ranch is Harold or Ray Jones and claims 160 inches under A43-00286A; the Naf Store has not yet filed a claim) I provided them copies of the "Idaho decree" as well as the one it superseded and the Decree setting delivery between Idaho & Utah. The Utah users indicated that the 60 cfs has not been used other than what they show. They showed me a copy of a denial of transfer in the name of Omin (Spelling?) for a portion of the right. They interpreted this to show that all parts of the right had been abandoned. I told them I interpreted it as only the Omin part was gone and the other parts I didn't know about but would be determined in the SRBA. They asked about our delivery records and I told them I knew of none. I explained that I understood that Vern Kempton was the watermaster organized under Utah law and although he delivers water to Idaho I did not think he has been recognized by Idaho under our watermaster statutes. I told them I knew of no organized district in Idaho and did not know of any delivery records.

They also were concerned about right 43-10116 for 20 cfs. We discussed the source as described and the amount. They were confused since both sources are listed in the claim and they also didn't understand the basis of the claim as beneficial use and

COPY

exactly the status of the claim. They indicated that in Utah Rice Creek is decreed and used. They were not certain that their priority was earlier than the 1900 being claimed. I told them if it was then the claim should not interfere. I also explained that the claim was undergoing SRBA review and may not be found or recommended as claimed. Larry Kempton indicated that he didn't mind Sessions using the water after he got thru with it and he also indicated that he may wish to build a pond and didn't want this record to interfere with his plans. I stated that if he was in Idaho what ever future plans he might have would be junior to Sessions right what ever it might be; but, since he was in Utah I was not sure. They discussed a potential agreement and if Idaho would recognize it. I told them that if Session's and Kempton's made some sort of agreement that the department many condition approval of the application acknowledging the agreement existed but the department would not enforce a private agreement between parties.

During the discussion Mr. Holmgren met with Kelly Christensen and filed on some decrees that the Utah guys indicate he is delivered but had not yet claimed.

I provided protest forms to the parties and then they left.
