Simplot Groundwater System
A43-02536, A43-04197, A43-10591, & A43-10592

The general place of use is covered in its entirety by 43-02536. The statutory claim should be recognized for additional acres and diversion rate only if it can be demonstrated that the delivery system was enlarged prior to the mandatory permit statutes. The following is a timeline documenting the development of ground irrigated under the groundwater system.

43-02536	September 11, 1961	An Application for Permit is filed for 760 acres. At 8.00 cfs.
	April 29, 1966	Certificate of Completion of Works submitted. Identifies 8.00 cfs from the permit with a system capacity of 3.22 cfs and the same as shown on the permit.
	May 27, 1966	Field examination conducted by the department. Identifies a 125-hp pump discharging into a pond and then open ditch. Measurement of diversion 3.22 cfs. P/U = 616 ac
	June 29, 1966	License issued for 3.22 cfs with the capacity also identified as 3.22 cfs. P/U = the same 616 ac as shown on field exam.
43-04197	June 30, 1983	Statutory Claim submitted. The claim was for 2.40 cfs for 120 acres. (W1/2NW1/4 of sec 12, also part of 43-02536) and (NW1/4SW1/4 of sec 13, a new quarter/quarter). The claim identifies the system as a 200-hp pump to a mainline. No evidence of priority submitted at this time.

Preliminary Analysis:

Based upon the above information it appears that most if not all of the ground identified in the statutory claim was developed after 1966 and that the delivery system was enlarged after that date to deliver additional water.

RECOMMENDATION FOR GROUND WATER SYSTEM

43-2536 is still being used basically as licensed and is therefore recognized for the licensed elements. This claimed place of use overlaps with decreed surface water rights and 3 tile drain rights.

There is not enough information available to be able to recommend 43-4197 as a beneficial use right with a 1961 priority date. After calculating acres through arcview I did not find any additional acres beyond the licensed acres being irrigated.

The ground in Sec 15 and the SWSW of Sec 14 were not part of the licensed place of use and I did not observe any pipeline delivering water to that ground. The highest point of those tracts is in the SWSWSE of Sec 15 with the general lay of the ground is downhill to the northeast from that point.

The NWSW of Sec 13 is irrigated with Cassia Creek water from a point of diversion in 13S, 26E, SEC 23 NWSWNE (Shared with Higley). Water enters the 40-acre tract in the southwest corner and flow is northeast across the property. I did not observe any method for groundwater to reach this tract. The decreed right appurtenant to this tract is 43-251, which has not been claimed by Simplot at this time.

My recommendation excludes the 5 tracts identified above. I am recognizing groundwater as follows;

43-2536 616 acres at 2.40 cfs

43-4197 DISALLOWED – P01 NO LAWFUL APPROPRIATION

This right could have been disallowed based upon P06 NO BENEFICIAL USE FOUND, as I did not identify any additional irrigated acres being irrigated.

RECOMMENDATION FOR SURFACE WATER SYSTEMS

The claimed place of use covers ground originally decreed in the Jobe Adams decree under 4 different systems. Three of those have been claimed. 43-251 is appurtenant to SWSW of Sec 14 (and other ground) but has not been claimed as of the date of this report. I am excluding this ground from the recommended place of use. I am recommending the decreed surface water rights as shown in the table below. All of the rights are recommended as part of a common PP/U and show all Cassia Creek points of diversion. The system combined diversion rate limits are based upon the found acres within the decreed place of use. The acre limits for the combined systems are based upon the found acres within the original decreed place of use.

The current farm consists of all or part of 4 parcels identified in the Jobe Adams Decree.

RECOMMENDATION FOR TILE DRAIN SYSTEMS

I found three tile drain systems during my field verification exam on 8-22-2000. There are two claims against those systems. The only evidence of priority for the tile drain systems is a warranty deed identified as DEED RECORD No. 49 dated November 6, 1945. That instrument indicates that the tile system diverted from the NWNW of Sec 13 was to be shared for stockwater purposes on property to the east of the current Simplot property. Although the tile systems were no doubt in for a number of years prior to this date, I am recommending this right with an 11-9-1945 priority date (the date of that instrument).

Exact acres under each system are somewhat ambiguous and appear to have changed somewhat over the years. The irrigation system was developed under a gravity flood system therefore I have used ditch boundaries as far as possible to calculate the acres irrigated under each system. Each right has claimed stockwater along with the irrigation. Stock use was observed on the property during the field exam. The claimed irrigation diversion rate for each claim is less than 1 inch per acre and the discharge observed was minimal at exam time. The system has the capacity to carry in excess of the claimed rate therefore I accept the rate as claimed.

I am recognizing 43-10591 for the claimed point of diversion and for the acres northeast of that point. I found a total of 33 irrigated acres.

I am recognizing 43-10592 with one drain as the source for the irrigation of ground northeast of that point of diversion also. I found 30.3 irrigated acres under this system.

The third tile system has not been claimed as of this date.
