1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

This quantity of water is not adequate.

2. Describe the changes you wish to make in the proposed recommendation:

I wish to change the quantity from 0.340cfs to 0.60cfs.

3. Give a brief explanation as to why you disagree with these portions.

Jim Zimmerman, who worked for the SRBA, was here last year and measured the flow, and that we were currently using about 0.60cfs. That was our normal usage. Due to coarse, loose soil conditions I do not believe that 0.340cfs will even get to the end of the irrigated land, let alone get it damp.

I AGREE with this proposed recommendation: no changes need to be made.

Field Exam Notes

Date of Exam: August 1, 2005

The Point of Diversion (POD) is located on Slate Creek, tributary to the Salmon River, and has a GPS location of $N45^{\circ} 38' 14.9''$ by $W116^{\circ} 14' 58''$ (Photo 1). The diversion consists of a short ditch that comes off the north side of Slate Creek and empties into a concrete check where water is diverted to an earthen ditch. Excess water is diverted back into Slate Creek (Photo 2). Water diversion for beneficial use is controlled by a board in the check.

The conveyance ditch (Photo 3) continues to and along side of the POU where it periodically branches off to supply the fields. The mode of irrigation is flood irrigation.

Four (4) flow measurements using the orange peel method were taken over a fifteen foot (15') length of the conveyance ditch (Photo 3) for a total time of twenty-two (22) seconds. An average profile of the ditch along the measurement length is diagramed below (not to scale).

It should be noted that the soil the ditch is made of is very sandy and that Glenn Chandler, the co-claimant, stated that he loses a large amount of water in conveyance along the $\frac{3}{4}$ miles of ditch.

Of the quarter of quarters listed in the claim for the POU, SWNW, Sec. 31, Rge. 2E, Twp. 27N BM. was found not to be a part of the POU.

A conversation with Mr. Chandler and a search of the Idaho Department of Water Resources (IDWR) public web site indicated that there are no other water rights that share a POD and/or POU with this claim.
