Incomplete forms will be returned.

1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case division of the existing water right or adjudication claim record will be required.

2. The following **REQUIRED** information must be submitted with this form:

- A. The appropriate **FILING FEE**. See instructions for fee amounts.
- B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.
- C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
PLAT OF PROPERTY or **SURVEY MAP** clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are usually attached to your deed or on file with the county).

OR

If your water right(s) and/or adjudication claim(s) is for ten or more acres of irrigation, you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

PRE EXAM REVIEW
FOR CHARLES WARD AND DEWARD HALL

Apparent conflict with overlap of 43-215 as decreed Vs how it was claimed.

43-215 pt 43-110	43-11298	7-1-86		2.80	

DIVERSION RATE ANALYSIS

Surface water claims based upon 43-214 not being claimed and ½ of 43-215 not being claimed and a found place of use of 230 acres.

43-10815 2.20 cfs
43-110 1.60 cfs
total 3.80 cfs/230 acres = 0.17 cfs/acre

adding
43-214 0.40 cfs
43-215 (½) 1.20 cfs
total 5.40 cfs/230 acres = 0.023 cfs/acre

The final rate of 0.023 cfs/acre makes the assumption that a portion of 43-215 is still appurtenant to the property and would be claimed along with 43-214.

~~The claimed Cassia Creek decreed rights are all for the southern portion of the claimed place of use. 43-214 and part of 43-215 were decreed to the NWNE and the NENW of sec 23. Neither right has been claimed.~~

43-214 and ½ of 43-215 were claimed on 12-8-2000 as described above as **43-11298**. Combined limitations are as follows. Combination of 43-110 and 43-215 covers the entire place of use, no acre or diversion rate limits required.

For **43-10815**, the base rights were decreed to the southern place of use only, therefore this right is limited to the irrigation of 151 acres within the PP/U. The combined diversion rate does not exceed 1 inch per acre so no rate limit is required for this right.

43-214 was decreed to the north place of use and is therefore limited to 79 acres within the PP/U. When the surface water rights and groundwater rights are combined, they are limited to 1 inch per acre.

Groundwater rights **43-2452** and **43-2459** are from the same point of diversion and for the same place of use. They are limited to 145 acres within the PP/U. The claimed place of use totals the licensed place of use but has been shifted slightly between some of the claimed quarter/quarters.

OFFICE VISIT BY CHARLES WARD 12-8-2000

Charles filed a late claim for 43-214 and amended 43-110 to include 1.2 decreed under 43-215 ($\frac{1}{2}$ of the decreed 2.40 cfs). This claim is to be renumbered to identify the combined status of this claim. Renumbered to 43-11298 on 12-14-2000. We discussed the system as it currently exists. He indicated that there is only one Cassia Creek diversion that he uses and that p/d is just west of his property in the SWNW of sec 23. The well has not been changed. There is a few acres in the NWNE that is not farmed but Charles indicated that that ground will occasionally receive irrigation water. There is a high point in the southeast corner of the NESW that is not irrigated.

HALL CLAIMS

DIVERSION RATE ANALYSIS

Surface water claims based upon 43-213 and 43-122 not being claimed and with a found place of use of 195 acres.

43-10793	4.00 cfs	
43-411	1.20 cfs	
total	5.20 cfs/195 acres = 0.027 cfs/acre	
less $\frac{1}{2}$ of 43-215	1.20 cfs	
total	4.00 cfs	
adding		
43-43-213	0.80 cfs	
total	4.80 cfs/195 acres = 0.025 cfs/acre	

Note that the last entry indicating a 0.025 cfs/acre still excludes the 1.20 cfs under 43-122. The assumption being that the claimant did not want to claim this right, as the priority date is 4-1-1904.

OFFICE VISIT BY MARVIN HALL ON 12-20-2000

We reviewed his claims, the decree, and the place of use as it pertains to this farmstead and another farmstead in 12s26e Sec 24.

For this farmstead, after reviewing the information, Marvin elected to file for 43-213 but not for 43-122. We discussed the split of 43-215 and he accepted my assessment that Charles Ward had $\frac{1}{2}$ of that claim. I indicated that an amendment to reduce the claim was not necessary.

Marvin stated that Cassia Creek had historically been diverted from a point of diversion in Section 14 NWSW but that the diversion structure washed out many years ago and was never reestablished. The only point of diversion that is used is the claimed point of diversion in Section 22 (per arcview the quarter/quarter is incorrect).

The groundwater system has changed slightly over the years, as the point of diversion in the NESW does not produce as much water as it originally did. He indicated that this is more of a pit development that has been trenched to increase production. The well south of this location provides a majority of the required irrigation. He indicated that there is a well for domestic use at the farmstead that is for domestic use and is independent of the irrigation system. I stated that I would split off the domestic use and recommend it as a valid use under a 10,000 series claim number.

I found 195 irrigated acres and am recommending them as the PP/U for each right. 43-2326 was licensed on 195 acres and claimed on 196 acres. The found acres are 195 acres and the recommendation. There is some shifting between quarter/quarters between the claim and the licensed place of use. All rights when combined are limited to 195 acres.

43-2541 is from the same points of diversion (less the domestic well) but was licensed for 184 acres rather than the 195 acres licensed under 43-2326. The combined, diversion rate for the two ground water rights do not exceed 1" per acre therefore no combined limitation for rate is required. They are limited to a combined diversion volume of $195 * 4 = \underline{780}$ afa.

43-411 was decreed to the northern portion of the claimed place of use and is limited to 117 acres within the PP/U.

43-10793 is based upon 43-121, which is appurtenant to the north 117 acres, while 43-215 is appurtenant to the southern 78 acres. When combined they equal the found place of use, therefore no combined acre limit is required. This claim was for 4.00 cfs, however, I am only recognizing $\frac{1}{2}$ of 43-115 for Mr Hall. Therefore the recommended rate is 4.00 cfs - 1.20 cfs = 2.80 cfs

43-213 was decreed to the southern portion of the place of use and therefore, is limited to 78 acres within the PP/U.

When all rights are combined they are limited to 0.02 cfs per acre.
