Re: Dalton Irrigation District Adjudication Claims 95-466, 95-466A, 95-466B, 95-466C, 95-467
& 95-467A

Dear Mr. Knoblock:

Please consider this letter as a request to amend the adjudication claims that the Dalton Irrigation District filed in the NIA for the above referenced water rights. The acres in place of use field should refer to the district's service area rather than a certain number of acres in a specific 40 acre tract. The description of the existing diversion works should read "two each 3200 gallons per minute pumps and one each 800 gallons per minute pump". For claims 95-466, 95-466A, 95-466B and 95-466C the only point of diversion is in Lot 2 (SENW) of T51N R3W Sec 19.

Dalton Gardens Irrigation District has filed applications to lease the portions of their water rights that are not presently utilized to the water supply bank. We are including copies of those lease applications for your reference.

Please contact us if you have any questions.

Sincerely,

Dalton Gardens Irrigation District
