MEMORANDUM TO FILES INVOLVED WITH IDAHOME ADJUDICATION CLAIMS

07-Jul-1989 10:00

From: Allen Merritt

The Idahome claims were initially taken in the Fosha vs. Dunn court case and then entered into the SRBA. Those claims in the Fosha vs. Dunn were the following:

A43-02506 A43-02350 A43-02349 A43-02346F A43-04230

The fees paid for the above claims totals \$1256.00 and recorded under voided receipt C001944. (original money receipted on paper, C001944 created to move claims to host)

In response to the SRBA the following claims were entered:

A43-02506 A43-02350 A43-02349 A43-02346C A43-10478 A43-10479

The total fees for these claims is \$1329.00

The \$1256.00 was credited and \$73.00 difference was receipted under S008100.

Note that A43-04230 was not claimed in the SRBA, also A43-02346F was replaced by A43-02346C.

R.E. Department position on wells as the points of diversion for decreed Raft River water rights.

Mr. Jones, I just attended the meeting in Malta and I would like to comment of what action the department intends to take for the claimants that want to use wells as a point of diversion for their decreed surface water rights. I and my family have been ground water users in the Idahome area since 1953, so I am familiar with some of the issues concerning water rights in the Raft River Basin.

My first concern is the reason for these claimants to change their source of irrigation water from surface to ground water. Prior to the early 1950's there were very few deep wells in the Basin. Most of the irrigation was in the south end of the valley, using flood irrigation, mainly to irrigate pastures for live stock operations. No doubt, compared to a modern irrigation system; a primitive, but adequate irrigation system. These water users were satisfied with using surface water from Raft River as their water source. Like ground water users, these surface water users were responsible for maintaining their water deliver system. But, the question is, did they maintain that system? Are these requests to change the point of diversion as result of the failure to maintain the surface system? There are many areas of Raft River that; through a lack of concern and management, deep erosion of the stream channel has made the old surface water diversions totally useless. Also, using heavily sediment laden river water in hand lines, lateral moves or pivots is a management nightmare. These are factors I would carefully examine as to the real reasons for the change of a point of diversion.

Another factor to consider is; these surface water users; until the declaration of a critical ground water area, also had the opportunity to drill deep wells as a supplemental or alternate water source. Most choose not to do this, betting the surface water would satisfy their water needs far into the future. They were not willing to take the financial risk; like the ground water users, to drill the wells and install the pumps. It appears to me that allowing these claimants to use a ground water right; in lieu of their surface rights, in essence, circumvents the intent of the critical ground water declaration.

2810

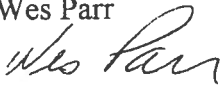

If the Department allows a ground water right equal to the surface water right, how does the Department intend to police the amount of ground water used in a short water year? For instance, in a short surface water year a surface right holder may be limited to only 75% of their right. How do you limit the ground water user to only 75% of their decreed right, if the ground water point of diversion was supposed to replace the surface water right?

I realize the argument the Raft River water users are making is that: ground water pumping has caused a decline in the surface water. This may be true in an instance where a well is in close proximity to the river channel itself. But, I seriously doubt, that deep wells 10 to 15 miles away in the north end of the Raft River Valley have a direct impact on the 60 to 90 days a year of surface water available in the south end of the valley. In fact, in more cases than not, the amount of surface water available has a more direct impact on ground water than vice versa.

Again, I reiterate my general concern, what is the real reason for the request for a change of point of diversion.

I want to compliment your agency on the fine job that has been done in dealing with the water right issues in the Raft River Basin. I especially appreciate the common sense approach to settling these critical issues. The Department goal of attempting to finalize all of the claims before going through a judicial process should be appreciated by all concerned.

Sincerely, Wes Parr

RE: Information about historical water diversion flow rate

Dear Wateruser:

This past December IDWR sent a letter to you requesting your assistance in providing information about flow rates from certain diversions (copy attached). These letters are being sent to claimants with identified rights that have not previously been confirmed (measured) either through the licensing process or by decree. IDWR desires to make the most accurate recommendation to the SRBA Court and this requires your participation and cooperation, pursuant Idaho Code §42-1410.

One advantage of providing good, verifiable information to us is that the flow rate that we recommend will be the full measure of your water right as developed. Another benefit is that disputes over the recommendation are minimized. Lastly, documentation for flow rate will likely be dated and may support evidence of priority determination.

In the absence of good information about historical diversion flow rates IDWR may conclude any of three less desirable alternatives:

- 1) Recommend disallowal of right.
- 2) Recommend a flow rate limited to a licensed rate, if a licensed diversion is part of the system, but with additional diversion volume if the use and diversion capacity is documented to have occurred before 1963.
- 3) Recommend the right as an expansion in a critical ground water area, §42-1416B I.C., which limits the flow rate AND volume to the licensed quantity. This provision also sets the priority at 6/30/1985, regardless of development date between 1963 and 1985.

Thank you for your attention to this matter and we look forward to your quick response and documentation relating to this request. Water Resource Agents from the department may be contacting you in the near future should field work be required to finalize recommendations. Inquiries related to this diversion rate information request should be made to Scott King or Cindy Bird at (208) 327-7900. Inquiries about other aspects of your claim should be made to the Southern Region Office (208) 736-3033.

Sincerely,

Scott King

Water License No. 21512

Priority March 2, 1950

Amount 17.92 c.f.s.

THIS IS TO CERTIFY that G. L. BISHOP - Assignee - NELLIE M. PAUR

of Jerome, Idaho

made application for a permit to appropriate the public waters of the State of Idaho, dated March 2, 1950; that Permit No. 21512 was issued under said application; that Certificate of Completion of Works, with a carrying capacity of 29.00 second feet, was issued thereunder on December 5, 1955, showing that said works were completed on the 6th day of June, 1955; and that on the 10th day of February, 1961

NELLIE M. PAUR

of Westminster

State of California

made proof to the satisfaction of the State Reclamation Engineer of Idaho, of a right to the use of the waters of 6 wells

a tributary of subterranean flow under Use Permit No. 21512

for the purpose of irrigation and domestic use of the Department of Reclamation, and

that said right to the use of said waters has been perfected in accordance with the laws of Idaho, and is hereby confirmed by the State Reclamation Engineer of Idaho and entered of record in Volume 11 of Licenses, at Page 7125, on the 2 day of August, 1961.

The right hereby confirmed dates from March 2, 1950.

Sec. 32; in the SE 1/4 NE 1/4, Sec. 33, Twp. 11 S, R. 27 E, B.M. Cassia County, Idaho. The Point of Diversion is located 6 points: SE 1/4 NE 1/4, Sec. 33; SE 1/4 SW 1/4, Sec. 34; SE 1/4 NE 1/4, Sec. 34; SE 1/4 NE 1/4, Sec. 34; SE 1/4 NE 1/4, Sec. 34; SE 1/4 NE 1/4, Sec. 34.

That the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall not exceed 17.92 cubic feet per second.

1968 photo 11 - 21E (FOOTHILL FARMS)

An aerial photograph of a coastal region, likely a river delta or estuary, characterized by a complex network of water channels and land parcels. A black grid is superimposed on the image. A yellow boundary outlines a specific area of interest, which includes a large, irregularly shaped land parcel in the lower-left quadrant. A red boundary outlines a larger, more rectangular area that encompasses the yellow-outlined region. Four small circles mark specific points within the grid: one in the upper-left, one in the center, one in the lower-right, and one in the bottom-right corner. The image shows various textures of land, including what appears to be agricultural fields, forests, and water bodies.

An aerial photograph of a coastal area, likely a wetland or marsh. A yellow boundary line is drawn across the image, starting from the left edge, extending vertically, then horizontally, and finally following a diagonal path towards the bottom right. Four points are marked with blue circles and numbers: 29, 32, 33, and 35. Point 29 is located near the top center, point 32 is below it, point 33 is to the right of point 32, and point 35 is further to the right. The terrain is a mix of dark and light patches, indicating different vegetation or water levels. A body of water is visible in the upper right corner.

MEMORANDUM

To: Files: Idahome Farms Inc.
From: Helen Harrington-Thornton^{HHT}
Date: February 17, 1993
Subject: Background

=====

Five claims were originally filed in the Fosha vs. Dunn Adjudication:

A43-02349
A43-02350
A43-02346F^C
A43-02506
A43-04230

These claims were reviewed by Adjudication Staff in 1985/86, with proposed recommendations completed (see memo describing claim file materials for Fosha vs. Dunn claims). Subsequently, Idahome Farms Inc. filed claims in the SRBA under the same numbers. (The exception being A43-02346F, which was filed in the SRBA as A43-02346C). Additionally, an expansion claim, A43-10478, was filed.

The refiling of claims in the SRBA has resulted in several changes which I have determined need additional review before final recommendations are made. Specifically, the claims filed in SRBA for A43-02349 and A43-02350 claimed different places of use than the original claims under these numbers, thereby voiding (to at least some degree) the proposed recommendations made in 1986.

I have compiled several maps and additional information to assist in the review of the above listed claims. These materials can be found in the file A43-02349. The maps include the acres claimed based on the most recent claim; the acres licensed/claimed on the original records; and a map of the proposed recommended acres based on the reviews done in 1985/86.

Additionally, landsat data from both the original review and 1987 MP acres from the computer. These are related specifically to A43-02350 and A43-04230 and this information is in file A43-02350. I did not finish this review because I question the proposed recommendation regarding the number of acres in each quarter-quarter. The SRBA claim for A43-02350 changed the POU and therefore these recommended acres should be re-reviewed prior to final recommendation.

There should be a general "Fosha vs. Dunn" file which will either be held by Don Shaff, Allen Merritt, or Loren Holmes. This file will contain the original maps, landsat data and other memos and material developed during the initial review of the claims conducted in 1985/86.

MEMORANDUM

From: Helen Harrington-Thornton

Date: ²⁻¹⁷~~January~~ 22, 1993

Subject: Claims Originally Filed in Fosha vs. Dunn Adjudication
=====

This claim was originally filed in the Fosha vs. Dunn Adjudication which has subsequently been consolidated with the SRBA. Claimants in Fosha vs. Dunn were not required to file a new claim in the SRBA. In some cases, however, claimants may have filed an amended claim in the SRBA.

The original claims consist of both an original white copy with the original signature and a yellow carbon. Both of these form must be retained in the IDWR files. The original form included a green carbon which is the claimant's copy. As stated above, there may also be an amended claim.

The review of this claim initially occurred in 1985/1986 by IDWR Adjudication staff. The review process included field examination by IDWR Southern Region Staff (Loren Holmes and Allen Merritt) in 1985 and additional review by IDWR State Office staff (Don Shaff, John Noyes and Forrest Luthy). The claim review documents include:

- // ~~Final recommendation~~ - shown on zeroxed copy of claim, with recommendation shown in RED
- // Adjudication Claim Analysis Sheet (consider this a replacement for the currently used Claims Verification Report (CVR)
- // Map
- // Correspondence, Memos to File, etc.
- // Zerox of original receipts (this is because the original receipt was hand written, prior to the computer receipting). However, in most instances, a voided receipt has been created in the computer in order to update the record to the Host Master.

I have reviewed the claim at this time in order to evaluate the completeness of the original review and have it meet current standards. I have ^{not} created an R record. ~~and verified the recommendation when possible.~~ Generally, the review is based on information available at the time of the original review in 1985/86. Unless there is a discrepancy, additional information of more recent origin has not been added to the review process.

MEMORANDUM TO FILES INVOLVED WITH IDAHOME ADJUDICATION CLAIMS

07-Jul-1989 10:00

From: Allen Merritt

The Idahome claims were initially taken in the Fosha vs. Dunn court case and then entered into the SRBA. Those claims in the Fosha vs. Dunn were the following:

A43-02506 A43-02350 A43-02349 A43-02346F A43-04230

The fees paid for the above claims totals \$1256.00 and recorded under voided receipt C001944. (original money receipted on paper, C001944 created to move claims to host)

In response to the SRBA the following claims were entered:

A43-02506 A43-02350 A43-02349 A43-02346C A43-10478 A43-10479

The total fees for these claims is \$1329.00
The \$1256.00 was credited and \$73.00 difference was receipted under S008100.

Note that A43-04230 was not claimed in the SRBA, also A43-02346F was replaced by A43-02346C.

RE: 43-4230, 43-2346F, 43-2349, 43-2350, 43-2506

Dear Mr. Parr:

Your copies of the Claims to Water Right in the Fosha vs. Dunn case are enclosed. Although the staff in Twin Falls office did most of the investigative work and received your claims, the Adjudication Bureau here will prepare the report in the nature of a proposed finding that will be sent to the court. Please refer to the I.D. numbers when communicating with this office.

Three (3) original claims are enclosed for your review, and possibly for you to sign and submit. The reason for more claims is only one water right (one priority date) may be claimed per form. Some research may be necessary before submitting these claims because the priority dates (with one exception that is explained below) and points of diversion correspond to other water rights represented by licenses.

Well No. 1 (SESW, Section 29) is described on 43-4230 and 43-2506/29174 (new number, old number order). This well was apparently completed September 11, 1958, but the first use was not until June, 1, 1965 according to the proof submitted by Clarence Parr on December 9, 1965. As far as using the water for the permit to develop the water right into a license (43-2506), these dates do not create a problem. This may not be true for the use right claimed on 43-4230.

Being in a critical ground water area, you are probably well aware of the permit statute that cut off any use rights as of March 25, 1963. Section 42-229, Idaho Code, does provide some leeway for water rights initiated before the effective date of the law. What that leeway will require of you, however, is submitting extensive proof as

MICROFILMED

MAR 19 1993

January 15, 1986

to development dates of the use of the well, dates of irrigating the land claimed (W1/2, S. 33) and affidavits of intent by the users and witnesses to the activities of those users. Copies of receipts for equipment, seed or the like would be helpful also.

Well No. 2 (SENW, S. 32) is described on 43-4230 and 43-2349/21540. This well was first drilled in 1957. The first records of the use of the water from this well indicate April 7, 1959, but this use is known only for the lands of 43-2349. Here again, proof would be required to show when water was used on the W1/2, S. 33.

Well No. 3 (SESE, S. 32) is also described on 43-4230 and 43-2349. This well was first drilled in the spring, 1955, and its known use is similar to Well No. 2.

Well No. 4 (SENE, S 32) is claimed on 43-4230 and 43-2346F/21512 part. The proofs for the permit indicate the use of the water on the permit lands may have coincided with the development of the wells in May, 1954.

For each of the wells, the priority date claimed corresponds to the priority date for the water license related to that well. The priority date for a water right based on a license normally is tied to the lands described on that license only. Had the intent of a water right applicant been to also irrigate the W 1/2, S. 33, those lands would have been included in the permit filing. Otherwise, the priority date for these lands are later than the licenses and dating from the first use of the water from each of the wells on this Section 33 land.

For each claim you agree to submit, please write the priority date you are claiming for that well in Item #1, sign the claim having your signature notarized and return with a \$50 filing fee for each claim to this office, or Twin Falls if you prefer. You have paid the use fee for the lands when you submitted the earlier claims.

Thank you for your assistance in this adjudication of water rights. Please contact this office if you have any questions about the proceeding.

Sincerely,

DON SHAFF
Water Rights Supervisor

Dear Mr. Parr:

It has been brought to the attention of this department that the permanent record of the license on the above numbered permit shows one of the wells to be in the SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 33 whereas it is actually in the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 33, T. 11 S., R. 27 E., B.M.

Will you please check the license and, if this error appears thereon, return the license to this office for correction.

Re: Water permit no. 21512

I have checked with my client as you suggested in your letter of April 11, 1955, in regard to the wells completed under the above permit, and I find that they have completed nine wells upon which they are ready to submit proof. The said wells on which they are ready to submit proof of completion of works are located on the following described tracts, to-wit:

SW $\frac{1}{4}$ of the SW $\frac{1}{4}$, SE $\frac{1}{4}$ of SW $\frac{1}{4}$, SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of
Section 28,
SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 32,
SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 33,
SE $\frac{1}{4}$ of the NW $\frac{1}{4}$, SE $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 34,
SE $\frac{1}{4}$ of the NW $\frac{1}{4}$, SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 35.

I trust that upon the receipt of this information, you can go ahead with the publication so that we will be able to submit proof on June 6, 1955, as advertised.

ATTENTION: Mr. T. A. Church:

Dear Mr. Church:

In further reference to notice for completion of work on Permit No. 21512 in the name of C. D. Bishop and Hugh C. Bishop and your letter of April 7 stating that the notice should describe all the wells included in the application except those on the land omitted in the amendment to the land list,

According to the records in this department, that would leave eighteen wells described as follows:

SE¹/₄ Section 26
SE¹/₄, SE¹/₄, SE¹/₄, SE¹/₄ Section 27
SE¹/₄, SE¹/₄, SE¹/₄, SE¹/₄, SE¹/₄ Section 28
