RE: NOTICE OF PLEDGE - NORMAN BROS. - YOUR FILE H-42303

Dear Mr. Kirkland:

The department has reviewed the Notice of Pledge which you forwarded to the department in connection with water right filing nos. A43-02450B, A43-02450D, A43-10539, A43-10541 and 43-07224 as shown by department records. Your letter advises that you have executed a mortgage in connection with the water right filings and you have asked the department to notify you of any future changes in connection with the water right filings.

I have reviewed the specific water right documents in department files and wish to provide the following information to you:

A43-02450B is a Snake River Basin Adjudication claim based on prior license 43-02450B. The claim has been renumbered in department files to A43-02450D. The right provides for the diversion of 1.52 cfs of ground water for the irrigation of 76 acres.

A43-10539 is a Snake River Basin Adjudication claim based partly on an accomplished transfer and partly on the Critical Ground Water Area expansion presumption of section 42-1416B, Idaho Code.

A43-10541 is a Snake River Basin Adjudication claim based on the presumptions of Section 42-1416B, Idaho Code.

43-07224 is a pending application for permit which has not been approved by the department. The department likely will not approve the application, since it is in the Raft River Critical Ground Water Area.

All of the above described water rights are dependent upon action by the department or the Snake River Basin Adjudication court to determine their validity.

Enclosed is a copy of the Notice of Pledge you forwarded which I have acknowledged receipt of by signing the bottom of the form. The department will file a copy of the Notice of Pledge with each of the water right files you have referenced.

If you have questions, please feel free to contact the department.

Sincerely,

A handwritten signature in dark ink, appearing to read "L. Glen Saxton". The signature is fluid and cursive, with the first name "L." being small and the last name "Saxton" being larger and more prominent.

Re: Proceeding with transfer...

I spoke with Mr. Grush today and told him of my draft recommendations for A43-10539 and A43-10541, essentially granting the acres with no additional diversion or volume amounts. I told him that, if approved, this transfer would likely allow him only 2.17 cfs on his 264 acres, or enough water to run one pivot. He wanted to know how many more acres he would need to dry up in order to have the additional water for both pivots? He is now in the process of deciding whether to continue with this transfer or not. He mentioned having two other transfers in the works where he is drying up corners to move to a dairy and now wonders if he should just move that water to the land in Section 27 instead? He said he would be in next week to talk with someone on this matter...

TO: Transfer File #5498

CC: A43-02447, A43-02448, A43-02450D, A43-10539, A43-10541

FROM: Jeanie Robertson 

This transfer proposes to dry up a total of 35 acres and move .35 cfs each of rights 43-02447 and 43-02448, with a combined limitation of .65 cfs, from lands in Section 15, T13S, R27E. The water appears to be valid from these two rights and available to be moved to the land in Section 27, T13S, R27E.

The problem arises with the land in Section 27, however. There are three claims in Section 27, but the only one with a valid water right seems to be A43-02450D, for 1.52 cfs on 76 acres. There have been some problems with this water right in the past, mostly arising from a transfer (#2595) which was approved to move 2.74 cfs onto 76 acres in a different place of use. The transfer was approved for more than an inch per acre based on information submitted showing the soil types required additional water. There was concern expressed by the Department at the time because only 9.5 acres was designated on 8 different 40-acre tracts. The Department worried that an expansion may occur using the additional water on more than 9.5 acres per tract. It was later determined that an expansion of the place of use had occurred and eventually, after hearings, etc. the transfer was voided. The water reverted back to the original place of use. In 1986, transfer #3227 was approved for 1.52 cfs on 76 acres. (The place of use was two forty-acre tracts in the same general area as previous transfer #2595.)

A43-10539 claims 1.22 cfs on 101.6 acres. This diversion rate appears to be the difference between the 2.74 cfs from transfer #2595 and the 1.52 cfs from transfer #3227. As transfer #2595 was voided and the water reverted back to the original right, this rate cannot be justified. The 101.6 acres can be allowed under **42-1416B** as an **expansion of right A43-02450D**, but with **no additional diversion rate or volume and a priority date of June 30, 1985.**

A43-10541 claimed .62 cfs on 52 acres under **42-1416B**. The acres can be recommended as an **expansion of right A43-02450D**, with **no additional rate or volume of water and the priority date of June 30, 1985.**

If this transfer is approved, it could only allow 2.17 cfs for 264.6 acres. (1.52 cfs from A43-02450D and a combined limit of .65 cfs from portions of rights A43-02447 and A43-02448).

*Additional legal advice is being sought from Deputy Attorney General, Nick Spencer, for the final recommendations of these claims in the SRBA.

Re: Norman Bros.

Bob Foster faxed him copies of some summary
reports for WR's 43-2450B & 43-7224
also for AJ claims - A43-02450B, A43-02450D
A43-10539 & A43-10541

Two parties have claimed WR 2450B and so
the Norman Bros. claim was unnumbered to part D.
Claim-10539 is unclear of the basis of the right
but appears to have been prohibited by DWR in fact.
Claim-10541 is a presumption expansion of the
license 2450B. Bottom Line: Water sources are
limited and may not be sufficient. Land is
in CRP now.
