SPLIT RIGHT CALCULATIONS

All claims are based upon the identical 1441 irrigated acres included in each of the "C" extension claims.

All splits are for the same 124 acres from each claim. Only the diversion rates vary from one claim to another, therefore one base proportional calculation will apply to all claims.

All original claims have the same "C" extension and as another owner of a different system (originally split from the water right "B" extension rights) has claimed his portion under some of the "D" extension.

This split will separate all "C" extension claims into two parts, one with an "E" extension to be owned by Cleft of Rock Farms and the other with a "F" extension to be owned by Neibaur.

(note: there will be some of the claim numbers with no "D" extension claims filed)

PROPORTIONATE SHARE CALCULATIONS

Acres to be split = 124
Base acres = 1,441

for "E" extension claims $\frac{124}{1,441} = 0.08605$

for "F" extension claims $\frac{1,317}{1,441} = 0.9139$

Nature of Contact Field Exam

Substance of Communication was out looking at the well in the middle of Section 18 when Mr. Woodworth came over from his combine work. The well was off but one pivot was on (from small well & booster down in corner.) He said he'd rather I'd measure next Spring when he could have the whole system up and running. He did locate the wells and lines on the map I had and I outlined the irrigated acres in green. I took pictures and gathered my other information...
