CONDITIONS OF APPROVAL

- ✓1. Right 43-2338B is limited to the irrigation of 128.0 acres within the place of use described above in a single irrigation season.
- ✓2. Right 43-11132B is an expansion of Right 43-2338B pursuant to Section 42-1416B, Idaho Code.
- ✓3. Rights 43-2338B and 43-11132B when combined shall not exceed a total diversion rate of 2.41 cfs and a total annual maximum diversion volume of 512.0 af at the field headgate.
- ✓4. The total instantaneous diversion of water from all points of diversion under Rights 43-2338B, 43-11132B, 43-12986, 43-12987, 43-12989, 43-13034 and 43-13068 shall not exceed 6.75 cfs, nor total combined annual volume of 1,546.0 af, for the irrigation of 478.0 total acres.
5. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

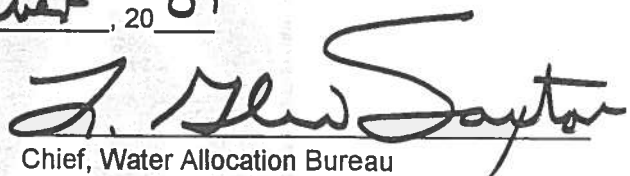

WATER RIGHT NO. 43-2338B
As Modified by Transfer No. 69236

CONDITIONS OF APPROVAL

6. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
7. After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
8. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.
9. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
10. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
11. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

RE: Snake River Basin Adjudication (SRBA)
43-13034, 43-12986, 43-2338B, 43-11132B

Dear Mr. and Mrs. Taylor,

Enclosed please find copies of water right claims 43-13034 and 43-12986 that have been changed to reflect that you are the current owners of these rights. *Note that 43-13034 represents the irrigation portion of what was 43-12988.* This right was split to separate the irrigation from the domestic & stockwater uses.

Also enclosed is the revised place of use for irrigation of rights 43-2338B and 43-11132B. As you can see I moved 25 acres from the NENW to the SENW of Section 11 as Pete Matthews directed - and which made much more sense. I was not able to see that there was any sign of irrigation to the east of that 25 acres in the SENW circa 1987, so your rights are going to be limited to the 171 acres shown. This agrees with information given on Transfer 4490 by Matthews in 1995. If you have any additional questions, feel free to contact me and we can review it.

As I pointed out, this recommendation represents the extent of irrigation as of 1987, and as transferred by T4490 in 1995. Any subsequent development or changes made by transfer will be handled by our allocation bureau, but will be based upon the findings of the Adjudication. Jim will be back in the office Monday June 18th, I have placed these revised recommendations on his desk so that he may review them at that time.

Sincerely,

Vikie Hancock

HISTORY

1949 Permit for License 43-2338 is issued. 1956 FE finds 320 acres irrigated in the S½ Section 12, POD well located in NWSE Section 12. 6cfs allowed. Licensee = G T Matthews

1953 Permit for license 43-2396 is issued. 1955 field exam finds 464 acres irrigated in N½ Section 7 and N½ NE & SENE Section 12. 6 cfs allowed. POD well in NWNE Sec 12. Licensee = H C Matthews

1967 H C Matthews is granted a DLE patent for the SWNE Sec 12. Transfer 894 adds this 40 acres to the licensed place of use making it 504 acres. No change in diversion amt. Div Rate = 0.012 per acre.

1960 Permit for license 43-2492 issued for 400 acres in the NE ¼ and N½ NW Sec 7 and the NW ¼ Section 8. Application stated that 160 inches were for new lands and 140 inches were supplemental to existing rights. Permit later amended to remove 160 acres in the NW¼ section 8 and add the E½ SW Section 7 making a total of 320 acres. FE in 1965 found 240 acres irrigated in the NE¼ and E½ NW Section 7 and allowed 3.83 cfs. The POU entirely overlapped license 43-2396, which was not mentioned. The supplemental right increased the diversion rate per acre to 0.026 cfs on the appurtenant 240 acres. POD well in NENW Sec 7. Licensee = estate of G.S. Matthews.

1968 Aerial photos show irrigation of the SE¼ Section 11 with no associated water right. Land is assumed to be owned by Matthews at this time.

1971 HC Matthews sells NE ¼ Sec 12 and N ½ Section 7 to Burton Anderson.

1975 Anderson applies for a transfer to add a point of diversion to 43-2396. He adds the well in NENW Section 7 that was licensed to 43-2492. Reason for the transfer states the land has been split by ownership and a point of diversion is needed on included lands.

1975 Anderson sells to Fridel the N½ Section 7 except the west 24 acres. This parcel includes 320 acres.

1976 Anderson sells to Matthews the NE¼ section 12 and 24 acres in the W½ W½ NW¼ Section 7 (portions of lots 1 and 2). This parcel includes 184 acres.

1980 Matthews installs two pivots in the S½ Section 12 and transfers the corner acres to the NE ¼ Section 11.

1987 Farm Credit forecloses on Fridel acquiring his property in the N½ Section 7.

1987 Claims are filed in the SRBA:

- Matthews files claim based upon 43-2338 on 264 acres in the S½ section 12 (the original licensed place of use) and 294 acres in the E½ section 11. (Total 558 ac). This would be an expansion of 238 acres over 1980 transfer 2382, all in the E½ section 11. 416 acres are paid for under this claim.
- Matthews files claim based upon 43-2492 on 344 acres in the E½ Section 12 asserting that the claim is based upon a contract agreement giving 3.83 cfs under license 43-2492 to him for use in Section 12. This claim overlaps 132 acres in the SE ¼ Sec 12 also claimed under 43-2338. 344 acres are paid for with this claim.
- Farm Credit files claim A43-2492A based upon license 43-2492 for 3.83 cfs on the original 240 acre place of use in Section 7.
- Farm Credit files claim based upon 43-2396 for 6 cfs on 344 acres in the N½ Section 7. It is later found that they have an ownership/security interest only on the 320 acres that had been owned by Fridel. A total of 344 acres are paid for by Farm Credit on the two claims.
- No claim is filed on lands irrigated in the SE ¼ Section 11.

1990 Heward purchases the Fridel land in N½ Section 7. Farm Credit holds security interest.

1995 Matthews transfers 132 acres of the POU of 43-2338 entirely off the SE¼ of section 12 onto various places in Section 11 including the SE¼. Remarks included in transfer #4490 state that this administrative action acknowledges changes in POU that occurred after 1980 transfer #2382 but were not recorded with IDWR. Overlapping POU of claim 43-2492 is addressed only indirectly by "pending Adjudication review". Expansion claim 43-11132 for 106 acres in conjunction with the transfer is filed at this time by Matthews.

1996 Matthews sells SE¼ and also the NE¼ Section 12 plus 24 acres of W½NW¼ Section 7 to Heward. Water right adjudication claim 43-2492 is referenced in both deeds conveying the individual parcels.

ANALYSIS

ANALYSIS

43-2492, 43-2492A & 43-2396A The contract agreement between Anderson, Matthews and Fridel that is referenced in claim 43-2492, and which pertains to the split of property originally covered by License 43-2396 and the overlapping license 43-2492, is not in our files. It appears that the agreement awards license 43-2492 to Matthews for use in Section 12 and on 24 acres in the W½ NW ¼ Section 7. It is supposed that license 43-2396 for 6 cfs was to be used on the remaining 320 acres in N½ Section 7.

Matthews SRBA claim 43-2492 is on 344 acres which includes the SE ¼ section 12 as an accomplished transfer. Any use of this right in the SE¼ of section 12 would be an un-stacking of overlapping licensed rights and would not be allowed by IDWR, despite the private contract agreement. If both licensed rights must stay within the original 504 acres, awarding the entire claim based on 43-2492 to either Farm Credit or Heward would unevenly distribute water on the place of use, therefore a portion of 43-2492 should be owned by Farm Credit, or a portion of 43-2396 should be owned by Heward.

A total of 504 acres were irrigated under the combined licenses 43-2492 and 43-2396, with a combined diversion rate of 9.83 cfs. It seems that the fair thing to do would be to combine the diversion rates of the two licenses, calculate the rate per acre on 504 acres (0.019 cfs) and divide by ownership. I believe this was the intent of the parties who split ownership of the property when Anderson sold to Matthews and Fridel.

$$9.83/504 \times 184 = 3.59 \text{ cfs} \quad 9.83/504 \times 320 = 6.24 \text{ cfs}$$

43-2492 represents 184 of the licensed acres and should be awarded to Heward with a diversion rate of 3.59 cfs. POD NWNE Sec 12.

43-2492A, filed by Farm Credit, would represent the remaining acres and diversion rate awarded under the original overlapping license. $240 - 184 = \underline{56 \text{ acres}}$. $3.83 - 3.59 = \underline{0.24 \text{ cfs}}$. Combined POU limits with 43-2396A would apply. POD NENW Sec 7.

43-2396A was also filed by Farm Credit for 6 cfs on 344 acres in the N½ Section 7. It has been determined that they only own 320 acres exempting the West 24 acres of the NW¼. Nevertheless, they have a valid claim on 320 acres based upon license 43-2396 for 6 cfs. Combined POU limits with 43-2492A apply. POD NENW Sec 7.

43-12990 Because it has been determined that 43-2338 was transferred from the SE¼ of Section 12 prior to the adjudication(see below), an expansion of license 43-2492 may be filed by Heward to

cover those acres irrigated by the well in the NE Section 12 in 1987, but not included in the recommendation for claim 43-2492. It appears that there are approximately 127 acres irrigated by pivot in the SE¼ Section 12. These acres were paid for by Matthews at claim filing. Expansion claim was filed by Heward for 130 acres on 3-15-01.

43-2338 Matthews' original claim included the licensed POU, which overlapped his SRBA claim 43-2492 on the SE¼ of Section 12. When he transferred the POU from the SE¼ section 12 to the SE¼ section 11 he stated that this represented a transfer that had been accomplished prior to 1987. It is possible that he was given direction at the time of claims filing to identify this right as licensed and not how it was currently being used, as when the claim was amended in 1994 remarks were added that the acres in SE Sec 12 were served by the well on claim 43-2492. This claim should be recommended as described in transfer 4490 which included 320 acres in sections 11 and 12. And pods in NWSW 12 and SWNW 11.

Expansion claim **43-11132** was also filed in conjunction with transfer 4490 and included 106 acres, listing both pods described above. 43-2338 and 43-11132 should be recommended as filed which is a PPU of 426 acres.

SUBSEQUENT SPLITTING BY OWNERSHIP OF 43-2338 & 43-11132

1998 Warranty deed from Matthews to Taylor split both rights 43-2338 and 43-11132, which were included in a permissible place of use totaling 426 acres, into A (255 ac) and B (171 ac). This permissible place of use was created prior to the 1998 sale. It was noticed on the ASCS photo/map included with the change of ownership that a small pivot of around 65 acres was proposed, or had been installed, within the NE¼ of Section 11. According to T4490 and expansion claim 43-11132, only 28 acres of the NW¼ Sec 11 has a water right. There was no indication of a change in points of diversion from transfer 4490. Both wells in Section 11 and Section 12 remain connected (on paper) to portions A (Matthews) and B (Taylor).

1999 Warranty deed from Matthews to Taylor further splits Matthews A portions of 43-2338 and 43-11132. Matthews now retains only 130 acres in the SW ¼ Section 12 of the original 426 acres. A well agreement submitted with the change of ownership states that Matthews has an easement to access and withdraw water from the well located in the SWSWNE Section 11, which is now Taylor's property. The water withdrawn from this well is to be used upon property located in the SW ¼ of Section 12, and water rights 43-2338 and 43-11132 are referenced. According to a memo from Jim Stanton, it has been reported that the well located in the NWSW Section 12 has been capped and is no longer in use.

2001 It appears that if the place of use in the NW ¼ of Section 11 has changed, and if the well in NWSW Section has been abandoned, that transfers are required to make changes for both the Taylor and Matthews water rights. There is also some question as to whether there are acres being irrigated with no water right in Section 11 by Taylor.

RE: Claims A43-02338A & B, A43-11132A & B

Today I was contacted by appraiser Wayne Bauer for an explanation of the rights/claims referenced above. In order to make sense of this, I prepared the attached sheet. In 1998, we received a change of ownership for a portion of the existing ppu to Taylor. There are 2 p/d's per approved transfer, one in Sec. 11 on the property bought by Taylor, and one in Sec. 12 on the land retained by Matthews. Although you and Allen have both said that a transfer is needed to split a ppu, we split the land and points of diversion based on the Change of Ownership form only. I did not see anything in the files showing a request from either owner to divide the points of diversion. So was it legal to do this? The problem is that the well in Sec. 12 is no longer functional, so both parties use only the Sec. 11 well. A second Change of Ownership has just been received, splitting the A portions of the rights that show only Sec. 12 as the P/D. So it appears that both parties will have to apply for water transfers to straighten this out. If we still recognized both wells for all the pieces, at least Matthews would not have to file a transfer. Taylor needs a transfer to straighten out a problem with a previous transfer, but that is another matter. Jeanie is the agent for this area, and we have discussed this. Neither of us needs another problem to solve, but it looks we have one anyway. Your legal opinion would be appreciated. Thanks.

Re: Recommendation

Transfer #4490 was approved on right 43-02338 in May of 1995. When the transfer was applied for, 25 acres in the SENW of Section 11, T11S, R26E were identified for part of the place of use AFTER the transfer was approved. (This was verified by the map submitted at the time of application.) At some point, Mr. Matthews scratched out the 25 acres from the SENW and put them in the NENW. The maps were never changed and the transfer was approved this way. (Other acres identified in the companion expansion claim were no longer contiguous to this 25 acre field.) Then Matthews sold part of his land to the Taylors in 1998, resulting in a split of both rights. The map submitted with the ownership change form seems to indicate a small pivot is now in the NENW quarter and overlaps other quarters not covered by the claim, hence the strange looking "layout". I recommended this claim according to the approved transfer but another transfer is needed to correct the place of use for the new owners...

MEMORANDUM TO FILE

FROM: MEL SCHULTE

DATE: OCTOBER 3, 1994

RE: G.T. & G.H. MATTHEWS
TRANSFER APPLICATION 43-02338

1. The Place of Use in this transfer is in the Raft River Critical Ground Water Management Area.
2. The Place of Use for license 43-02338 has been changed and expanded without proper approvals since T2382 was approved in 1980.
3. The additional acres and water needed to fill out the quarter circle pivots described in the land list proposed in this transfer are covered by the SRBA expansion claim A43-11132.
4. A more practical and workable approach to the Place of Use proposed in this transfer would be to make the SW 1/4 of S12 a 1/2 circle pivot and the SE 1/4 of S11 a 3/4 circle pivot. The applicant, however, wants to file the transfer application as written and the SRBA claims as they are currently filed.

c. Description of diverting works Two wells equipped with vertical turbine pumps and buried mainline systems

d. Describe the reasons for applying for a change in the point(s) of diversion The well in the NW/4 SW/4, Section 12 is declining in yield due to sanding and age. The additional point of diversion will be used to irrigate some different ground with no increase in total water diverted or land irrigated.

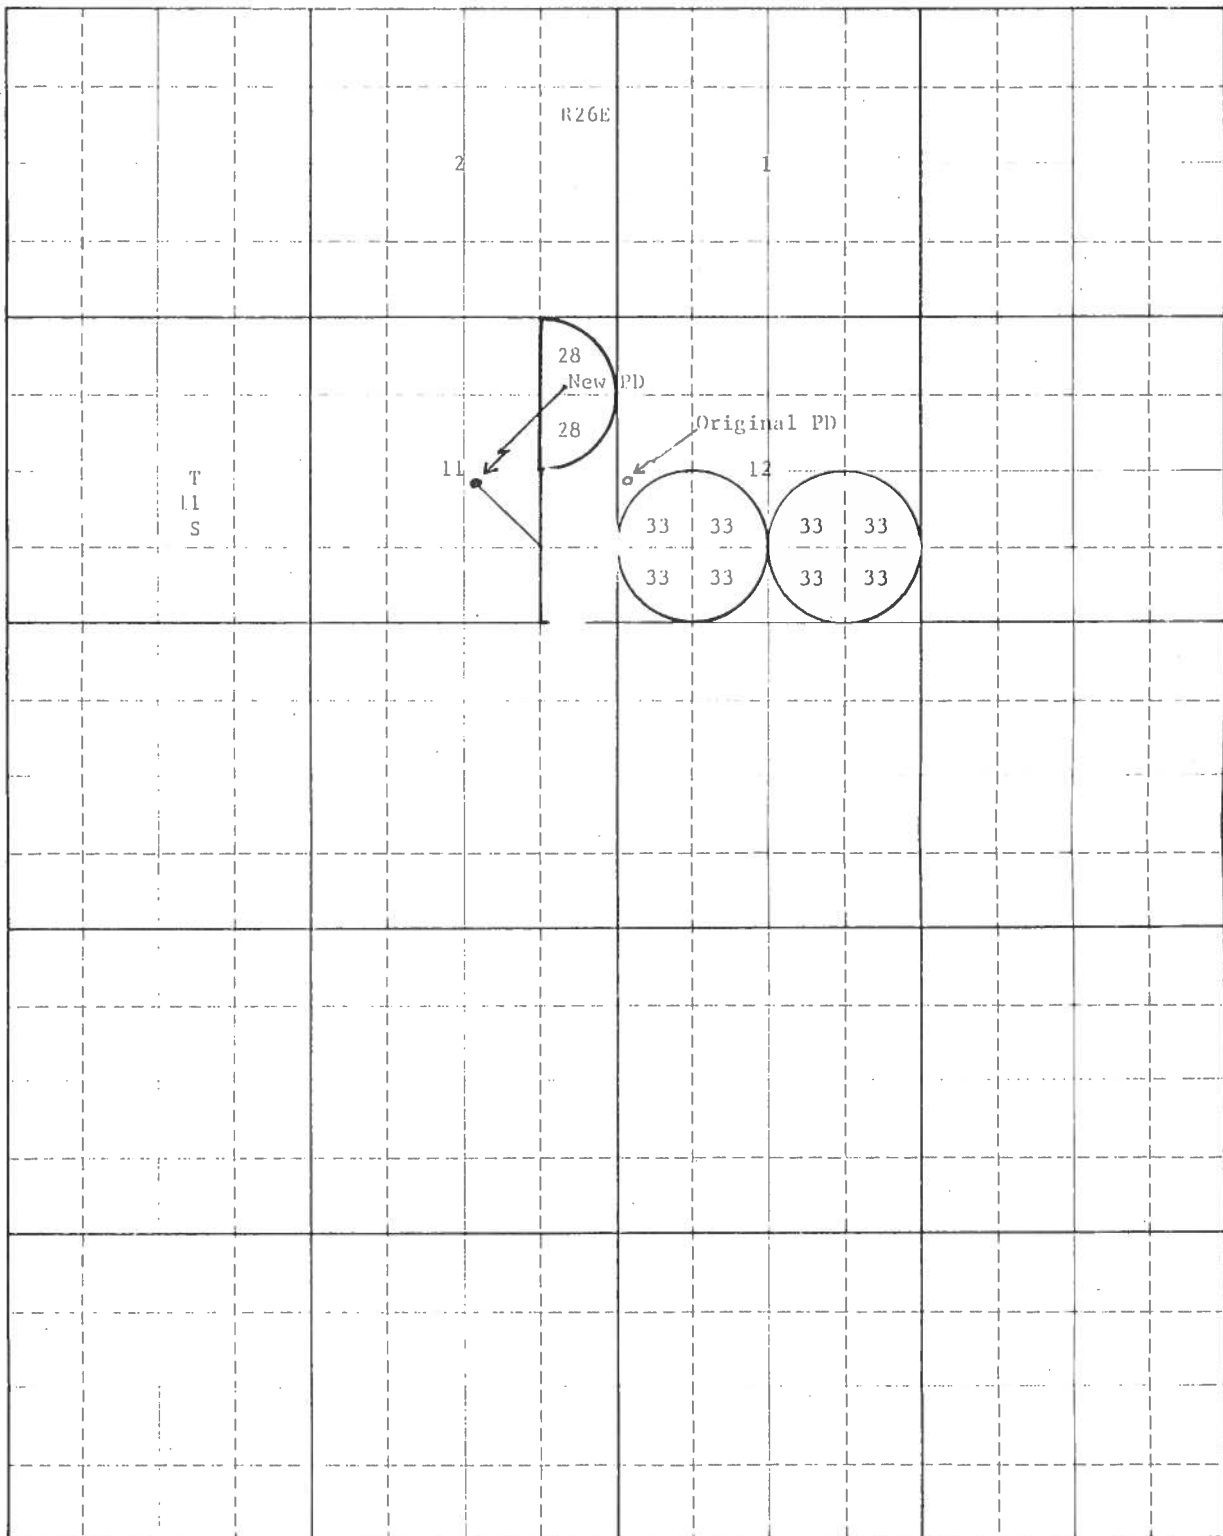

2. Change in place of use

- a. Describe the lands or place of use to which the right will be transferred:

Total number of acres to be irrigated 320

- b. Draw a map indicating the new point(s) of diversion and/or the new land to be
Show clearly the land involved by section, township and range number.

SCALE: 2 inches equal 1 mile. Draw plan in ink.

3. Remarks The addition of a second point of diversion is to supplement the which is declining in yield below the previously licensed quantity. The place of use is to more efficiently operate the applicants farm. Because of the reduction in acreage irrigated in Section 12 through installation of pivot irrigation systems the land in Section 11 is proposed to be irrigated. There will be no expansion of the water right since no additional water will be diverted and only 320 acres will be irrigated as limited by license #43-2338

I hereby assert that no one will be injured by such change and the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge.
