1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is not corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case division of the existing water right or adjudication claim record will be required.

2. The following **REQUIRED** information must be submitted with this form:

- A. The appropriate **FILING FEE**. See instructions for fee amounts.
- B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.
- C. Either of the following (if necessary to clarify diversion of water rights or other complex property descriptions):
PLAT OF PROPERTY or **SURVEY MAP** clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claims(s) (these are usually attached to your deed or on file with the county).
- OR**
- If your water right(s) and/or adjudication claim(s) is for ten or more acres of irrigation you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

6. If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7. If the change in ownership divides the water right(s) amount multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for the larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

Interstate Feeders, Inc.
HC 72 Box 2086

Dear Mike:

Our meeting November 13th was beneficial to discuss some of the issues with Interstate Feeders, Inc claims. As you recall, the original water right licenses, 43-2436 and 43-2438, had some limiting language for the stock water diversion volume. That limiting language created a deficiency in the stock water volume. One way to acquire the volume is to cease irrigating an appropriate number of acres and change the nature of use of the rights from irrigation to stock water. Two hundred and six (206) acres are requested to provide the stock water consumptive use volume. The change in nature of use effects claims 43-2442, 43-2437 and 43-4006. The diversion volume was proportionally distributed between the effected irrigation rights. I've enclosed copies of the recommendations and a map outlining the place of use. The place of use includes the stock water and irrigation uses.

Statutory Claim 43-4079 was filed on 7 collection ponds off the feedlots and used for irrigation. It's my understanding that this was only used for about a year before you determined it wasn't effective and discontinued it. Therefore, I'm not recommending it to the court. I've enclosed a Relinquishment Form on this claim for you to sign and return to me as soon as possible.

The change in nature of use for 43-2437, 43-2442 & 43-4006 requires amending the claims. Normally there is a fee associated with amending claims but the department will waver that fee. Please return the signed Relinquishment form on claim 43-4079. This will reduce the paperwork for both of us. Your cooperation in this matter is greatly appreciated.

If you have any questions, please don't hesitate to call me at (208) 327-5450 or toll free at 1-800-451-4129 extension 5450.

Sincerely,

Cindy E. Bird

water from various wells to various lands at the time of purchase. Within the last few weeks, Vista Land Co. has sold all of the company's irrigated land holdings (more than 3,000 acres) except the land listed in this transfer application. This means an additional loss of ability to move water from various wells to various lands.

In addition, Vista Land Company recognizes that, in the past, there has been an important amount of water lost in long dirt ditch and long irrigation runs in flood irrigation practices.

With the remaining irrigated land owned by Vista Land Co., and described herein, it is proposed to significantly improve the irrigation efficiencies. This will be done in part with the purchase of sprinkler systems and the use of gated pipe and shorter irrigation runs. It will also be done, in part, with the advantages of tying 4 wells together in a pipe-system, so that water can be diverted quickly and without loss to any of the lands from any of the wells when the crops demand water. To accomplish this, it will be necessary to drill the new, 4th well, which is proposed herein.

It is proposed by this transfer to me, so to speak, all of the rights so that water from 1, 2, 3, or 4 wells can be used on any of the land as water is required.

This is not intended to be an enlargement over existing rights. There will not be more acres irrigated than present rights allow. We expect that less water will be needed, or water diverted will be placed to a more productive or efficient use. (The application calls for the irrigation of 1,280 acres, and existing

are to irrigate 1,318 acres. Vista Land Co. is not intending to loose the right to irrigate the additional 38 acres by this transfer application and may in the future, make addition transfer applications that will include the use of this additional 38 acres of water right).
