Other			Actual water use was and is by humans and livestock. Records indicate more than 1000 head of sheep and shepards.

Discrepancies between amended claim and subsequent objection to ADR:

- 1) Claimant claims one house under total consumptive use but asserts in objection under the Purpose of Use that there should be more than one house.
- 2) Claimant claims a total quantity of .81 cfs and .04 is recommended. Claimant then objects and asserts that he is entitled to .12 cfs domestic and .04 cfs stock for a total quantity of .16 cfs. Not even close to the .81 that he originally claimed.
- 3) POU is recommended as claimed. However, claimant's objection asserts that one of the POU's should be NWSW rather than NWSE.

¹ The items mentioned in this column are what the claimant requested in the objection.

2. Letter from claimant includes exhibits and states that exhibits 8-15 substantiate the priority date of 1912 for springs 4 and 5. However, the earliest date I can locate is in Exhibit 16 which appears to be some type of title transfer that was recorded by BLM and was issued 2-12-1930 but refers to an authority date of December 29, 1916: Homestead Entry-Stock Raising (39 Stat. 862).

⁶ BLM filed a response to Lightforce's objection which was received 08-13-09.

1. Claimant claims a priority date of 01-24-1917, Department recommends 11-28-1925 and then claimant objects and states there should be three separate priority dates for three separate coordinates. It should be noted that none of the three priority dates that claimants lists in his objection match the priority date he claimed.
2. Claimant seems to be confused about the element of Source. He claimed Grouse Creek in the written version of his claim. The typed out version he claims Spring Fed Creek Trib. to Salmon River. In his objection he states it should be Grouse Creek and then provides coordinates for that source.
