PRE EXAM REVIEW
FOR CHARLES WARD AND DEWARD HALL

Apparent conflict with overlap of 43-215 as decreed Vs how it was claimed.

WARD CLAIMS

43-215 pt 43-110	43-11298	7-1-86		2.80	

DIVERSION RATE ANALYSIS

Surface water claims based upon 43-214 not being claimed and ½ of 43-215 not being claimed and a found place of use of 230 acres.

43-10815 2.20 cfs
 43-110 1.60 cfs
 total 3.80 cfs/230 acres = 0.17 cfs/acre
 adding
 43-214 0.40 cfs
 43-215 (½) 1.20 cfs
 total 5.40 cfs/230 acres = 0.023 cfs/acre

The final rate of 0.023 cfs/acre makes the assumption that a portion of 43-215 is still appurtenant to the property and would be claimed along with 43-214.

~~The claimed Cassia Creek decreed rights are all for the southern portion of the claimed place of use. 43-214 and part of 43-215 were decreed to the NWNE and the NENW of sec 23. Neither right has been claimed.~~

43-214 and ½ of 43-215 were claimed on 12-8-2000 as described above as **43-11298**. Combined limitations are as follows. Combination of 43-110 and 43-215 covers the entire place of use, no acre or diversion rate limits required.

For **43-10815**, the base rights were decreed to the southern place of use only, therefore this right is limited to the irrigation of 151 acres within the PP/U. The combined diversion rate does not exceed 1 inch per acre so no rate limit is required for this right.

43-214 was decreed to the north place of use and is therefore limited to 79 acres within the PP/U. When the surface water rights and groundwater rights are combined, they are limited to 1 inch per acre.

Groundwater rights **43-2452** and **43-2459** are from the same point of diversion and for the same place of use. They are limited to 145 acres within the PP/U. The claimed place of use totals the licensed place of use but has been shifted slightly between some of the claimed quarter/quarters.

OFFICE VISIT BY CHARLES WARD 12-8-2000

Charles filed a late claim for 43-214 and amended 43-110 to include 1.2 decreed under 43-215 (½ of the decreed 2.40 cfs). This claim is to be renumbered to identify the combined status of this claim. Renumbered to 43-11298 on 12-14-2000. We discussed the system as it currently exists. He indicated that there is only one Cassia Creek diversion that he uses and that p/d is just west of his property in the SWNW of sec 23. The well has not been changed. There is a few acres in the NWNE that is not farmed but Charles indicated that that ground will occasionally receive irrigation water. There is a high point in the southeast corner of the NESW that is not irrigated.

DIVERSION RATE ANALYSIS

Surface water claims based upon 43-213 and 43-122 not being claimed and with a found place of use of 195 acres.

43-10793	4.00 cfs
43-411	1.20 cfs
total	5.20 cfs/195 acres = 0.027 cfs/acre
less ½ of 43-215	1.20 cfs
total	4.00 cfs
adding	
43-43-213	0.80 cfs
total	4.80 cfs/195 acres = 0.025 cfs/acre

Note that the last entry indicating a 0.025 cfs/acre still excludes the 1.20 cfs under 43-122. The assumption being that the claimant did not want to claim this right, as the priority date is 4-1-1904.

43-411 was decreed to the northern portion of the claimed place of use and is limited to 117 acres within the PP/U.

43-121 is also appurtenant to the same north 117 acres while 43-215 is appurtenant to the southern 78 acres. When combined they equal the found place of use, therefore no combined acre limit is required.

43-2326 was licensed on 195 acres and claimed on 196 acres. The found acres are 195 acres and the recommendation. There is some shifting between quarter/quarters between the claim and the licensed place of use. This right was also licensed for irrigation and domestic use. It appears that the domestic use is a separate system and that the right should be split to better identify the uses. The claim adds the domestic well to the claimed points of diversion.

43-2541 is from the same points of diversion (less the domestic well) but was licensed for 184 acres rather than the 195 acres licensed under 43-2326.
