Dear Claimant:

Please find the enclosed copy of the Notice of Completed Administrative Proceeding, which the department has filed with the SRBA Court regarding the above referenced claims. You have received this notice pursuant to SRBA Court Administrative Order 11 requiring IDWR to report to the court and interested parties any pending changes to adjudication claims in basins for which a Director's Report has been filed with the court.

Please contact this office if you have any questions about the notice or the administrative process.

Sincerely,

HOME PLACE ANALYSIS

43-319, 43-320, and 43-321 were decreed to the same place of use and are all decreed from Cassia Creek. 43-00353 was decreed from Cassia Creek for property east of the previously identified system. This is the same ground that 43-354 was decreed for. The two decreed systems are being operated as one and has for many years, therefore I am recommending the combined place of use as common and limiting each of the rights to the number of found acres within the historic decreed place of use.

The four claims from Cassia Creek are diverted out of Cassia Creek at three different locations. One point of diversion is a shared system delivered through the Rice Lessey Ditch. Two other points of diversion are on the property of the western neighbor's property. One ditch is on the north side of the Cassia Creek and the other is on the South side that allows Cassia Creek water to reach the entire recommended place of use. The combined diversion rates for the Cassia Creek rights do not exceed one inch per acre for the recommended place of use.

43-354 was decreed from Connor Creek at 0.60 cfs. It is currently claimed on 20 acres within the decreed place of use. Using GIS I found 27 acres. An amendment to this claim is necessary to cover all 27 acres under this right.

43-10259 is claimed out of springs related to Kemp Hollow and/or a companion channel. The historic point of diversion may have been further north than the place of use, however, water is diverted at the point where the channel crosses the fence line and is carried in a ditch easterly to irrigate the recommended place of use. I am recognizing that point as the point of diversion for this system. I am recognizing the source as an unnamed stream. The source is often dry by the end of the irrigation season as was the case at the time of the field exam. I was unable to obtain a measurement on the system. With ditch maintenance, the system could carry the claimed one inch per acre as claimed, therefore I am recommending this right at the claimed rate.

The place of use irrigated only from this source is approximately 34 acres. The water from this source can also enter the ditch from the north Cassia Creek diversion and irrigate additional ground. I am recognizing the 48 claimed acres as valid within the irrigated ground north of Cassia Creek.

The claimed priority date is loosely based upon a decreed right listed in the Darby Vs Jones 1903 decree. That claim listed an April 30, 1886 priority date. A copy of the page listing that use was submitted as evidence of priority. As the Jobe Adams decree superceded the Darby Vs Jones decree, and there is some evidence that the system has always been in existence, I am recommending a priority date of one day after the Jobe Adams decree or 11-19-1928.

43-10258 is claimed for irrigation from a spring for the irrigation of 10 acres. I did not find any diversion or irrigation practices in the area of the claim. After discussing this with John Nye, he indicated that there was no actual irrigation. He really wanted to protect the water for stock water use. I indicated that the claim could be amended to claim the in-stream use. As of this date the amendment has not filed. Therefore, I am recommending this claim for disallowal.

43-4115 was claimed under the historic system consisting of a hydraulic ram and pipeline system to the yard and a diversion from the channel to irrigate a small portion of ground along the eastern portion of the recommended place of use. The ram system has not been used for many years and I am not recognizing any use with that system, however, I did find 5 irrigated acres as previously described. I am recognizing this right as valid for the 5 acres at 1" per acre and with a priority date as claimed. It probably was being used at the time of the Jobe Adams decree for the irrigation of the same 5 acres but was not claimed as such.
