need proof of priority as of this late
2P/Ds exist since late 50s (covered under the
two licenses) ~~but~~ but the div
rate from those wells extended onto all
acres within Sec 36. Licensing field
exams indicate that the 2 wells were
capable of delivering 2.8 CFS & 1.66 CFS.

If these wells were used exclusively
on the 5 1/2 of the 5 1/2 prior to mandatory
permit date for G.W. then an increase
to an in per acre is demonstrated.
If after permit date, recommend disallow

Kelly Christensen did a review of these rights in 1992. I did a field exam in 1994 and included those materials in the files. I agreed with his findings and recommendations (except to change the Season of Use and re-format the Remarks according to our new standards.) For more information, see CVR's by Kelly in the back of each file.

Contact Person(s) Norman Bodily

Nature of Contact field exam

Substance of Communication Norman Bodily met with me about his claims after I measured his two wells. He explained his irrigation system. He uses wheel-lines and sometimes flood irrigation. There are cement ditches around his place and a recirculation pond in the back. The water is salty and it helps to put it in the pond before applying it to the crops - or else they burn. Well #2 (Little Well) was pumping very low and the discharge into the ditch was turned off and the water was going over to the other well (Big Well). He asked if I would take another measurement with the discharge open to see what kind of difference it made. He signed the Robin Wells Release as he had measured his wells in the past.

Claims A43-2370A, A43-2464A, & A43-4081

System description

The system is two irrigation wells capable of irrigating approx 157 acres. The two licensed rights were split in allocation through Transfer 3611.

1. The licensed rights allow 0.01045 CFS/ACRE. (Based upon 157 acres)
2. The system capacity is PD #1 = 1.66 CFS
PD #2 = $\frac{2.80 \text{ CFS}}{4.46 \text{ CFS}}$ per 6-10-60 field efam

3. Claim A43-4081 was determined to be valid and is therefore recommended for the balance required to bring the system up to the legal limit of 1" per acre
 $0.02 - 0.01045 = .00955 \text{ CFS/ACRE} \times 157A = \underline{1.5 \text{ CFS}}$

Analysis of proof of Priority for A43-4081.

1. Claimed priority was 4-18-1952. 4-18-52
2. 160 Acres covered by these 3 claims sold to Max Starns (separating property) - 2-17-58
3. Field efam conducted for permits 43-2370 & 43-2464. 6-10-60
 - a) efam combined ^{wells} systems & spread diversion rates over the entire section.
 - b) Efam identifies two different owners for the licensed P/U.
 - c) sketch of system indicates that the wells claimed in these claims irrigated ^{only} the current 160 acres.
4. Transfer 3611 filed to formally split the water rights 36-2370 & 36-2464

MICROFILMED
MAR 03 1993

Recommendation For A43-4081

Evidence supplied indicate that the wells in the SW/SE of Sec 36 were supplying water to the S $\frac{1}{2}$ of the S $\frac{1}{2}$ of sec 36 by 1958. (Ownership change of the 160 described acres.) However, the 1960 licensing field exam spread the diversion rate from those wells over all acres irrigated in Sec 36 and covered by the two licenses. The system diagram, however, indicates that the south 2 wells covered only the South 160 Acres.

Therefore I recommend 157 acres irrigated from those wells at one inch per acre, as the field exam determined that the combined flow from the two wells exceed the legal limit. Further, I recommend the priority date be set one day following the licensing field exam. (6-11-60)

Recommended rate is 1.5 CFS (see Pg 1 item 3 of system description).

Secondary Considerations

As there are two irrigation within approx 300 ft of each other and a domestic well between them, there has been some confusion as to locations and ^{which} output relates to each well.

The wells parallel the south border of the P/U. I have designated the Well on the west side of the farmstead as P/D #1 and it has a 16" casing. The other irrigation well is labeled P/D #2 and has a 12" casing. Both wells are in the SW/SE Sec 36. There is no well nor has there ever been a well in the SE/SE Sec 36.
