PUBLIC HEARING BEFORE THE CANYON COUNTY
BOARD OF COMMISSIONERS

LEGAL NOTICE IS HEREBY GIVEN, that the Canyon County Board of Commissioners will hold a public hearing at 6:00 p.m. on Tuesday, December 20, 1994 in the First Floor Public Meeting Room, Canyon County Courthouse, 1115 Albany, Caldwell, County of Canyon, Idaho.

The purpose of this public hearing is to take public testimony concerning a draft separate ordinance providing for application of Comprehensive Plan and implementing ordinances for the Area of City Impact for Caldwell, Idaho pursuant to Idaho Code Section 67-6526. Said ordinance shall provide for one of the following:

- [1] Application of the city plan and ordinances to the area of city impact; or
- [2] Application of the county plan and ordinances to the area of city impact; or
- [3] Application of any mutually agreed upon plan and ordinances to the area of city impact.

The Impact Area boundary being generally described on the north is the Union Pacific Railroad Tracks, State Highway 44, the north boundary of Curtis Park, the Boise River, Lincoln Street, and Highway 20-26. The Boundary described generally on the south is Homedale Road to Cleveland Boulevard and a line on a northeasterly angle to intersect Middleton Road at Laster Lane. Said boundary on the west is Wagner Road and Farmway Road. Said boundary on the east is Middleton Road, KCID Road, a line south of the Boise River which is in line with Emmett Road which is also the section line between Sections 13 and 14 in Township 4 North, Range 3 West, the east boundary of Curtis Park and the line of W. Hartley Gulch south of Highway 44 to the Boise River. (Please refer to the attached published map, EXHIBIT "A".)

The Canyon County Planning and Zoning Commission held a public hearing and took testimony on this matter November 22, 1994 and recommends to the Canyon County Board of Commissioners that the Board adopt, with certain modifications the draft ordinance considered by the Planning and Zoning Commission at it's hearing. Following this County Commissioners public hearing, the Board of Canyon County Commissioners may adopt or reject any or all portions of the proposal. If the Board intends to make a material change in the proposal, further notice and public hearing shall be provided before the Board of Canyon County Commissioners adopts an Ordinance.

Documents may be reviewed at the office of the Canyon County Board of Commissioners on the 1st Floor in the Canyon County Courthouse at 1115 Albany, Caldwell, Idaho, from 8:00 a.m. to 12:00 noon and from 1:00 p.m. to 5:00 p.m., Monday thru Friday, except holidays. All interested persons are invited to attend this public hearing and present oral or written testimony concerning this matter. For more information call (208) 454-7478. Assistance is available for those with disabilities upon twenty-four (24) hour prior notice.

System Description (continued)

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

A good artesian well with a 16" casing and a 75 Hp submersible pump discharges water through a 10" discharge pipe to the City of Caldwell's municipal diversion system. The pump, motor and well site are located in a 20' x 30' concrete block building in Tubby Park. This well is known as well #1A and is a replacement for an older well known as well #1 that is located approx. 300' south of well #1A.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

63-5052 is a claim relating to an artesian well 300' south of the source for this permit. According to Caldwell City water personnel the diversion works for 63-5052 is still in place but not used since this permit's system was developed. This permit is intended to replace 63-5052. No record of a P/D transfer from 63-5052 to this permit can be found. Recommendation is based on requested amount and supported by fee paid, well test, pump curve and theoretical calculation.

Subject: Luby Park Well Test

Dear Ron:

Enclosed is a copy of the data from the Luby Park well test. The test results indicate that the well is capable of producing 900-1000 gpm for sustained pumping periods. Peak flows of up to 1200 gpm are possible for short periods.

The well was tested on February 4, 1987 by Bill Doty using a diesel drive line shaft turbine pump supplied by Layne of Idaho, Inc. The well was step tested using discharge rates of 560, 770, 1000, and 1200 gpm. The well was flowing approximately 25 gpm before the start of pumping. Static water level was assumed to be approximately three feet above the top of the casing. Maximum drawdown, achieved after six hours of pumping, was 123.5 feet below the top of the casing.

Sand production throughout the test was minor. When the pump was first started, approximately 500 ppm sand content was measured. This sand content rapidly decreased to less than 50 ppm. There was no visible sand in the water samples taken near the end of the test.

Drawdown and recovery data indicate transmissivity at the site is approximately 20,000 to 30,000 gpd/ft. Specific capacity varied between 12.75 gpm/ft, at 1000 gpm, and 9.5 gpm/ft at 1200 gpm.

Assuming 140 feet of available drawdown, the well is capable of producing 1200 gpm for long periods of time if there is no interference from other wells or from regional water level decline. However since some interference is expected, a production rate of 900 gpm is recommended. If interference is ignored, this rate could be maintained for a year with about 100 feet of drawdown. This leaves 40 feet of drawdown available for well interference effects, regional water level decline, and boundary conditions not detected during testing.

Please contact me if you have any questions or comments concerning these findings.

Sincerely,
