Tim,

We agree that irrigation districts simply need to submit a new boundary to make changes. Usually when both AJ & WR records are identified for the same right, we only update the AJ record (ownership changes, transfers etc). Since the boundary will be updated for the AJ records, it should be a simple matter to take the same shape & update the WR records to avoid confusion as to the most current or accurate shape in ArcMap & PLS. I think that is the question that Danielle was asking.

See the following link on our website to irrigation districts in Idaho formed pursuant to Title 43, Idaho Code.

Hi Chad and Eric,

Here is a new boundary submitted by Dalton Gardens Irrigation Dist.

Because they are an Irrigation District (hopefully formed under Title 43), I believe they just need to notify us of a service area change and we can change the water right boundary. We should have the same water right and recommendation boundary. Would you and Eric please coordinate and incorporate this new boundary?

I briefly spoke to Pam (and hopefully she will correct me if I'm wrong).

Thanks,

Danielle

Re: Dalton Gardens Irrigation District Service Area

Dear Department of Water Resources:

Attached to this e-mail is a shape file that depicts a change in the generally described place of use for water rights 95-466, 95-466A, 95-466B, 95-466C, 95-467 and 95-467A, which are held by the Dalton Gardens Irrigation District. This notification is made pursuant to the requirements of Section 43-323 of the Idaho Code. The lands that have been added to DGID's service area are all contiguous to the old service area.

Please contact us if you have any questions.
