HIGH & FRITCHMAN COMPANY

It is hereby ordered, adjudged and decreed, and this does order, adjudge and decree, that the defendant and intervenor High & Fritchman Company, a corporation, is the owner of, and entitled to the use of, and the right to use for irrigation and domestic purposes the following amounts of water, to-wit:

36-0134 Three and 2 tenths (3.2) second feet of water, with a priority of October 9, 1884, developed and diverted from the waters, seeps, springs and rivulets in the rim rock above the head waters of Billingsley Creek, by means of a tunnel commonly known as the Curran Tunnel, or Curran Spring, situate in the SW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 32, Twp. 7 North, Range 14 East, B. M., Gooding County,

36-0135 Idaho, and 4.8 second feet of the waters of said seeps, springs, and rivulets diverted and developed by the same tunnel, with a priority of April 1, 1908, taken from said tunnel by a pipe line and ditch into and upon the lands of the said defendant herein-after described and used on said lands for irrigating and raising crops thereon and for watering stock and other domestic purposes during the non irrigation season.

Said water rights are appurtenant to and to be used upon and in the irrigation of the following described lands, situate in Gooding County, Idaho, of the said defendant and intervenor High & Fritchman Company, a corporation, to-wit:

The Southeast Quarter (SE $\frac{1}{4}$) of the Northeast quarter (NE $\frac{1}{4}$); the East Half (E $\frac{1}{2}$) of the Southeast Quarter (SE $\frac{1}{4}$) of Section Thirty-one (31); the Southwest Quarter (SW $\frac{1}{4}$) of the Northwest Quarter (NW $\frac{1}{4}$); the East Half (E $\frac{1}{2}$) of the Southwest Quarter (SW $\frac{1}{4}$) of Section Thirty-two (32), all in Township Seven (7) South, Range Fourteen (14) East, B.M., and Lots Three (3) and Four (4) of Section Five (5), Township Eight (8) South, Range Fourteen (14) East, B. M., together with all water rights, ditches and ditch rights of way appurtenant thereto.

DRAFT

EVALUATION OF THE FEASIBILITY OF A WATER RECIRCULATION SYSTEM FOR THE RANGEN AQUACULTURE RESEARCH FACILITY.

Brockway Engineering, P.L.L.C.

November 7, 1995

Introduction

The Rangen Aquaculture Research facility is located northeast of Hagerman, Idaho. Water for the facility is drawn from Curren tunnel, a spring issuing from the north face of the Snake River canyon. Three other water users also withdraw water from the tunnel under water rights which are senior to those of Rangen, Inc. Because the rights of Rangen, Inc. are junior to the others, the spring is an unreliable source; fish raceways frequently go unused for lack of water. One option to acquire additional water is to divert water allocated under the senior water rights, use it in the aquaculture facility, and return the flow by pumping back to the Curren tunnel, thereby having no impact on the water rights of the other users. The purpose of this study is to evaluate the feasibility of such a recirculation system.

System layout

A diagram of the Rangen facility is shown in Figure 1. Water is diverted at the tunnel via a concrete headbox and pipe, flows through the facility including three sets

MICROFILMED
DEC 03 1996

of raceways, and returns to a ditch which eventually flows into Billingsley Creek. It is proposed to locate a pumping facility near the point where the ditch crosses the road at the downstream end of the last raceway. This facility would consist of a concrete pump bay, a vertical turbine pump, a flow regulation valve, and a flow measurement device.

The return-flow pipe would be buried in a trench along the road as shown in Figure 1. Two possible paths for the pipe are shown: 1) following the Curren tunnel access road, or 2) following the main road to the toe of the canyon face and going directly up to the tunnel. Both routes are approximately 2600 feet in length. The first route is less steep, but it would be difficult to dig a trench for the pipe since the ground contains much rock. The second route would not require a trench from the toe of the face to the headbox, but placement of a large pipe would be more difficult. In either case, the return-flow pipe would be anchored to the top of the concrete headbox.

Water rights

In addition to water rights for Rangen, Inc., three other users withdraw water under several rights with priority dates ranging from 1884 to 1908. The irrigation and domestic Rangen rights also have early priority dates, but all of Rangen's fish propagation rights have dates much later than these. The water rights from Curren tunnel are listed and described in Table 1.

MICROFILMED
DEC 03 1996

Table 1. Water users and water rights from the Curren tunnel

Water user	Description of rights	Total rate (cfs)
Crandelmier	5 rights for irrigation and stockwater	8.91
Musser	1 right for irrigation and stockwater	4.10
Candy	2 irrigation rights	0.72
Rangen, Inc.	2 rights for irrigation and domestic	0.14
Rangen, Inc.	2 rights for fish propagation	76.0

The total diversion from the tunnel for irrigation and stockwater uses is 13.94 cfs. Under the proposal examined in this study, this amount (approximately 14 cfs or 6283 gpm) would be diverted from Curren tunnel, used in the aquaculture facility, and pumped back to the headbox, thereby having no impact on downstream water users when the system is in equilibrium. During startup, downstream users could experience momentary fluctuations in flow as the system fills.

The Idaho Department of Water Resources (IDWR) has measured the discharge in Curren tunnel for the past two years. These discharges are shown in Figure 2. Minimum flow for the 1993-1995 period was 2.99 cfs in the spring of 1995. The maximum recorded flow was 20.27 cfs in the fall of 1993.

Preliminary selection of pump

The elevation of the Curren tunnel is approximately 3138 feet¹. The elevation of the ditch at the proposed location of the pumping plant was estimated from a USGS 7.5-minute quadrangle and found to be approximately 3053 feet. The elevation head

¹Covington, H. R. and J. N. Weaver, "Geologic map and profiles of the north wall of the Snake River canyon," USGS publication, 1989

MICROFILMED
DEC 03 1996

is therefore equal to 86 feet. The pump must be designed to pump 14 cfs against the total dynamic head (TDH), which equals the elevation head plus the velocity head plus all head losses in the system.

System curves were developed and are shown in Figure 3 for a range of pipe sizes from 20 inches to 30 inches. The design flow will be 14 cfs, which is the maximum flow that will be returned to the headbox. However, the actual flow may vary, depending on the discharge of the Curren tunnel. A pump which delivers a range of flow from 10 cfs to 14 cfs (4488 gpm to 6283 gpm) against a sufficient TDH while maintaining reasonable efficiency is the Ingersoll-Dresser 18NKH. The pump curves for this unit are shown in Figure 4.

This pump with a 250-horsepower motor and a 10-foot column will cost approximately \$21,750 installed, as quoted by Layne Pump of Twin Falls, Idaho.

Selection of pipe size

The cost of pumping is directly related to the TDH which must be overcome. For a given flow, a larger pipe results in lower water velocity and less head loss due to friction, and therefore less pumping cost. However, larger pipe costs more. The optimal pipe size may be found by expressing the tradeoff between pipe cost and pumping cost in economic terms. For a range of pipe sizes, the pumping cost per year was found assuming an average electricity cost of \$.035 per kilowatt-hour. This average price considers the monthly demand charge, which is based on the power rating of the pump, and the usage charge per kilowatt-hour. Prices for steel pipe and installation were quoted by Farmore Co. of Jerome, Idaho and are given in Table 2.

MICROFILMED
DEC 03 1996

Table 2. Cost of steel pipe.

Pipe diameter	Cost per foot
20"	\$16.50
24"	\$20.50
26"	\$23.50
36"	\$47.00

It was assumed that the same pump is appropriate over the range of pipe sizes examined, so that the cost of the motor and pump does not vary with pipe size. A comparison of the system curves in Figure 3 with the pump curves in Figure 4 suggests that this is a reasonable assumption. It was also assumed that the cost of excavation and pipe installation does not vary with pipe size.

Because the yearly electricity cost is an amortized cost, the present value was calculated assuming a project life of 20 years with a minimum acceptable rate of return of 10%. This amount was then added to the cost of the pipe, which is already a present value, to yield a total present value (see Figure 5). The pipe size which minimizes the total present value 26 inches. A very large pipe is selected by this procedure because when pumping continuously, the present value calculation is very sensitive to pumping cost, which is a function of head loss and thus the size of the pipe. If a 24-inch pipe is chosen rather than a 26-inch, the initial cost of the pipe would decrease to \$53,300 from \$61,100 but the annual pumping cost would increase to \$46,500 from \$45,300. Given that this is a relatively small increase in pumping cost, and because a 24-inch pipe is easier to handle and may be more readily available, it may be a better choice.

MICROFILMED
DEC 03 1996

Allowance for system down time

Water recirculated by the pumping plant would be used for fish propagation. Raceways require continuous replenishment with fresh water. Any occurrence which interrupts this flow of water would be devastating to the fish in the raceways and would result in a significant monetary loss. Interruption of the flow could be caused by a power outage, a malfunction of the pump or motor, or a break in the return-flow pipe. A pipe break is unlikely unless the pipe were defective or a weld was improperly performed. However, the first two scenarios are not only probable but a certainty if the pump is run continuously. As protection, a redundant system could be built (two pumps of equal size) and a 440-volt, 3-phase generator could be installed for use during power outages. Neither of these has been included in the cost estimate for this study.

Cost estimation

Initial cost estimates for the components of the system and installation are presented in Table 3. Excavation costs assume a 3-foot wide by 4-foot deep trench for the pipeline. The pipeline price was quoted by Farmore Co. in Jerome, Idaho for steel pipe with a wall thickness of 0.281". Installation of the pipeline involves placement of the pipe and welding of the sections, both of which could be performed by Farmore. Prices for the pump and motor and the electrical panel were quoted by Layne Pump of Twin Falls, Idaho and include installation. A flow meter would be required on the pipeline to measure the return flow to Curren tunnel. An in-pipe impeller-type meter may be obtained for approximately \$900 including installation from Farm Irrigation systems of Twin Falls, Idaho. The flow should also be measured in the ditch at the end of the last raceway to ensure that water is not

MICROFILMED
DEC 03 1996

deprived of downstream users who have senior water rights. This cost is not included in the estimate.

The motor requires a 440-volt, 3-phase supply of electricity. According to Mr. Greg Evans of Idaho Power, the nearest 440-volt tap is approximately 1050 feet from the pumping plant location. The cost to tap this line and supply power to the pump house would be approximately \$1875 plus \$7.00 per foot, for a total of \$9,267. Idaho Power gives a \$30 per horsepower discount for large users, which would bring the cost down to \$1767 for a 250 horsepower pump. However, Mr. Evans cautioned that this discount may not be available next year due to changes in the regulatory environment of utilities.

Including other costs for concrete, a pre-fabricated pump house, miscellaneous metal fabrication for an expansion fitting and other incidental work, plus a 10% margin for unexpected costs, the total initial cost for the system installation is estimated to be \$116,300.

Annual pumping costs were estimated to be \$0.035 per kilowatt-hour on average, which includes both demand and usage costs as discussed previously. Assuming 14 cfs (6283 gpm) were pumped continuously, the annual pumping cost would be \$45,300 with a 26-inch pipe and \$46,500 with a 24-inch pipe. One option to reduce pumping cost is to operate the recirculation system only during the irrigation season when the other water users were withdrawing significant flow. With a 180-day growing season from April 15 to October 15, the annual pumping cost would be \$22,300 with a 26-inch pipe and \$22,900 with a 24-inch pipe.

Conclusions

The analysis of the proposed recirculation system for Rangen, Inc. shows that it is a feasible solution with significant annual cost. Even though the arrangement may be

MICROFILMED
DEC 03 1996

feasible, a proposition such as this would require the approval of each of the involved water users with senior rights and of the Idaho Department of Water Resources (IDWR).

MICROFILMED

County of Twin Falls)

THORLEIF RANGEN, Being first duly sworn on oath,
deposes and says:

1. I am familiar with the Rangen Hatchery property to which Water Right Nos. 36-00135A and 36-00135B are appurtenant.

2. I have reviewed aerial photographs of said Rangen Hatchery facility which were taken in 1950 and 1957. The 1950 aerial photograph accurately reflects the fish propagation raceways which were under construction at that time when the land was owned by Mr. Harry Bean (Mr. Bean was Rangen Inc.'s predecessor in interest). The 1957 aerial

photograph accurately reflects the raceways after construction was completed.

3. Said raceways, as they exist on the 1957 aerial photograph and as they were under construction in 1950, have been circled in red for easy reference.

DATED this 28 day of November, 1995.

THORLEIF RANGEN

SUBSCRIBED AND SWORN to before me this 28th day of November, 1995.

Notary Public for State of Idaho
Residing at Buhl, therein.

of the Rights to the Use of Water
from the Snake River Basin
Water System

Case No. 36-00135A -0001

The State of Idaho, ex rel.
R. Keith Higginson in his
official capacity as Director
of the Idaho Department of
Water Resources,

RESPONSE TO OBJECTION

Petitioner,

vs.

The United States; the State
of Idaho; and all Claimants to
the use of water from the Snake
River Basin Water System,

Respondents.

I. GENERAL INFORMATION

1. Person responding to objection:

Name: R. KEITH HIGGINSON, DIRECTOR

Address: IDAHO DEPARTMENT OF WATER RESOURCES
P.O. BOX 44449
BOISE, ID 83711-4449

Briefly describe your interest in this water right:

IDWR is required to file a response to an objection to part
I of the director's report pursuant to I.C. section 42-1412(2).

(Over)

MICROFILMED
DEC 03 1996

2. Person who filed objection:

Name: RANGEN INC
Address: PO BOX 706
BUHL ID 83316

3. If this response is filed by an attorney:

Attorney Name(s): NICHOLAS B. SPENCER
Attorney Address: DEPUTY ATTORNEY GENERAL(S)
IDAHO DEPARTMENT OF WATER RESOURCES
P.O. BOX 44449
BOISE, ID 83711-4449

Attorney Phone No.: (208) 327-7900

II. STATEMENT OF THE RESPONSE

3. ☒ Quantity: I respond to the objection concerning:
- 3c. ☒ The total quantity of water reserved for each and every purpose, including all present and future uses.
7. ☒ Purposes of Use: I respond to the objection concerning the purpose(s) of use.
10. ☒ Consumptive Use: I respond to the objection concerning the annual volume of consumptive use.

REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection item 3c., and all allegations of the objection regarding that item, IDWR responds as follows: Since this water right is not a federal reserved water right, this objection item is inapplicable and the claimant's assertion of it is in error. IDWR further responds that under Idaho law water cannot be reserved for future use, but must be appropriated and put to beneficial use before the user can acquire a water right. IDWR further responds that it believes this objection item was identified by mistake, and that

the claimant intended to object to items 3 and 3a. In response to Statement of the Objection items 3 and 3a., and all allegations regarding those objection items, IDWR responds as follows: For the purposes of use that IDWR recommended for this right, IDWR recommended the amount of water it determined was being beneficially used; the claimant is not entitled to any amount greater than that which is beneficially used. Idaho Code sections 42-104 and 42-1402. In further response to this item, IDWR responds that by now seeking a larger amount of water than claimed, the claimant improperly seeks to use the objection process to amend the claim. A claimant must obtain leave of the court to amend a claim after a director's report is filed, just as a party must obtain leave of the court to file a late claim after the director's report is filed. Once leave of the court is granted, IDWR can investigate the amended claim and make an appropriate recommendation to the court.

In response to Statement of the Objection item 7, and all allegations of the objection regarding this item, IDWR responds as follows: Information provided by the claimant to IDWR indicates that the use of water for fish propagation was begun in July 1962, under water right no. 36-02551. All fish propagation use was recommended under water right nos. 36-02551 and 36-07694. IDWR further responds that it did not recommend fish propagation as a purpose of use under this right because that use would constitute an expansion of use to which neither Idaho Code section 42-1416 nor 42-1416a would apply.

In response to Statement of the Objection item 10 and all allegations of the objection regarding this item, IDWR responds as follows: (1) The decree asserted by the claimant did not set an annual volume of consumptive use for this water right. (2) Idaho Code Sec. 42-1411(2)(i) requires the director to determine the annual volume of consumptive use for each water right acquired under state law and recommended in the director's report. (3) Idaho Code Sec. 42-1401A(2) provides that the quantification of consumptive use "is included as a rebuttable presumption in a decree only for the purpose of transfers pursuant to section 42-222, Idaho Code"; therefore, the consumptive use recommended for this water right is included solely for use in future transfer proceedings. (4) The annual consumptive use volume recommended in Remarks for this right is 3 acre feet per acre. This is the maximum volume of water consumed by the most water consumptive crop (pasture) that can be grown in the area during the period of year when water is used for irrigation, as provided for by Idaho Code Sec. 42-1401A(2). The consumptive use volume recommended for this right is appropriate for the total quantity of water recommended.

HIGH & FRITCHMAN COMPANY

It is hereby ordered, adjudged and decreed, and this does order, adjudge and decree, that the defendant and intervenor High & Fritchman Company, a corporation, is the owner of, and entitled to the use of, and the right to use for irrigation and domestic purposes the following amounts of water, to-wit:

36-0134 Three and 2 tenths (3.2) second feet of water, with a priority of October 9, 1884, developed and diverted from the waters, seeps, springs and rivulets in the rim rock above the head waters of Billingsley Creek, by means of a tunnel commonly known as the Curran Tunnel, or Curran Spring, situate in the SW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 32, Twp. 7 North, Range 14 East, B. M., Gooding County,

36-0135 Idaho, and 4.8 second feet of the waters of said seeps, springs, and rivulets diverted and developed by the same tunnel, with a priority of April 1, 1908, taken from said tunnel by a pipe line and ditch into and upon the lands of the said defendant herein-after described and used on said lands for irrigating and raising crops thereon and for watering stock and other domestic purposes during the non irrigation season.

Said water rights are appurtenant to and to be used upon and in the irrigation of the following described lands, situate in Gooding County, Idaho, of the said defendant and intervenor High & Fritchman Company, a corporation, to-wit:

The Southeast Quarter (SE $\frac{1}{4}$) of the Northeast Quarter (NE $\frac{1}{4}$); the East Half (E $\frac{1}{2}$) of the Southeast Quarter (SE $\frac{1}{4}$) of Section Thirty-one (31); the Southwest Quarter (SW $\frac{1}{4}$) of the Northwest Quarter (NW $\frac{1}{4}$); the East Half (E $\frac{1}{2}$) of the Southwest Quarter (SW $\frac{1}{4}$) of Section Thirty-two (32), all in Township Seven (7) South, Range Fourteen (14) East, B.M., and Lots Three (3) and Four (4) of Section Five (5), Township Eight (8) South, Range Fourteen (14) East, B. M., together with all water rights, ditches and ditch rights of way appurtenant thereto.

INSTRUCTIONS

This form must be used to file an objection to any water right recommended in the Director's Report. You may object to one water right per objection form. The water right number you are objecting to must be indicated above in the blank space following "Case No." To object to more than one water right, you must file a separate objection form for each. Forms may be obtained from the Idaho Department of Water Resources (IDWR), or you may copy or reproduce this blank form, as long as it is identical to the court's form. You must file your objection by the deadline shown in the notice that IDWR mailed to you. The objection must be received by the court on or before the deadline specified. Instructions for mailing this objection are found at Page 6, and must be strictly followed.

Any party physically filing 25 (twenty-five) or more objections must make an appointment with the Clerk of the Adjudication Court and arrange for an appointment to file multiple objections.

COPY

By filing an objection form, you are certifying that the objection is well-grounded in fact; is warranted by existing law or a good-faith argument for the extension, modification or reversal of existing law; and that it is not filed for any improper purpose, such as to harass, cause unnecessary delay or needless increase in the cost of litigation.

I. GENERAL INFORMATION

Please fill in the following information:

1. Person objecting:

Name: J. Dee May, Agent for Owner

Address: P. O. Box 1846

Twin Falls, ID 83301

Briefly describe your interest in this water right:

Attorney/Agent for Rangen, Inc.

Owner of the Water Right

2. Owner of the water right:

Name: Rangen, Inc.

Address: P. O. Box 706

Buhl, ID 83316

3. If this objection is filed by an attorney:

Attorney Name: J. Dee May

Attorney Address: P. O. Box 1846

Twin Falls, ID 83301

Attorney Phone No.: 208-733-7180

If filed by an attorney, notice of pending court proceedings will be sent to the attorney only.

II. STATEMENT OF THE OBJECTION

Please check each "box" which states your objection to the recommendation in the Director's Report.

1. ☐ Name and Address: I object to the name and/or address of the owner of the water right.
2. ☐ Source: I object to the source of water.
3. ☐ Quantity: I object to:
 - a. ☐ the total quantity of water used in cubic feet per second; or
 - b. ☐ the total quantity of water stored in acre-feet per year; or
 - c. ☒ the total quantity of water reserved for each and every purpose, including all present and future uses.
4. ☐ Priority Date: I object to the priority date.
5. ☐ Points of Diversion: I object to the legal description of the point(s) of diversion.
6. ☐ Instream Flow: I object to the legal description of the beginning and ending points of the instream flow.
7. ☒ Purpose(s) of Use: I object to the purpose(s) of use.
8. ☐ Period of Year: I object to the period of year when water is used or is necessary for the purpose stated.
9. ☐ Place of Use: I object to:
 - a. ☐ the legal description of the place of use; or
 - b. ☐ the number of irrigated acres within each forty (40) acre subdivision.
10. ☒ Consumptive Use: I object to the annual volume of consumptive use.
11. ☐ Remarks: I object to the "remarks" listed with the water right.

(Over)

MICROFILMED

12. ☐ Water Right Recommendation: I object to:
- a. ☐ this water right being recommended at all; or
- b. ☐ this water right not being recommended.
13. ☐ Description of Reservation: I object to the legal description of the reservation.
14. ☐ Other: I object to: _____
- _____
- _____
- _____

REASONS SUPPORTING EACH BOX CHECKED

In the space following, you must state the reason(s) by number for each box checked. You may use additional pages if necessary.

3.C.- Quantity of use for fish propagation should be 1.46 cfs.

7. The purpose of use should include fish propagation

10. Total consumptive use should be 21.0 cfs.

CHANGES TO THE DIRECTOR'S REPORT

Specifically describe how you want the Director's Report to be changed. You may use additional pages if necessary.

The purpose of use should include fish propagation
for 62 ponds and the quantity of use should be 1.46 cfs.

The total consumptive use should be 21.0 cfs.

Please note: You should attach copies of documents which support your objection. Note on each document the "box number" it supports.

☐ Check here if you are submitting documents. Please list each document by the title and number of pages. You may use additional pages if necessary. _____

REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection item 3c., and all allegations of the objection regarding that item, IDWR responds as follows: Since this water right is not a federal reserved water right, this objection item is inapplicable and the claimant's assertion of it is in error. IDWR further responds that under Idaho law water cannot be reserved for future use, but must be appropriated and put to beneficial use before the user can acquire a water right. IDWR further responds that it believes this objection item was identified by mistake, and that

the claimant intended to object to items 3 and 3a. In response to Statement of the Objection items 3 and 3a., and all allegations regarding those objection items, IDWR responds as follows: For the purposes of use that IDWR recommended for this right, IDWR recommended the amount of water it determined was being beneficially used; the claimant is not entitled to any amount greater than that which is beneficially used. Idaho Code sections 42-104 and 42-1402. In further response to this item, IDWR responds that by now seeking a larger amount of water than claimed, the claimant improperly seeks to use the objection process to amend the claim. A claimant must obtain leave of the court to amend a claim after a director's report is filed, just as a party must obtain leave of the court to file a late claim after the director's report is filed. Once leave of the court is granted, IDWR can investigate the amended claim and make an appropriate recommendation to the court.

In response to Statement of the Objection item 7, and all allegations of the objection regarding this item, IDWR responds as follows: Information provided by the claimant to IDWR indicates that the use of water for fish propagation was begun in July 1962, under water right no. 36-02551. All fish propagation use was recommended under water right nos. 36-02551 and 36-07694. IDWR further responds that it did not recommend fish propagation as a purpose of use under this right because that use would constitute an expansion of use to which neither Idaho Code section 42-1416 nor 42-1416a would apply.

In response to Statement of the Objection item 10 and all allegations of the objection regarding this item, IDWR responds as follows: (1) The decree asserted by the claimant did not set an annual volume of consumptive use for this water right. (2) Idaho Code Sec. 42-1411(2)(i) requires the director to determine the annual volume of consumptive use for each water right acquired under state law and recommended in the director's report. (3) Idaho Code Sec. 42-1401A(2) provides that the quantification of consumptive use "is included as a rebuttable presumption in a decree only for the purpose of transfers pursuant to section 42-222, Idaho Code"; therefore, the consumptive use recommended for this water right is included solely for use in future transfer proceedings. (4) The annual consumptive use volume recommended in Remarks for this right is 3 acre feet per acre. This is the maximum volume of water consumed by the most water consumptive crop (pasture) that can be grown in the area during the period of year when water is used for irrigation, as provided for by Idaho Code Sec. 42-1401A(2). The consumptive use volume recommended for this right is appropriate for the total quantity of water recommended.

HIGH & FRITCHMAN COMPANY

It is hereby ordered, adjudged and decreed, and this does order, adjudge and decree, that the defendant and intervenor High & Fritchman Company, a corporation, is the owner of, and entitled to the use of, and the right to use for irrigation and domestic purposes the following amounts of water, co-wit:

- 36-0134 Three and 2 tenths (3.2) second feet of water, with a priority of October 9, 1884, developed and diverted from the waters, seeps, springs and rivulets in the rim rock above the head waters of Billingsley Creek, by means of a tunnel commonly known as the Curran Tunnel, or Curran Spring, situate in the SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 32, Twp. 7 North, Range 14 East, B. M., Gooding County, Idaho, and 4.8 second feet of the waters of said seeps, springs, and rivulets diverted and developed by the same tunnel, with a priority of April 1, 1908, taken from said tunnel by a pipe line and ditch into and upon the lands of the said defendant herein-after described and used on said lands for irrigating and raising crops thereon and for watering stock and other domestic purposes during the non irrigation season.

Said water rights are appurtenant to and to be used upon and in the irrigation of the following described lands, situate in Gooding County, Idaho, of the said defendant and intervenor High & Fritchman Company, a corporation, to-wit:

The Southeast Quarter (SE $\frac{1}{4}$) of the Northeast Quarter (NE $\frac{1}{4}$); the East Half (E $\frac{1}{2}$) of the Southeast Quarter (SE $\frac{1}{4}$) of Section Thirty-one (31); the Southwest Quarter (SW $\frac{1}{4}$) of the Northwest Quarter (NW $\frac{1}{4}$); the East Half (E $\frac{1}{2}$) of the Southwest Quarter (SW $\frac{1}{4}$) of Section Thirty-two (32), all in Township Seven (7) South, Range Fourteen (14) East, B.M., and Lots Three (3) and Four (4) of Section Five (5), Township Eight (8) South, Range Fourteen (14) East, B. M., together with all water rights, ditches and ditch rights of way appurtenant thereto.

Department of Water Resources
Adjudication Bureau

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re the General Adjudication
of Rights to the Use of Water
from the Snake River Basin
Water System

Case No. 36-00135A
(You must insert the
water right number you
are objecting to)

The State of Idaho, ex rel.
R. Keith Higginson in his
official capacity as Director
of the Idaho Department of
Water Resources,

OBJECTION

Petitioner,

vs.

36-00135A -0001/
93-04-0120

The United States; the State
of Idaho; and all Claimants to
the use of water from the Snake
River Basin Water System,

Respondents.

INSTRUCTIONS

This form must be used to file an objection to any water right recommended in the Director's Report. You may object to one water right per objection form. The water right number you are objecting to must be indicated above in the blank space following "Case No." To object to more than one water right, you must file a separate objection form for each. Forms may be obtained from the Idaho Department of Water Resources (IDWR), or you may copy or reproduce this blank form, as long as it is identical to the court's form. You must file your objection by the deadline shown in the notice that IDWR mailed to you. The objection must be received by the court on or before the deadline specified. Instructions for mailing this objection are found at Page 6, and must be strictly followed.

Any party physically filing 25 (twenty-five) or more objections must make an appointment with the Clerk of the Adjudication Court and arrange for an appointment to file multiple objections.

(Over)

OBJECTION - 1

COPY

By filing an objection form, you are certifying that the objection is well-grounded in fact; is warranted by existing law or a good-faith argument for the extension, modification or reversal of existing law; and that it is not filed for any improper purpose, such as to harass, cause unnecessary delay or needless increase in the cost of litigation.

I. GENERAL INFORMATION

Please fill in the following information:

1. Person objecting:

Name: J. Dee May, Agent for Owner

Address: P. O. Box 1846

Twin Falls, ID 83301

Briefly describe your interest in this water right:

Attorney/Agent for Rangen, Inc.

Owner of the Water Right

2. Owner of the water right:

Name: Rangen, Inc.

Address: P. O. Box 706

Buhl, ID 83316

3. If this objection is filed by an attorney:

Attorney Name: J. Dee May

Attorney Address: P. O. Box 1846

Twin Falls, ID 83301

Attorney Phone No.: 208-733-7180

If filed by an attorney, notice of pending court proceedings will be sent to the attorney only.

II. STATEMENT OF THE OBJECTION

Please check each "box" which states your objection to the recommendation in the Director's Report.

1. ☐ Name and Address: I object to the name and/or address of the owner of the water right.
2. ☐ Source: I object to the source of water.
3. ☐ Quantity: I object to:
 - a. ☐ the total quantity of water used in cubic feet per second; or
 - b. ☐ the total quantity of water stored in acre-feet per year; or
 - c. ☒ the total quantity of water reserved for each and every purpose, including all present and future uses.
4. ☐ Priority Date: I object to the priority date.
5. ☐ Points of Diversion: I object to the legal description of the point(s) of diversion.
6. ☐ Instream Flow: I object to the legal description of the beginning and ending points of the instream flow.
7. ☒ Purpose(s) of Use: I object to the purpose(s) of use.
8. ☐ Period of Year: I object to the period of year when water is used or is necessary for the purpose stated.
9. ☐ Place of Use: I object to:
 - a. ☐ the legal description of the place of use; or
 - b. ☐ the number of irrigated acres within each forty (40) acre subdivision.
10. ☒ Consumptive Use: I object to the annual volume of consumptive use.
11. ☐ Remarks: I object to the "remarks" listed with the water right.

(Over)

12. ☐ Water Right Recommendation: I object to:
- a. ☐ this water right being recommended at all; or
- b. ☐ this water right not being recommended.
13. ☐ Description of Reservation: I object to the legal description of the reservation.
14. ☐ Other: I object to: _____
- _____
- _____
- _____

REASONS SUPPORTING EACH BOX CHECKED

In the space following, you must state the reason(s) by number for each box checked. You may use additional pages if necessary.

3.C.- Quantity of use for fish propagation should be 1.46 cfs.

7. The purpose of use should include fish propagation

10. Total consumptive use should be 21.0 cfs.

CHANGES TO THE DIRECTOR'S REPORT

Specifically describe how you want the Director's Report to be changed. You may use additional pages if necessary.

The purpose of use should include fish propagation
for 62 ponds and the quantity of use should be 1.46 cfs.

The total consumptive use should be 21.0 cfs.

Please note: You should attach copies of documents which support your objection. Note on each document the "box number" it supports.

☐ Check here if you are submitting documents. Please list each document by the title and number of pages. You may use additional pages if necessary. _____

MICROFILMED

JAN 25 1993

EXPLANATION OF ELEMENTS OF A WATER RIGHT

This explanation is provided to assist you in reviewing the proposed recommendation of your claim.

Water right number: This number is assigned by IDWR to identify your claim. The first two digits indicate the sub-basin of the Snake River Basin where your claim is located.

Name and address of claimant: This is the name and address shown on the notice of claim form, or on the most recent notice of change in address or change in ownership that was filed with IDWR as required by statute.

Source: The source is the natural water body to which the claimant has a right. For surface water sources, the natural water body to which the source is tributary is also shown.

Priority date: This is the calendar date which is used to determine the relative priority of the right in relation to other rights from the same source, and is determined based on the method of appropriation (see basis of right, below). When there is insufficient water available to satisfy all existing rights, the water right holders with the oldest priorities are entitled to have their water rights satisfied before right holders with newer priorities are entitled to water.

Purpose of use: Purpose of use indicates the general type of use made of the water, such as irrigation, domestic, or stockwater.

Period of use: The period of use is the portion of the calendar year when water may be used for a particular purpose.

Quantity: The quantity of the right is the rate of diversion in cubic feet per second (CFS), the volume of water diverted in acre feet per calendar year (AFY), and/or the volume of water stored in AFY. The quantity for each purpose of use is shown, as well as the total quantity.

Non-irrigation uses: If your proposed recommendation includes purposes of use other than irrigation, then this element further describes the other purposes of use.

Point of diversion: The point of diversion is the point at which water is diverted from the source, and is generally described by a legal description of the 40 acre tract (1/4 1/4 section or 1/16 section) or government lot within which the point of diversion is located. In some instances the point of diversion is described by a legal description of the 10 acre tract (1/4 1/4 1/4 section or 1/64 section) within which the point of diversion is located.

"B" and "E" suffixes indicate the beginning and ending points of an instream flow right. "I" and "R" suffixes indicate points of injection and rediversion. Points of injection and rediversion are indicated where water is diverted from one source, injected into another source, and then rediverted, or where water from one source is exchanged with water from another source.

Place of use: The place of use is the location where water is used, which is indicated by a legal description of the 40 acre tract (1/4 1/4 section or 1/16 section) or government lot where the water is used. For irrigation rights, the number of irrigated acres in each 40 acre tract or government lot is listed.

Consumptive use: Consumptive use is the amount of water that does not remain in the water system after use or is not returned to the water system through return flows or seepage. Consumptive use is shown only for irrigation rights or for the irrigation portion of water rights, unless the description of the water right indicates otherwise. Where consumptive use for any purpose of use is not stated, then the consumptive use is so small that it is not quantified.

Remarks: Remarks, if any, further describe the particular right. PLEASE REVIEW THE REMARKS CAREFULLY - Due to technical difficulties, the remarks shown on your proposed recommendation may be different from the remarks on your claim but do not show overstrikes and underlines.

Basis of right: The basis of the right may be a decree (where the water right was previously determined by a court); posted notice (an historical method of appropriation that is no longer available); beneficial use (another historical method of appropriation that is available today only in very limited circumstances); permit (where IDWR has granted an application seeking approval of a proposed appropriation); or license (where an appropriation has been completed pursuant to a permit).

WHY IS THE NOTICE OF ERROR REQUIRED?

The court has ordered that IDWR adopt this procedure to provide a simple and inexpensive means to try to resolve potential disputes informally **before** the Director's Report is filed with the court. Disputes that are not resolved through this procedure will be resolved by the court through the objection procedure described below.

If a dispute can be resolved informally before the Director's Report is filed, it will save time and money for everyone, since you and IDWR will not have to appear before the judge to resolve the matter. Many disagreements can be resolved informally through this procedure.

WHAT HAPPENS AFTER THE DIRECTOR'S REPORT IS FILED WITH THE COURT?

When the Director's Report is filed with the court, you will be mailed a **notice of filing** the Director's Report, along with a copy of your claim as it is recommended in the report. The notice will state the locations where a complete copy of the report is available.

If you disagree with **any** portion of the Director's Report, then you will have an opportunity to file an **objection** to the report with the court. This includes the director's recommendation as to your water right, or to someone else's water right. If you disagree with any portion of the Director's Report, you must file an objection with the district court by the objection deadline, or you may lose the right to challenge anything that you think is wrong in the report.

IDWR must file a **response** to each objection. You will have the opportunity to file a response if someone else objects to your water right, or if you wish to participate in the proceedings on an objection to someone else's water right.

Once the deadlines for filing objections and responses have passed, the court will enter a **partial decree** that determines all of the recommendations to which no objections were filed. The uncontested claims will be decreed the same as they are shown in the Director's Report. The court will then proceed to resolve the disputes raised by the objections (the contested claims), after trial if necessary, and to enter partial decrees of those remaining claims.

The **notice of filing the Director's Report** will contain further information about the procedures to be followed after the report is filed with the court, including the deadlines for filing objections and responses, and the date and location of the hearing on the partial decree of uncontested matters.

IS THERE ANYTHING ELSE IN THE DIRECTOR'S REPORT?

The Director's Report will also include "general provisions." These provisions apply to all water rights in the area where your claim is located or to certain types of water rights in your area. Some of the general provisions further describe or limit certain types of water rights. Some of the general provisions will affect the way in which water rights in your area will be administered.

Proposed general provisions for the Director's Report are available for your review and comment at this time. Copies are available for inspection at all IDWR offices (listed below), and at the additional locations printed with your proposed recommendation. Copies can be obtained from IDWR (subject to a small charge for mailing and/or copying).

WHAT IF YOU DISAGREE WITH THE PROPOSED GENERAL PROVISIONS?

If you disagree with the proposed general provisions, please complete the "Notice of Error" form below, and return it to IDWR by the deadline shown on your proposed recommendation. You are not required to file a notice of error if you disagree with the proposed general provisions, but filing a notice of error will provide an opportunity for resolving disputes as to this portion of the Director's Report before the report is filed with the court.

HOW CAN YOU GET MORE INFORMATION?

If you have questions about your proposed recommendation or the notice of error procedure, please call your attorney or IDWR.

IDWR State Office, 1301 N. Orchard St., Statehouse Mail, Boise, Idaho 83720-9000; (208) 327-7906, c toll-free 1-800-451-4129.

IDWR Northern Region, 1910 Northwest Blvd. Suite 210, Coeur d'Alene, Idaho 83814-2615; (208) 765-4639.

IDWR Western Region, 2735 Airport Way, Boise, Idaho 83705-5082; (208) 334-2190.

IDWR Southern Region, 222 Shoshone St. East Twin Falls, Idaho 83301-6602; (208) 736-3033.

IDWR Eastern Region, 150 W. Shoup Ave. Suite 101, Idaho Falls, Idaho 83402-3653; (208) 525-7161.

WHY IS THE NOTICE OF ERROR REQUIRED?

The court has ordered that IDWR adopt this procedure to provide a simple and inexpensive means to try to resolve potential disputes informally before the Director's Report is filed with the court. Disputes that are not resolved through this procedure will be resolved by the court through the objection procedure described below.

If a dispute can be resolved informally before the Director's Report is filed, it will save time and money for everyone, since you and IDWR will not have to appear before the judge to resolve the matter. Many disagreements can be resolved informally through this procedure.

WHAT HAPPENS AFTER THE DIRECTOR'S REPORT IS FILED WITH THE COURT?

When the Director's Report is filed with the court, you will be mailed a notice of filing the Director's Report, along with a copy of your claim as it is recommended in the report. The notice will state the locations where a complete copy of the report is available.

If you disagree with any portion of the Director's Report, then you will have an opportunity to file an objection to the report with the court. This includes the director's recommendation as to your water right, or to someone else's water right. If you disagree with any portion of the Director's Report, you must file an objection with the district court by the objection deadline, or you may lose the right to challenge anything that you think is wrong in the report.

IDWR must file a response to each objection. You will have the opportunity to file a response if someone else objects to your water right, or if you wish to participate in the proceedings on an objection to someone else's water right.

Once the deadlines for filing objections and responses have passed, the court will enter a partial decree that determines all of the recommendations to which no objections were filed. The uncontested claims will be decreed the same as they are shown in the Director's Report. The court will then proceed to resolve the disputes raised by the objections (the contested claims), after trial if necessary, and to enter partial decrees of those remaining claims.

The notice of filing the Director's Report will contain further information about the procedures to be followed after the report is filed with the court, including the deadlines for filing objections and responses, and the date and location of the hearing on the partial decree of uncontested matters.

IS THERE ANYTHING ELSE IN THE DIRECTOR'S REPORT?

The Director's Report will also include "general provisions." These provisions apply to all water rights in the area where your claim is located or to certain types of water rights in your area. Some of the general provisions further describe or limit certain types of water rights. Some of the general provisions will affect the way in which water rights in your area will be administered.

Proposed general provisions for the Director's Report are available for your review and comment at this time. Copies are available for inspection at all IDWR offices (listed below), and at the additional locations printed with your proposed recommendation. Copies can be obtained from IDWR (subject to a small charge for mailing and/or copying).

WHAT IF YOU DISAGREE WITH THE PROPOSED GENERAL PROVISIONS?

If you disagree with the proposed general provisions, please complete the "Notice of Error" form below, and return it to IDWR by the deadline shown on your proposed recommendation. You are not required to file a notice of error if you disagree with the proposed general provisions, but filing a notice of error will provide an opportunity for resolving disputes as to this portion of the Director's Report before the report is filed with the court.

HOW CAN YOU GET MORE INFORMATION?

If you have questions about your proposed recommendation or the notice of error procedure, please call your attorney or IDWR.

IDWR State Office, 1301 N. Orchard St., Statehouse Mail, Boise, Idaho 83720-9000; (208) 327-7906, or toll-free 1-800-451-4129.

EXPLANATION OF ELEMENTS OF A WATER RIGHT

This explanation is provided to assist you in reviewing the proposed recommendation of your claim.

Water right number: This number is assigned by IDWR to identify your claim. The first two digits indicate the sub-basin of the Snake River Basin where your claim is located.

Name and address of claimant: This is the name and address shown on the notice of claim form, or on the most recent notice of change in address or change in ownership that was filed with IDWR as required by statute.

Source: The source is the natural water body to which the claimant has a right. For surface water sources, the natural water body to which the source is tributary is also shown.

Priority date: This is the calendar date which is used to determine the relative priority of the right in relation to other rights from the same source, and is determined based on the method of appropriation (see basis of right, below). When there is insufficient water available to satisfy all existing rights, the water right holders with the oldest priorities are entitled to have their water rights satisfied before right holders with newer priorities are entitled to water.

Purpose of use: Purpose of use indicates the general type of use made of the water, such as irrigation, domestic, or stockwater.

Period of use: The period of use is the portion of the calendar year when water may be used for a particular purpose.

Quantity: The quantity of the right is the rate of diversion in cubic feet per second (CFS), the volume of water diverted in acre feet per calendar year (AFY), and/or the volume of water stored in AFY. The quantity for each purpose of use is shown, as well as the total quantity.

Non-irrigation uses: If your proposed recommendation includes purposes of use other than irrigation, then this element further describes the other purposes of use.

Point of diversion: The point of diversion is the point at which water is diverted from the source, and is generally described by a legal description of the 40 acre tract (1/4 1/4 section or 1/16 section) or government lot within which the point of diversion is located. In some instances the point of diversion is described by a legal description of the 10 acre tract (1/4 1/4 1/4 section or 1/64 section) within which the point of diversion is located.

"B" and "E" suffixes indicate the beginning and ending points of an instream flow right. "I" and "R" suffixes indicate points of injection and rediversion. Points of injection and rediversion are indicated where water is diverted from one source, injected into another source, and then rediverted, or where water from one source is exchanged with water from another source.

Place of use: The place of use is the location where water is used, which is indicated by a legal description of the 40 acre tract (1/4 1/4 section or 1/16 section) or government lot where the water is used. For irrigation rights, the number of irrigated acres in each 40 acre tract or government lot is listed.

Consumptive use: Consumptive use is the amount of water that does not remain in the water system after use or is not returned to the water system through return flows or seepage. Consumptive use is shown only for irrigation rights or for the irrigation portion of water rights, unless the description of the water right indicates otherwise. Where consumptive use for any purpose of use is not stated, then the consumptive use is so small that it is not quantified.

Remarks: Remarks, if any, further describe the particular right. PLEASE REVIEW THE REMARKS CAREFULLY - Due to technical difficulties, the remarks shown on your proposed recommendation may be different from the remarks on your claim but do not show overstrikes and underlines.

Basis of right: The basis of the right may be a decree (where the water right was previously determined by a court); posted notice (an historical method of appropriation that is no longer available); beneficial use (another historical method of appropriation that is available today only in very limited circumstances); permit (where IDWR has granted an application seeking approval of a proposed appropriation); or license (where an appropriation has been completed pursuant to a permit).

RE: RESPONSE TO NOTICE OF ERROR FOR CLAIMS 36-00134B AND
36-00135A.

Dear Mr May

As fish propagation was not part of the original decree I am unable to recommend that use on either claim at the claimed priority date. As new uses are developed new rights need to be claimed. Idaho Code allows all uses to be included within one right if the claimant is willing to accept a single priority date based upon the latest development assuming it falls within applicable regulations. I am not recommending any changes to the proposed recommendations at this time.

If you still do not agree with the proposed IDWR recommendations to the court, you may file an objection with the court after you receive the final recommendation of your water right. The objection process will be explained when you receive your final recommendation of your water right.

Sincerely

Kelly K Christensen
Sr Water Resource Agent

RATE/VOLUME CALCULATIONS: (IRRIGATION)

1a. IRRIGATION RATE

ACRES 7.0 x 0.02 CFS/ACRE = 0.14 CFS
(Taken from p/u review)

1b. CALCULATIONS

DOES AMOUNT CLAIMED EXCEED 0.02 CFS/ACRE? Y(~~X~~) N(X)

Yes when combined!

*** IF YES ADDITIONAL WATER USE FORM FILED AND ATTACHED? Y() N(X) ***

2. IRRIGATION CONSUMPTIVE USE

CLAIMED CONSUMPTIVE USE = 21.0 AF/A

ACRES 7.0 x CONSUMPTIVE VOL. AF/A FOR AREA 3 =

TOTAL CONSUMPTIVE USE 21 AF/A

3. IRRIGATION DIVERSION VOLUME

CLAIMED DIVERSION VOLUME = AF/A

ACRES 7 x DIVERSION VOL. AF/A FOR AREA 4 =

TOTAL DIVERSION VOLUME 28 AF/A

4. CALCULATIONS FOR USES OTHER THAN IRRIGATION:

SEE ATTACHED SHEET? Y() N()

REMARKS: (Include limitations on CONSUMPTIVE USE for combined rights.)
